*Biodiversity and Human Health* Francesca Grifo, Joshua Rosenthal, 1997-02-01 The implications of biodiversity loss for the global environment have been widely discussed, but only recently has attention been paid to its direct and serious effects on human health. Biodiversity loss affects the spread of human diseases, causes a loss of medical models, diminishes the supplies of raw materials for drug discovery and biotechnology, and threatens food production and water quality. Biodiversity and Human Health brings together leading thinkers on the global environment and biomedicine to explore the human health consequences of the loss of biological diversity. Based on a two-day conference sponsored by the National Institutes of Health, the National Science Foundation, and the Smithsonian Institution, the book opens a dialogue among experts from the fields of public health, biology, epidemiology, botany, ecology, demography, and pharmacology on this vital but often neglected concern. Contributors discuss the uses and significance of biodiversity to the practice of medicine today, and develop strategies for conservation of these critical resources. Topics examined include: the causes and consequences of biodiversity loss emerging infectious diseases and the loss of biodiversity the significance and use of both prescription and herbal biodiversity-derived remedies indigenous and local peoples and their health care systems sustainable use of biodiversity for medicine an agenda for the future In addition to the editors, contributors include Anthony Artuso, Byron Bailey, Jensa Bell, Bhaswati Bhattacharya, Michael Boyd, Mary S. Campbell, Eric Chivian, Paul Cox, Gordon Cragg, Andrew Dobson, Kate Duffy-Mazan, Robert Engelman, Paul Epstein, Alexandra S. Fairfield, John Grupenhoff, Daniel Janzen, Catherine A. Laughin, Katy Moran, Robert McCaleb, Thomas Mays, David Newman, Charles Peters, Walter Reid, and John Vandermeer. The book provides a common framework for physicians and biomedical researchers who wish to learn more about environmental concerns, and for members of the environmental community who desire a greater understanding of biomedical issues.

*Big Data and Smart Digital Environment* Yousef Farhaoui, Laila Moussaid, 2019-02-21 This book reviews the state of the art of big data analysis and smart city. It includes issues which pertain to signal processing, probability models, machine learning, data mining, database, data engineering, pattern recognition, visualisation, predictive analytics, data warehousing, data compression, computer programming, smart city, etc. Data is becoming an increasingly decisive resource in modern societies, economies, and governmental organizations. Data science inspires novel techniques and theories drawn from mathematics, statistics, information theory, computer science, and social science. Papers in this book were the outcome of research conducted in this field of study. The latter makes use of applications and techniques related to data analysis in general and big data and smart city in particular. The book appeals to advanced undergraduate and graduate students, postdoctoral researchers, lecturers and industrial researchers, as well as anyone interested in big data analysis and smart city.

*Proceedings of the International Conference on Paradigms of Computing, Communication and Data Sciences* Mayank Dave, Ritu Garg, Mohit Dua, Jemal Hussien, 2021-02-19 This book presents best selected papers presented at the International Conference on Paradigms of Computing, Communication and Data Sciences (PCCDS 2020), organized by National Institute of Technology, Kurukshetra, India, during 1-3 May 2020. It discusses high-quality and cutting-edge research in the areas of advanced computing, communications and data science techniques. The book is a collection of latest research articles in computation algorithm, communication and data sciences, intertwined with each other for efficiency.

*Climate Change and Aviation* Stefan Gossling, Paul Upham, 2012-05-04 'This is a timely, challenging and fascinating book on a topic of central importance to the success or otherwise of our climate change policies. It sets down a clear marker for what has to be done in the aviation sector.' Professor John Whitelegg, Stockholm Environment Institute, University of York, UK 'Climate Change and Aviation presents a clear picture of the transport sector's greatest challenge: how to reconcile aviation's immense popularity with its considerable environmental damage and its dependence on liquid hydrocarbon energy sources. This book avoids wishful thinking and takes the much harder, but more productive, path of considering difficult solutions that clash with short-term and short-sighted expectations about the unlimited growth potential for flying.' Professor Anthony Perl, Urban Studies Program, Simon Fraser University, Canada 'A convincing and timely collection that brings together an impressive range of expertise. The book integrates various perspectives into a powerful core argument - we must do something, and quickly, to tackle the impact of aviation on our environment. The authors recognise the political difficulties associated with promoting change but present constructive options for policy makers. Required reading, especially for transport ministers set on promoting the growth of air travel.' Professor Jon Shaw, Director of the Centre for Sustainable Transport, University of Plymouth, UK Trends such as the massive growth in availability of air travel and air freight are among those which have led to aviation becoming one of the fastest growing emitters of greenhouse gases. These trends have also caused a shift in expectations of how we do business, where we go on holiday, and what food and goods we can buy. For these reasons aviation is (and is set to stay) high up on global political, organizational and media agendas. This textbook is the first to attempt a comprehensive review of the topic, bringing together an international team of leading scientists. Starting with the science of the environmental issues, it moves on to cover drivers and trends of growth, socio-economics and politics, as well as mitigation options, the result being a broad yet detailed examination of the field. This is essential reading for undergraduate and postgraduate courses in transport, tourism, the environment, geography and beyond, while also being a valuable resource for professionals and policymakers seeking a clear understanding of this complex yet urgently pressing issue.

