Universal Access in Human-Computer Interaction. Access to Learning, Health and Well-Being Margherita Antona,Constantine Stephanidis,2015-07-18 The four LNCS volume set 9175-9178 constitutes the refereed proceedings of the 9th International Conference on Learning and Collaboration Technologies, UAHCI 2015, held as part of the 17th International Conference on Human-Computer Interaction, HCII 2015, in Los Angeles, CA, USA in August 2015, jointly with 15 other thematically similar conferences. The total of 1462 papers and 246 posters presented at the HCII 2015 conferences were carefully reviewed and selected from 4843 submissions. These papers of the four volume set address the following major topics: LNCS 9175, Universal Access in Human-Computer Interaction: Access to today's technologies (Part I), addressing the following major topics: LNCS 9175: Design and evaluation methods and tools for universal access, universal access to the web, universal access to mobile interaction, universal access to information, communication and media. LNCS 9176: Gesture-based interaction, touch-based and haptic Interaction, visual and multisensory experience, sign language technologies and smart and assistive environments LNCS 9177: Universal Access to Education, universal access to health applications and services, games for learning and therapy, and cognitive disabilities and cognitive support and LNCS 9178: Universal access to culture, orientation, navigation and driving, accessible security and voting, universal access to the built environment and ergonomics and universal access.

Everything Connects: How to Transform and Lead in the Age of Creativity, Innovation, and Sustainability Faisal Hoque,Drake Baer,2014-02-21 Leadership. Creativity. Innovation. When you put it all together, EVERYTHING CONNECTS. The constant cascade of new technologies and social changes is creating a more empowered population. Workforces are increasingly

dispersed, demanding of self-expression, and quite possibly disengaged. Within this topsy-turvy context, leaders must spark creativity, drive innovation, and ensure sustainability. What are the remedies? The newest problems of the world find solutions in the oldest and time-less practices such as mindfulness, authenticity, and perseverance—because Everything Connects. Everything Connects is a kaleidoscopic view of the way humans—by being able to think out of the box—have been able to achieve greatness for themselves, their organizations, and the world at large. It is your step-by-step guide for working with yourself and others—for meaningful success. Using real-life practical experiences, serial entrepreneur and thought leader Faisal Hoque teams up with journalist Drake Baer to provide a personal and professional playbook that shows how to: Holistically connect the "when" and "what" with who you are Inspire and lead inside and outside of your organization Generate ideas, grounded decisions, and long-term value Part philosophy, part business, and part history, Everything Connects offers the wisdom of 2,500-year-old Eastern philosophies and the interconnected insights of Leonardo da Vinci. Couple that with Fortune 100 corporate cross pollination for creativity and startup thinking for how to adapt with ease, and you'll quickly discover that Everything Connects. This isn't just a quick fix for your next financial quarter; this is how you succeed in the long run. It is a systemization of the best practices of spirituality and entrepreneurship—loaded with knowledge, humor, and humanity.

(Circular E), Employer's Tax Guide - Publication 15 (For Use in 2021) Internal Revenue Service,2021-03-04 Employer's Tax Guide (Circular E) - The Families First Coronavirus Response Act (FFCRA), enacted on March 18, 2020, and amended by the COVID-related Tax Relief Act of 2020, provides certain employers with tax credits that reimburse them for the cost of providing paid sick and family leave wages to their employees for leave related to COVID-19. Qualified sick and family leave wages and the

related credits for qualified sick and family leave wages are only reported on employment tax returns with respect to wages paid for leave taken in quarters beginning after March 31, 2020, and before April 1, 2021, unless extended by future legislation. If you paid qualified sick and family leave wages in 2021 for 2020 leave, you will claim the credit on your 2021 employment tax return. Under the FFCRA, certain employers with fewer than 500 employees provide paid sick and fam-ily leave to employees unable to work or telework. The FFCRA required such employers to provide leave to such employees after March 31, 2020, and before January 1, 2021. Publication 15 (For use in 2021)

The First Universities André Vauchez,Olaf Pedersen,1997 This is a general study of the development of higher education in Europe from antiquity until the end of the Middle Ages, set against a background of the social and political history of the period. It shows how the slender traditions of ancient learning, kept alive in the monastic and cathedral schools, was enriched by an enormous influx of knowledge from the Islamic world and how in consequence the schools developed into universities. These early institutions are examined from a variety of points of view, as institutions, as places where ideas spread and as points of interaction with local and national authority. Special attention is paid to early intellectual history and to the scientific disciplines and to the everyday life of the students and their teachers. The book is intended as a broad introduction to the subject for students of the history of education, but it will also attract general readers with only a slight knowledge of the subject.

