Assessment of Treatment Plant Performance and Water Quality Data: A Guide for Students, Researchers and Practitioners Marcos von Sperling ,Matthew E. Verbyla ,Silvia M.A.C Oliveira,2020-01-15 This book presents the basic principles for evaluating water quality and treatment plant performance in a clear, innovative and didactic way, using a combined approach that involves the interpretation of monitoring data associated with (i) the basic processes that take place in water bodies and in water and wastewater treatment plants and (ii) data management and statistical calculations to allow a deep interpretation of the data. This book is problem-oriented and works from practice to theory, covering most of the information you will need, such as (a) obtaining flow data and working with the concept of loading, (b) organizing sampling programmes and measurements, (c) connecting laboratory analysis to data management, (e) using numerical and graphical methods for describing monitoring data (descriptive statistics), (f) understanding and reporting removal efficiencies, (g) recognizing symmetry and asymmetry in monitoring data (normal and log-normal distributions), (h) evaluating compliance with targets and regulatory standards for effluents and water bodies, (i) making comparisons with the monitoring data (tests of hypothesis), (j) understanding the relationship between monitoring variables (correlation and regression analysis), (k) making water and mass balances, (l) understanding the different loading rates applied to treatment units, (m) learning the principles of reaction kinetics and reactor hydraulics and (n) performing calibration and verification of models. The major concepts are illustrated by 92 fully worked-out examples, which are supported by 75 freely-downloadable Excel spreadsheets. Each chapter concludes with a checklist for your report. If you are a student, researcher or practitioner planning to use or already using treatment plant and water quality monitoring data, then this book is for you! 75 Excel spreadsheets are available to download.

Security for Linux on System z Lydia Parziale,Jonathan Barney,Vic Cross,William Johnston,Eduardo Kienetz,Eric Marins,Nilesh Patel,Sri Venkatesen,IBM Redbooks,2013-01-10 No IT server platform is 100% secure and useful at the same time. If your server is installed in a secure vault, three floors underground in a double-locked room, not connected to any network and switched off, one would say it was reasonably secure, but it would be a stretch to call it useful. This IBM® Redbooks® publication is about switching on the power to your Linux® on System z® server, connecting it to the data and to the network, and letting users have access to this formidable resource space in a secure, controlled, and auditable fashion to make sure the System z server and Linux are useful to your business. As the quotation illustrates, the book is also about ensuring that, before you start designing a security solution, you understand what the solution has to achieve. The base for a secure system is tightly related to the way the architecture and virtualization has been implemented on IBM System z. Since its inception 45 years ago, the architecture has been continuously developed to meet the increasing demands for a more secure and stable platform. This book is intended for system engineers and security administrators who want to customize a Linux on System z environment to meet strict security, audit, and control regulations. For additional information, there is a tech note that describes the best practices for securing your network. It can be found at:

Getting started with z/OS Container Extensions and Docker Lydia Parziale,Zach Burns,Marco Egli,Redelf Janssen,Volkmar Langer,Subhajit Maitra,Eric Marins,Edward McCarthy,Jim Newell,IBM Redbooks,2021-07-12 IBM® z/OS® Container Extensions (IBM zCX) is a new feature of the next version of the IBM z/OS Operating System (z/OS V2.4). It makes it possible to run Linux on IBM Z® applications that are packaged as Docker container images on z/OS. Application developers can develop, and data centers can operate, popular open source packages, Linux applications, IBM software, and third-party software together with z/OS applications and data. This IBM Redbooks® publication helps you to understand the concepts, business perspectives and reference architecture for installing, tailoring, and configuring zCX in your own environment.

Differential Equations For Dummies Steven Holzner,2008-06-03 The fun and easy way to understand and solve complex equations Many of the fundamental laws of physics, chemistry, biology, and economics can be formulated as differential equations. This plain-English guide explores the many applications of this mathematical tool and shows how differential equations can help us understand the world around us. Differential Equations For Dummies is the perfect companion for a college differential equations course and is an ideal supplemental resource for other calculus classes as well as science and engineering courses. It offers step-by-step techniques, practical tips, numerous exercises, and clear, concise examples to help readers improve their differential equation-solving skills and boost their test scores.

Slow Violence and the Environmentalism of the Poor Rob Nixon,2011-06-01 The violence wrought by climate change, toxic drift, deforestation, oil spills, and the environmental aftermath of war takes place gradually and often invisibly. Using the innovative concept of slow violence to describe these threats, Rob Nixon focuses on the inattention we have paid to the attritional lethality of many environmental crises, in contrast with the sensational, spectacle-driven messaging that impels public activism today. Slow violence, because it is so readily ignored by a hard-charging capitalism, exacerbates the vulnerability of ecosystems and of people who are poor, disempowered, and often involuntarily displaced, while fueling social conflicts that arise from desperation as life-sustaining conditions erode. In a book of extraordinary scope, Nixon examines a cluster of writer-activists affiliated with the environmentalism of the poor in the global South. By approaching environmental justice literature from this transnational perspective, he exposes the limitations of the national and local frames that dominate environmental writing. And by skillfully illuminating the strategies these writer-activists deploy to give dramatic visibility to environmental emergencies, Nixon invites his readers to engage with some of the most pressing challenges of our time.