*Toward Participatory Research* Deepa Narayan-Parker, 1996

*Equal Access for Students with Disabilities* Lisa M. Meeks, PhD, Neera R. Jain, MS, CRC, Elisa Laird, JD, 2020-11-28 Note to Readers: Publisher does not guarantee quality or access to any included digital components if book is purchased through a third-party seller. A vital resource for ensuring students with disabilities have access to appropriate, legal, and necessary accommodations Now in its second edition, this book on disability inclusion in the health sciences remains the most comprehensive, critically and legally informed guidance available to health science programs. Grounded in the ADA, case law, and OCR determinations, this seminal text delivers information that is translatable to daily practice. The second edition focuses on disability as a welcome form of diversity, with concomitant changes to language and approach that promote disability inclusion. New chapters and updates on topics including technical standards; a new appendix to guide faculty communication; and revised advice throughout, provide faculty, student affairs and disability professionals with the most up-to-date practices. The text delivers updated legal guidance and case references, assistance in benchmarking office policies and practices, new case studies, and a review chapter for teaching and assessing learning. New examples impart the best decision-making practices, describe what to do when things go awry, and discuss how to avoid problems by implementing strong accessibility-focused policies. Written by noted educators and practitioners at prestigious health science schools, this text is backed by years of practice and expertise. It is written in an easy-to-read, engaging manner that makes disability inclusion and disability law accessible to all. New to the Second Edition: Focus on the importance of fully-inclusive education for health care practitioners Real-world informed case studies that demonstrate best practices New and updated advice highlighting recent legal decisions New chapter on technical standards Updated guidance to inform office policies and practices Chapter specific review questions for teaching and self-assessment Expanded discussion of clinical accommodations Updated guides for high stakes exams, including new personal statement prompts Communication guide for faculty Key Features: Addresses all aspects of disability, including disability law, for students in health science settings Delivers information directly applicable to practice Accessibly written by esteemed and experienced practitioners and educators Includes easy-to-follow flowcharts Supports professional development in an affordable format

*Dryland Ecohydrology* Paolo D'Odorico, Amilcare Porporato, 2006-01-09 Ecohydrology emerges as a new field of research aiming at furthering our understanding of the earth system through the study of the interactions between the water cycle and vegetation. By combining the analysis of biotic and abiotic components of terrestrial ecosystems, this volume provides a synthesis of material on arid and semiarid landscapes, which is currently spread in a number of books and journal articles. The focus on water-limited ecosystems is motivated by their high sensitivity to daily, seasonal, and decadal perturbations in water availability, and by the ecologic, climatic, and economic significance of most of the drylands around the world. Conceived as a tool for scientists working in the area of the earth and environmental sciences, this book presents the basic principles of eco-hydrology as well as a broad spectrum of topics and advances in this research field. The chapters collected in this book have been contributed by authors with different expertise, who work in several arid areas around the World. They describe the various interactions among the biological and physical dynamics in dryland ecosystems, starting from basic processes in the soil-vegetation-climate system, to landscape-scale hydrologic and geomorphic processes, ecohydrologic controls on soil nutrient dynamics, and multiscale analyses of disturbances and patterns.

**Building an Inclusive Development Community** Karen Heinicke-Motsch, Susan Sygall, 2004 \* An essential resource for all development agencies seeking to include people with disabilities\* User-friendly tools and practical advice from experienced practitioners There are four hundred million people with disabilities living in developing countries today. All too often they live in poverty and isolation. If development is to truly address the needs of the poor and marginalized, the inclusion of people with disabilities is crucial. Building an Inclusive Development Community is a toolkit for development agencies and others concerned with the participation of people with disabilities at all levels and in all areas of the international development process. The manual is organized into issues and includes helpful worksheets, best practice examples, resources and much more.