2021 International Conference of Optical Imaging and Measurement (ICOIM) IEEE Staff,2021-08-27 Optical imaging and measurement are closely related and have a wide range of applications such as microscope, telescope, sensor, etc Usually, imaging is the basis of measurement, and measurement is a rigorous consideration of imaging results in a quantitative way This conference covers a broad field of advanced optical imaging

and precision measurement technologies ranging from micro to macro, from static to dynamic, from single physical quantity to multiple Optical methods continuously have a profound impact on the new development of science and technology, such as the milestone breakthroughs, STED optical nanoscope (Nobel Prize in Chemistry 2014) and LIGO s interferometer (Nobel Prize in Physics 2017) This conference is looking forward to building a bridge among optical scientists, engineers and entrepreneurs

The Poetry of Religious Sorrow in Early Modern England Gary Kuchar,2011-03-03 In early modern England, religious sorrow was seen as a form of spiritual dialogue between the soul and God, expressing how divine grace operates at the level of human emotion. Through close readings of both Protestant and Catholic poetry, Kuchar explains how the discourses of 'devout melancholy' helped generate some of the most engaging religious verse of the period. From Robert Southwell to John Milton, from Aemilia Lanyer to John Donne, the language of 'holy mourning' informed how poets represented the most intimate and enigmatic aspects of faith as lived experience. In turn, 'holy mourning' served as a way of registering some of the most pressing theological issues of the day. By tracing poetic representations of religious sorrow from Crashaw's devotional verse to Shakespeare's weeping kings, Kuchar expands our understanding of the interconnections between poetry, theology and emotion in post-Reformation England.

The Routledge International Handbook of Higher Education Malcolm Tight,Ka Ho Mok,Jeroen Huisman,Christopher Morphew,2009-06-03 This volume is a

detailed and up-to-date reference work providing an authoritative overview of the main issues in higher education around the world today. Information Optics and Photonics Thierry Fournel,Bahram Javidi,2010-11-01 This book will address the advances, applications, research results, and emerging areas of optics, photonics, computational approaches, nano-photonics, bio-photonics, with applications in information systems. The objectives are to bring together novel approaches, analysis, models, and technologies that enhance sensing, measurement, processing, interpretation, and visualization of information. The book will concentrate on new approaches to information systems, including integration of computational algorithms, bio-inspired models, photonics technologies, information security, bio-photonics, and nano-photonics. Applications include bio-photonics, digitally enhanced sensing and imaging systems, multi-dimensional optical imaging and image processing, bio-inspired imaging, 3D visualization, 3D displays, imaging on nano-scale, quantum optics, super resolution imaging, photonics for biological applications, microscopy, information optics, and holographic information systems.

Green Extraction of Natural Products Farid Chemat,Jochen Strube,2016-03-11 Extraction processes are essential steps in numerous industrial applications from perfume over pharmaceutical to fine chemical industry. Nowadays, there are three key aspects in industrial extraction processes: economy and quality, as well as environmental considerations. This book presents a complete picture of current knowledge on green extraction in terms of innovative processes, original methods, alternative solvents and safe products, and provides the necessary theoretical background as well as industrial application

examples and environmental impacts. Each chapter is written by experts in the field and the strong focus on green chemistry throughout the book makes this book a unique reference source. This book is intended to be a first step towards a future cooperation in a new extraction of natural products, built to improve both fundamental and green parameters of the techniques and to increase the amount of extracts obtained from renewable resources with a minimum consumption of energy and solvents, and the maximum safety for operators and the environment.
