We Bled Together Dominic Price, 2017-11-10 There is no crime in detecting and destroying in wartime the spy and informer...I have paid them back in their own coin. - Michael Collins Michael Collins' development of a formidable intelligence network transformed, for the first time in history, the military fortunes of the Irish against the British. The Dublin Brigade of the IRA was pivotal to this defining strategy. In 1919, Collins formed members of the brigade into two Special Duties Units. They eventually joined to form his 'Squad' of assassins tasked with immobilising British intelligence. Eyewitness testimonies and war diaries lend immediacy and insight to this thrilling account of the daring espionage and killings carried out by both sides on Dublin's streets. Dominic Price reveals how

the IRA developed Improvised Explosive Devices, and experimented with chemical weapons in the form of poison gas and infecting water supplies. When the Civil War erupted, the devotion of a significant cohort of the Dublin Brigade to Collins, forged during the darkest of days, was unbreakable. Many of them, identified here for the first time, formed the backbone of the Free State in key intelligence and military roles. While not shying away from the revulsions of the Civil War, neither does Price abandon the brigade's story at its conclusion. As well as revealing the disenchantment of some, who took part in the 1924 army mutiny, he exposes the personal horrors that awaited in peacetime, when psychological trauma was common. This is the stirring and poignant story of the human endeavour and suffering at the core of the Dublin Brigade's fight for Irish freedom.

The Yugas Joseph Selbie, David Steinmetz, 2011-08-16 Millions are wondering what the future holds for mankind, and if we are soon due for a world-changing global shift. Paramhansa Yogananda (author of the classic *Autobiography of a Yogi*) and his teacher, Sri Yukteswar, offered key insights into this subject. They presented a fascinating explanation of the rising and falling eras that our planet cycles through every 24,000 years. According to their teachings, we have recently passed through the low ebb in that cycle and are moving to a higher age—an Energy Age that will revolutionize the world. Over one hundred years ago Yukteswar predicted that we would live in a time of extraordinary change, and that much that we believe to be fixed and true—our entire way of looking at the world — would be

transformed and uplifted. In *The Yugas*, authors Joseph Selbie and David Steinmetz present substantial and intriguing evidence from the findings of historians and scientists that demonstrate the truth of Yukteswar's and Yogananda's revelations.
