Blindsight Peter Watts, 2006-10-03 Hugo and Shirley Jackson award-winning Peter Watts stands on the cutting edge of hard SF with his acclaimed novel, *Blindsight* Two months since the stars fell... Two months of silence, while a world held its breath. Now some half-derelict space probe, sparking fitfully past Neptune's orbit, hears a whisper from the edge of the solar system: a faint signal sweeping the cosmos like a lighthouse beam. Whatever's out there isn't talking to us. It's talking to some distant star, perhaps. Or perhaps to something closer, something en route. So who do you send to force introductions with unknown and unknowable alien intellect that doesn't wish to be met? You send a linguist with multiple personalities, her brain surgically partitioned into separate, sentient processing cores. You send a biologist so radically interfaced with machinery that he sees x-rays and tastes ultrasound. You send a pacifist warrior in the faint hope she won't be needed. You send a monster to command them all, an extinct hominid predator once called vampire, recalled from the grave with the voodoo of recombinant genetics and the blood of sociopaths. And you send a synthesist—an informational topologist with half his mind gone—as an interface between here and there. Pray they can be trusted with the fate of a world. They may be more alien than the thing they've been sent to find. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Heart of Darkness Joseph Conrad, 2023-11-21 *Heart of Darkness* is often considered the world's best short novel. The book serves as a bridge between the 19th century and modernism, an adventure tale revolving around the ambiguity of themes such as truth, morality, and evil. Joseph Conrad witnessed the European exploitation of the Congo with his own eyes. He once sailed up the Congo River himself to locate a countryman at a trading station deep within the country – even though this man wasn't named Kurtz. The goal and enigma of the journey have become synonymous with this name, one of the most unforgettable fictional characters of our time. JOSEPH CONRAD [1857–1924] was born in Ukraine to Polish parents, went to sea at the age of seventeen, and ended his career as a captain in the English merchant navy. His most famous work is the novella *Heart of Darkness* [1899], adapted into a film by Francis Ford Coppola in 1979 as *Apocalypse Now*.

Anthem Ayn Rand, 2021-07-07 About this Edition This 2021-2022 Digital Student Edition of Ayn Rand's *Anthem* was created for teachers and students receiving free novels from the Ayn Rand Institute, and includes a historic Q&A

with Ayn Rand that cannot be found in any other edition of Anthem. In this Q&A from 1979, Rand responds to questions about Anthem sent to her by a high school classroom. About Anthem Anthem is Ayn Rand's "hymn to man's ego." It is the story of one man's rebellion against a totalitarian, collectivist society. Equality 7-2521 is a young man who yearns to understand "the Science of Things." But he lives in a bleak, dystopian future where independent thought is a crime and where science and technology have regressed to primitive levels. All expressions of individualism have been suppressed in the world of Anthem; personal possessions are nonexistent, individual preferences are condemned as sinful and romantic love is forbidden. Obedience to the collective is so deeply ingrained that the very word "I" has been erased from the language. In pursuit of his quest for knowledge, Equality 7-2521 struggles to answer the questions that burn within him – questions that ultimately lead him to uncover the mystery behind his society's downfall and to find the key to a future of freedom and progress. Anthem anticipates the theme of Rand's first best seller, The Fountainhead, which she stated as "individualism versus collectivism, not in politics, but in man's soul."

Quantities, Units and Symbols in Physical Chemistry E Richard Cohen,Tom Cvitas,Jeremy G Frey,Bertil Holström,Kozo Kuchitsu,Roberto Marquardt,Ian Mills,Franco Pavese,Martin Quack,Jürgen Stohner,Herbert L Strauss,Michio Takami,Anders J Thor,2007-10-31 The first IUPAC Manual of Symbols and Terminology for Physicochemical Quantities and Units (the Green Book) of which this is the direct successor, was published in 1969, with the object of 'securing clarity and precision, and wider agreement in the use of symbols, by chemists in different countries, among physicists, chemists and engineers, and by editors of scientific journals'. Subsequent revisions have taken account of many developments in the field, culminating in the major extension and revision represented by the 1988 edition under the simplified title Quantities, Units and Symbols in Physical Chemistry. This 2007, Third Edition, is a further revision of the material which reflects the experience of the contributors with the previous editions. The book has been systematically brought up to date and new sections have been added. It strives to improve the exchange of scientific information among the readers in different disciplines and across different nations. In a rapidly expanding volume of scientific literature where each discipline has a tendency to retreat into its own jargon this book attempts to provide a readable compilation of

widely used terms and symbols from many sources together with brief understandable definitions. This is the definitive guide for scientists and organizations working across a multitude of disciplines requiring internationally approved nomenclature.
