Films that Work Vinzenz Hediger,Patrick Vonderau,2009 Industriële films worden gezien als een apart filmgenre van de twintigste eeuw. Ze werden geproduceerd en gesponsord door de overheid en grote bedrijven en moesten vooral aan de wensen van de sponsors voldoen, en niet zo zeer aan die van de filmmakers. In de hoogtijdagen werkten er duizenden mensen aan deze industriële films. Zo zijn er vakbladen en filmfestivals ontstaan door samenwerking met grote bedrijven als Shell en AT & T. Daarnaast hebben belangrijke regisseurs, zoals Buster Keaton, John Grierson en Alain Resnais, aan deze films meegewerkt. Toch lijkt de industriële film geen spoor te hebben achtergelaten in het filmische culturele discours. Films that Work is het eerste boek waarin de industriële film en zijn opmerkelijke geschiedenis worden onderzocht.

China's Outbound Tourism Wolfgang Arlt,2006-09-27 The People's Republic of China has changed from a country which actively discouraged

tourism into one of the major source markets for the international industry; the 35 million Chinese travelling across the border in 2005 are merely the tip of the iceberg. China's Outbound Tourism is the first book on this major development and has been written using a multitude of sources from China and around the world. The topic is approached from many angles, using methods from the fields of economics, political sciences, sociology and cross-cultural studies. The book explains the economic and social background of the surge in tourism and the changes in policy in the country since 1949, when it moved from prevention through controlled development to encouragement of outbound travels. Throughout the book, facts and figures are given for the global development as well as in-depth information about China's key destinations. The growing importance of tourists from China is however not just a question of quantity; the text explains the features which distinguish their travel motivations and behaviours from 'western' and Japanese tourists, and the consequences for product adaptation and marketing methods for destinations interested in attracting and satisfying Chinese tourists. Arlt's groundbreaking book cannot be ignored by professionals, academics and students of tourism and leisure; it offers fresh insight into the topic and indicates some of the future lines of development in this area.

International Electronic Evidence Stephen Mason,2008 An increasing number of civil and criminal proceedings involve the use of digital evidence across jurisdictional boundaries. Digital evidence now affects every aspect of law, including contract, employment, family, crime, intellectual property, and land law. In effect, no area of law is excluded, and digital evidence has become of greater importance now that the Internet has become ubiquitous. It is increasingly apparent that criminals and terrorists target the electronic environment in order to steal, to carry out extortion, and to abuse children across jurisdictions. Additionally, both public and commercial organizations now rely on the digital environment to such an extent that it has become critical to business and, perhaps, the survival of the state. International Electronic Evidence provides an outline of the substantive law of evidence, admissibility, disclosure, and procedural requirements in respect of digital evidence for the jurisdictions covered, which include: Argentina, Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Egypt, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Italy, Japan, Latvia, Lithuania, Luxembourg, Malta, Mexico, Netherlands, Norway, Poland, Portugal, Romania, Russia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Thailand, and Turkey.
