Islamic Law Hunt Janin, André Kahlmeyer, 2015-01-09 The sharia is a set of traditional laws that define a Muslim's obligations to God and his fellow human beings. Westerners often misunderstand the nature of the sharia, born as it is of a complicated legal and academic tradition that may not always seem relevant to today's world. Written for those unfamiliar with Islam, this volume provides an accurate and objective assessment of the sharia's achievements, shortcomings and future prospects. It explores the fundamentals of Islam and traditional sharia laws. In addition, the sharia is discussed with respect to Ottoman law, puritanism and jihad. The sharia's relevance to today's world events is also explored. Among items provided in appendices are a commentary on a Western translation of the concept of jihad and an analysis of the sharia in 29 selected countries.

Interpreting U.S. Public Diplomacy Speeches Erin Boggs, 2015-04-17 Interpreting U.S. Public Diplomacy Speeches is an attempt to bring a methodical consideration of social context into the interpreter's approach to analyzing discourse. In this book, speeches delivered by U.S. diplomats to foreign audiences are described using elements of Dell Hymes' SPEAKING model. This will help interpreters to shape their interpretation of this text type and supply a flexible means of better understanding discourse in any culture. This book is intended as a resource for non-U.S. interpreters who want to know more about interpreting for U.S. government officials or other U.S. American people. It could also interest anyone curious about how cultural context can affect the work of interpreters.

International Security and the United States Paul Bellamy, Karl DeRouen Jr., 2007-12-30 Shaped by often very dramatic events, international security and the international system have changed significantly in recent years. The conclusion of the Cold War, the emergence of new political systems, the growth of significant threats such as terrorism, and the development of new security doctrines have driven global transformation. These volumes provide detailed information on countries from every geographic region and continent on the globe, evaluating their relationship with the United States and measuring the potential security threats posed by each. The contributors consider factors such as geography and history; the political systems of each state; their human rights records; the ability to maintain law and order and provide security within their own borders; the impact of current administrations, rulers, or regimes on a nation's foreign policy; and the regional factors that often dictate local politics, in order to make their assessments. All of the entries in this set follow a standardized outline and present a concise, but detailed assessment of each country. Each entry begins with a discussion of geography through which the contributors identify the state's natural resources, environmental issues, and the extent of its territorial jurisdiction. The focus then shifts to social and political organizations. Populations are broken down by not only numbers, but by ethnic and religious affiliations, access to health care, education, housing, and income. All of those aspects are often a reflection of the system of government in place. Like the United States, those governments are comprised of different parties or leaders with various interests. The contributors assess those entities and interests within each country. They measure the ways in which factors of religion, nationalism, and globalism impact and shape not only domestic policies but also foreign policy, and, ultimately, the country's relationship to the United States. Other areas, such as military organizations and activities, records on human rights and justice (recognition of and adherence to international conventions), and national attitudes towards security are also considered. Every entry also includes an assessment of current and potential security issues and an analysis of current terrorist threats that may already be in place or that are beginning to develop in various nations. Each entry concludes with a summary of current relationships with the United States. Those relationships are defined by the identification and brief analysis of formal trade, aid, or military treaties in place between the United States and other nations, the general attitude of a nation's citizenry and its government towards the U.S., and, finally, identifying any social and cultural links between nations and the U.S. (migration patterns, language, economies). Finally, possible changes and trends that will impact security issues are identified by the contributors. Taken

in their entirety, these encyclopedias contain a wealth of information in a concise format that will serve as a valuable reference guide not only for specialists, but general readers as well.

Gale Directory of Publications and Broadcast Media ,2006 Identifies specific print and broadcast sources of news and advertising for trade, business, labor, and professionals. Mass Media, Mass Propaganda Anthony DiMaggio,2008-04-28 Mass Media, Mass Propaganda analyzes a wide range of issues, domestic and international, concerning American and global news coverage of the U.S. 'War on Terror.' Topics reviewed include: media coverage of the invasion and occupation of Iraq, the proliferation of weapons of mass destruction, Iraqi civil war and resistance to occupation, September 11th and 'Operation Enduring Freedom' in Afghanistan, human rights violations in Iraqm domestic anti-way dissent and censorship, and potential future targets in the 'War on Terror.' This work approaches the study of media through a political economy analysis, examining the ways in which the American corporate media works to reinforce official views and propaganda, and the ways in which it challenges official pro-war platforms. A comparative approach is taken in contrasting the American mass media with other media institutions from the Progressive-Left American press, the British and Australian press, and Arab electronic media. Major models analyzed and evaluated throughout this work include the 'Propaganda Model,' developed by Noam Chomsky and Edward Herman, and the 'Indexing Model,' elaborated upon by scholars such as W. Lance Bennett, Steven Livingston, and Jonathan Mermin.

Terrorism in the Twenty-First Century Cynthia C. Combs,2017-11-28 Terrorism in the Twenty-First Century helps readers understand terrorism, responses to it, and current trends that affect the future of this phenomenon. Putting terrorism into historical perspective and analyzing it as a form of political violence, this text presents the most essential concepts, the latest data, and numerous case studies to promote effective analysis of terrorist acts. Terrorism in the Twenty-First Century objectively breaks down the who-what-why-how of terrorism, giving readers a way both to understand patterns of behavior and to more critically evaluate forthcoming patterns. New to the 8th Edition Provides a more intense exploration of religion as a primary cause of contemporary terrorism. Focuses on the role of social media in recruitment and propaganda. Examines the radicalization and recruitment by ISIS to fighting and to domestic young people to carry out attacks at home. Explores the growing threat - and reality - of cyber attacks. Updates the material on the networking of terrorism today.

Responsible Development Omar Noman,2010-04-05 Until the dramatic economic collapse of 1997, East Asia was the symbol of a successful market-led development strategy for Western governments, aid agencies and academics, despite underlying concerns about a lack of rights and freedoms. The crisis changed Asia and the world; currency depreciations, personal and state indebtedness, mass unemployment and rioting brought the paternalistic capitalist phase to an end in Asia. The decade following the economic crisis has seen a swift response, with the major restructuring of Asian economies, improved corporate governance, banks recapitalized, more

attention paid to the environment and foreign exchange reserves restored so the IMF became redundant in Asia. Dividing the countries that emerged from the crisis into three categories – the Insecure Rich, the New Aspirants for Prosperity and the Danger Zone – Noman analyses the complex Asian recovery and future challenges within the framework of Responsible Development, an agenda for Asia that emphasizes the simultaneous challenge of building sustainable democracies, a viable environment and an equitable economy. Covering the many related issues that pose a threat to Asian economic stability – climate change, religious fascism, inequality and hunger – this book will have particular relevance in the areas of development studies, economics, international politics and Asian studies.

From Sputnik to Minerva Sean Kay, 2009 Rather than focusing primarily on traditional professional military educ., this analysis examines how educ. has been used as a tool of American power. Four major moments of transformation in the international system are surveyed to illustrate a link between ‘strategic educational capacity,’ defined as the application of attained knowledge and skills, and national power. An important educational capacity is emerging in the new Minerva program in the DoD and other transformational educational concepts with security applications. Educ. is gaining an increasing interest among American decisionmakers as a strategic component of American power and an essential asset for successful military operations in the new global security environment.