So Much More Than the ABCs MOLLY F.. SCHICKEDANZ COLLINS (JUDITH A.),Judith A Schickedanz,2024-10 The foundation for success in learning to read and write begins in infancy. As early childhood professionals, we have both the opportunity and the privilege to shape the progress young children make in acquiring the literacy skills, oral language skills, and background knowledge vital to their later success in learning to read and write. By engaging infants, toddlers, and preschoolers in experiences that foster oral language and content knowledge, literacy skills, and cognitive ability, we build a foundation for children's later academic success. Promoting children's desire to read and write is as important as helping children develop the necessary understandings and skills essential for learning how to read and write. Without motivation, children will read and write relatively little and only what and when they must. This book addresses four main points: What children need to learn in these early years The strategies that teachers can use to help children acquire these foundations The features of emergent literacy and language understandings and skills How to design the physical environment in early childhood classrooms to support language and literacy learning This revision updates information, cites new research, and includes new figures. The newest edition of this bestselling book will help early childhood professionals and families support young children in acquiring the understandings, knowledge, and skills needed for later success in learning to read and write.

The Ethnography of Vietnam's Central Highlanders Oscar Salemink,2019-10-18 This book looks at ethnographic discourses concerning the indigenous population of Vietnam's Central Highlands during periods of christianization, colonization, war and socialist transformation, and analyses these in their relation to

tribal, ethnic, territorial, governmental and gendered discourses. Saleminck's book is a timely contribution to anthropological knowledge, as the ethnic minorities in Vietnam have (again) been the object of fierce academic debate. This is a historically grounded post-colonial critique relevant to theories of ethnicity and the history of anthropology, and will be of interest to graduate students of anthropology and cultural studies, as well as Vietnam studies.

Pihkal Alexander Theodore Shulgin,Ann Shulgin,1991 PIHKAL (Phenethylamines I Have Known And Loved) is a unique book written by renowned psychopharmacologist Alexander Shulgin and his wife Ann Shulgin. This book gives details of their research and investigations into the use of psychedelic drugs for the study of the human mind, and is also a love story. The second half of the book describes in detail a wealth of phenethylamines, their physical properties, dosages used, duration of effects observed, and commentary on effects.

IBM z/OS Container Extensions (zCX) Use Cases Lydia Parziale,Marco Egli,Maike Havemann,Subhajit Maitra,Eric Marins,Edward McCarthy,IBM Redbooks,2021-07-12 Is it time for you to modernize your IBM® z/OS® applications to allow for access to an entire system of open source and Linux on IBM Z® workloads? Is co-location of these workloads on the z/OS platform with no porting requirements of value to you? Your open source or Linux on IBM Z software can benefit from being co-located and managed inside a z/OS environment; leveraging z/OS quality of service for optimized business continuity. Your software can be integrated with and can help complement existing z/OS workloads and environments. If your software can communicate with z/OS and external components by using TCP/IP, now is the time examine how IBM z/OS Container Extensions (IBM zCX) makes it possible to integrate Linux on Z applications with z/OS. This IBM Redbooks® publication is a follow-on to Getting started with z/OS Container Extensions and Docker, SG24-8457, which provides some interesting use cases for zCX. We start with a brief overview of IBM zCX. In Part 1, Integration on page 9, we demonstrate use cases that integrate with zCX. In Part 2, DevOps in zCX on page 165, we describe how organizations can benefit from running a DevOps flow in zCX and we describe the set up of necessary components. Finally, in Part 3, Monitoring and managing zCX systems on page 229, we discuss IBM Service Management Unite Automation, a free-of-charge customizable dashboard interface and an important discussion of creating the suitable container restart policy.

Introduction to Internet of Things in Management Science and Operations Research Fausto Pedro García Márquez,Benjamin Lev,2021-09-28 This book aims to provide relevant theoretical frameworks and the latest empirical research findings in Internet of Things (IoT) in Management Science and Operations Research. It starts with basic concept and present cases, applications, theory, and potential future. The contributed chapters to the book cover wide array of topics as space permits. Examples are from smart industry; city; transportation; home and smart devices. They present future applications, trends, and potential future of this new discipline. Specifically, this book provides an interface between the main disciplines of engineering/technology and the organizational, administrative, and planning capabilities of managing IoT. This book deals with the implementation of latest IoT research findings in practice at the global economy level, at networks and organizations, at teams and work groups and, finally, IoT at the level of players in the networked environments. This book is intended for professionals in the field of engineering, information science, mathematics, economics, and researchers who wish to develop new skills in IoT, or who employ the IoT discipline as part of their work. It will improve their understanding of the strategic role of IoT at various levels of the information and knowledge organization. The book is complemented by a second volume of the same editors with practical cases.