**Genome Mapping and Genomics in Animal-Associated Microbes** Vishvanath Nene, Chittaranjan Kole, 2008-11-24 Achievements and progress in genome mapping and the genomics of microbes supersede by far those for higher plants and animals, in part due to their enormous economic implication but also smaller genome size. In the post-genomic era, whole genome sequences of animal-associated microbes are providing clues to depicting the genetic basis of the complex host-pathogen relationships and the evolution of parasitism; and to improving methods of controlling pathogens. This volume focuses on a globally important group of intracellular prokaryotic pathogens which affect livestock animals. These include Brucella, Mycobacterium, Anaplasma and Ehrlichia, as well as the protozoan pathogens Cryptosporidium and Theileria, for which genome sequence data is available. Insights from comparative genomics of the microbes described provide clues to the adaptation involved in host-microbe interactions, as well as resources potentially useful for application in future research and product development.

Cloud Computing Nikos Antonopoulos, Lee Gillam, 2010-07-16 Cloud computing continues to emerge as a subject of substantial industrial and academic interest. Although the meaning and scope of "cloud computing" continues to be debated, the current notion of clouds blurs the distinctions between grid services, web services, and data centers, among other areas. Clouds also bring considerations of lowering the cost for relatively bursty applications to the fore. Cloud Computing: Principles, Systems and Applications is an essential reference/guide that provides thorough and timely examination of the services, interfaces and types of applications that can be executed on cloud-based systems. The book identifies and highlights state-of-the-art techniques and methods for designing cloud systems, presents mechanisms and schemes for linking clouds to economic activities, and offers balanced coverage of all related technologies that collectively contribute towards the realization of cloud computing. With an emphasis on the conceptual and systemic links between cloud computing and other distributed computing approaches, this text also addresses the practical importance of efficiency, scalability, robustness and security as the four cornerstones of quality of service. Topics and features: explores the relationship of cloud computing to other distributed computing paradigms, namely peer-to-peer, grids, high performance computing and web services; presents the principles, techniques, protocols and algorithms that can be adapted from other distributed computing paradigms to the development of successful clouds; includes a Foreword by Professor Mark Baker of the University of Reading, UK; examines current cloud-practical applications and highlights early deployment experiences; elaborates the economic schemes needed for clouds to become viable business models. This book will serve as a comprehensive reference for researchers and students engaged in cloud computing. Professional system architects, technical managers, and IT consultants will also find this unique text a practical guide to the application and delivery of commercial cloud services. Prof. Nick Antonopoulos is Head of the School of Computing, University of Derby, UK. Dr. Lee Gillam is a Lecturer in the Department of Computing at the University of Surrey, UK.

**Trans Studies** Yolanda Martínez-San Miguel, Sarah Tobias, 2016-03-22 Winner of the 2017 Sylvia Rivera Award in Transgender Studies from the Center for LGBTQ Studies (CLAGS) From Caitlyn Jenner to Laverne Cox, transgender people have rapidly gained public visibility, contesting many basic assumptions about what gender and embodiment mean. The vibrant discipline of Trans Studies explores such challenges in depth, building on the insights of queer and feminist theory to raise provocative questions about the relationships among gender, sexuality, and accepted social norms. Trans Studies is an interdisciplinary essay collection, bringing together leading experts in this burgeoning field and offering insights about how transgender activism and scholarship might transform scholarship and public policy. Taking an intersectional approach, this theoretically sophisticated book deeply grounded in real-world concerns bridges the gaps between activism and academia by offering examples of cutting-edge activism, research, and pedagogy.

**Disrupting Mobility** Gereon Meyer, Susan Shaheen, 2017-01-04 This book explores the opportunities and challenges of the sharing economy and innovative transportation technologies with regard to urban mobility. Written by government experts, social scientists, technologists and city planners from North America, Europe and Australia, the papers in this book address the impacts of demographic, societal and economic trends and the fundamental changes arising from the increasing automation and connectivity of vehicles, smart communication technologies, multimodal transit services, and urban design. The book is based on the Disrupting Mobility Summit held in Cambridge, MA (USA) in November 2015, organized by the City Science Initiative at MIT Media Lab, the Transportation Sustainability Research Center at the University of California at Berkeley, the LSE Cities at the London School of Economics and Politics and the Innovation Center for Mobility and Societal Change in Berlin.

**Leadership of Chinese Private Enterprises** Anne S. Tsui,Yingying Zhang,Xiao-Ping Chen,2016-09-11 This original book presents in-depth research into thirteen successful Chinese private enterprises through interviews with their founder-entrepreneurs. While Chinese economic growth has focused primarily on governmental policies and institutional factors, Leadership of Chinese Private Enterprises proposes that the success of these firms was primarily due to the ‘visible hands’ of these entrepreneurs. The authors present insights into the managerial realities of four separate industries- Financial and insurance, IT and e-commerce, construction and real estate, and consumer goods. Through a critical evaluation of interviews, this book identifies the managerial recipe for entrepreneurial success in competitive and inhospitable environments and offers a model of private firm leadership and leadership principles that guide their strategies and relationships.
