Commodities are basic goods used in commerce and are most often used as inputs in the production of other semi-finished or finished materials. They are very important products in our lives today and constitute non-negligible sources of income for many countries. This book serves as a guide to the marketing of these goods and provides scholars and commodity market participants with useful concepts, tools and guidelines to better organize and operate commodities exchanges.

Islamic Law Hunt Janin, André

Kahlmeyer, 2015-01-09 The sharia is a set of traditional laws that define a Muslim's obligations to God and his fellow human beings. Westerners often misunderstand the nature of the sharia, born as it is of a complicated legal and academic tradition that may not always seem relevant to today's world. Written for those unfamiliar with Islam, this volume provides an accurate and objective assessment of the sharia's achievements, shortcomings and future prospects. It explores the fundamentals of Islam and traditional sharia laws. In addition, the sharia is discussed with respect to Ottoman law, puritanism and jihad. The sharia's relevance to today's world events is also explored. Among items provided in appendices are a commentary on a Western translation of the concept of jihad and an analysis of the sharia in 29 selected countries.

Mass Media, Mass Propaganda Anthony

DiMaggio, 2008-04-28 Mass Media, Mass Propaganda analyzes a wide range of issues, domestic and

international, concerning American and global news coverage of the U.S. 'War on Terror.' Topics reviewed include: media coverage of the invasion and occupation of Iraq, the proliferation of weapons of mass destruction, Iraqi civil war and resistance to occupation, September 11th and 'Operation Enduring Freedom' in Afghanistan, human rights violations in Iraq, domestic anti-war dissent and censorship, and potential future targets in the 'War on Terror.' This work approaches the study of media through a political economy analysis, examining the ways in which the American corporate media works to reinforce official views and propaganda, and the ways in which it challenges official pro-war platforms. A comparative approach is taken in contrasting the American mass media with other media institutions from the Progressive-Left American press, the British and Australian press, and Arab electronic media. Major models analyzed and evaluated throughout this work include the 'Propaganda Model,' developed by Noam Chomsky and Edward Herman, and the 'Indexing Model,' elaborated upon by scholars such as W. Lance Bennett, Steven Livingston, and Jonathan Mermin.

Understanding War in Afghanistan Joseph J. Collins,2011 This text aims to provide military leaders, civil servants, diplomats, and students with the intellectual basis that they need to begin to prepare for further study of or an assignment in Afghanistan.

Food from Dryland Gardens David A. Cleveland,Daniela Soleri,1991

U.S. International Trade in Goods and Services , Transport Efficiency and Safety in China Pengjun Zhao,Lianguen Zeng,2023-06-08 This book is the first comprehensive analysis of transport efficiency in China. It presents a series of rigorous empirical analysis for the operation and environmental efficiencies of major transport sectors, including highway, railway, civil aviation, and waterway. It also evaluates transport safety of China. The book innovatively employs a DEA model based on Epsilon measures (EBM) to evaluate transport efficiency and an EBM

DEA model with undesirable outputs to calculate transport environmental efficiency. The factors of transport efficiency are quantitatively studied, including economic growth, social transition, and technology changes. Also, China's policies aimed at improving transportation efficiency are evaluated. The theoretical analyses and discussions would enhance our existing knowledge of the changes and determinants of transport system's efficiency in a context of rapid urbanization, industrialization, and marketization in China. The findings of the existing policy evaluation would bring fresh evidences for transport policy performances to both scholars and politicians. In particular, it shows policymakers the experiences or lessons of how to create an efficient transport system in order to save energy use, reduce GHGs emissions, and improve social security. This book is of great interest to scholars interested in sustainable transport, regional planning and development, environmental policy and is relevant to China and other developing countries.

Literary Research and the British Eighteenth Century Peggy Keeran, Jennifer Bowers, 2013-02-21 The 18th century in Britain was a transition period for literature. For the literary scholar, these changes mean that different search strategies may be required to conduct research into primary and secondary source material across the era. This book addresses the unique challenges faced by the scholars of the period, and explores a multitude of primary and secondary resources. In addition, each chapter addresses the research methods and tools best used to extract relevant information and compares and evaluates sources, making this book an invaluable guide to any literary scholar and student of the British 18th century.

From Sputnik to Minerva Sean Kay, 2009 Rather than focusing primarily on traditional professional military educ., this analysis examines how educ. has been used as a tool of American power. Four major moments of transformation in the international system are surveyed to illustrate a link between ¿strategic

educational capacity,² defined as the application of attained knowledge and skills, and national power. An important educational capacity is emerging in the new Minerva program in the DoD and other transformational educational concepts with security applications. Educ. is gaining an increasing interest among American decisionmakers as a strategic component of American power and an essential asset for successful military operations in the new global security environment.