E-Cigarette Use Among Youth and Young Adults: a Report of the Surgeon General Centers for Disease Control and Prevention,National Center National Center for Chronic Disease Prevention and Health Promotion,U.S. Department of Health and Human Services,2019-07-26 Tobacco use among youth and young adults in any form, including e-cigarettes, is not safe. In recent years, e-cigarette use by youth and young adults has increased at an alarming rate. E-cigarettes are now the most commonly used tobacco product among youth in the United States. This timely report highlights the rapidly changing patterns of e-cigarette use among youth and young adults, assesses what we know about the health effects of using these products, and describes strategies that tobacco companies use to recruit our nation's youth and young adults to try and continue using e-cigarettes. The report also outlines interventions that can be adopted to minimize the harm these products cause to our nation's youth.E-cigarettes are tobacco products that deliver nicotine. Nicotine is a highly addictive substance, and many of today's youth who are using e-cigarettes could become tomorrow's cigarette smokers. Nicotine exposure can also harm brain development in ways that may affect the health and mental health of our kids.E-cigarette use among youth and young adults is associated with the use of other tobacco products, including conventional cigarettes. Because most tobacco use is established during adolescence, actions to prevent our nation's young people from the potential of a lifetime of nicotine addiction are critical.E-cigarette companies appear to be using many of the advertising tactics the tobacco industry used to persuade a new generation of young people to use their products. Companies are promoting their products through television and radio advertisements that use celebrities, sexual content, and claims of independence to glamorize these addictive products and make them appealing to young people.

Finance for Normal People Meir Statman,2017 Behavioral finance presented in Finance for Normal People is a second generation behavioral finance. The first generation, starting in the early 1980s, largely accepted standard finance's notion of people's wants as "rational" wants - restricted to the utilitarian benefits of high returns and low risk. That first generation commonly described people as "irrational" - succumbing to cognitive and emotional errors and misled on their way to their rational wants. The second generation describes people as normal. It begins by acknowledging the full range of people's normal wants - hope for riches and freedom from the fear of poverty, nurturing our children and families, being true to our values, gaining high social status, playing games and winning, and more. It distinguishes normal wants from errors, and offers guidance on using shortcuts and avoiding errors on the way to satisfying normal wants. People's normal wants, even more than their cognitive and emotional shortcuts and errors, underlie answers to important questions of finance, including saving and spending, portfolio construction, asset pricing, and market efficiency. These are presented in this book.We often hear that behavioral finance is nothing more than a collection of stories about irrational people misled by cognitive and emotional errors, that it lacks the unified structure of standard finance. Yet today's standard finance is no longer unified because wide cracks have opened between its theory and the evidence. This book offers behavioral finance as a unified structure that incorporates parts of standard finance, replaces others, and includes bridges between theory, evidence, and practice.

Ethnography in Nursing Research Janice M. Roper,Jill Shapira,2000 This book describes the principles and methods of ethnography used by researchers (particularly nursing researchers) who examine issues related to health and illness. The authors describe both the processes related to gaining access to the "field" as well as how to: - Conduct ethnographic research in health settings - Analyze and interpret the data you collect from your field work - Make ethical decisions related to the role of being an ethnographer in a health setting, and - Put your ideas into writing so that you can create an ethnographic research proposal Written at a level appropriate for those who have taken an undergraduate research methods course, this book will enable you to learn from people about their health and/or illness.

Germany Hagen Schulze,1998 A history of Germany, covering two thousand years from the revolt of the indigenous tribes against Roman domination to the fall of the Berlin Wall.

War Photographs Taken on the Battlefields of the Civil War Mathew B. Brady,Alexander Gardner,2013-06-01 Fought over the course of four years, the Civil War pitted countrymen against countrymen, North versus South, friend against friend, and brother against brother. The photographs within these pages document the war that united America as one. These rare shots were taken in the middle of the battlefield during the earliest days of photography. Selected

from a collection of seven thousand original negatives, these historic photos capture nearly every aspect of Civil War life. Among these photos are images of camps sprawling across acres, soldiers at their battlements, firing of heavy artillery, the aftermath of battle, and the terror that these young men faced. See first-hand of Union and Confederate officers strategizing their next moves, and Abraham Lincoln addressing his Union commanders. Originally released from the private collection of Edward Bailey Eaton in 1907, this edition is a must have for any Civil War buff or historian. No collection can be considered complete without these photographs by Matthew Brady and Alexander Gardner, as well as the meticulous passages that put the images in illuminating context.
