Global Infectious Disease Surveillance and Detection Institute of Medicine, Board on Global Health, Forum on Microbial Threats, 2007-11-11 Early detection is essential to the control of emerging, reemerging, and novel infectious diseases, whether naturally occurring or intentionally introduced. Containing the spread of such diseases in a profoundly interconnected world requires active vigilance for signs of an outbreak, rapid recognition of its presence, and diagnosis of its microbial cause, in addition to strategies and resources for an appropriate and efficient response. Although these actions are often viewed in terms of human public health, they also challenge the plant and animal health communities. Surveillance, defined as the continual scrutiny of all aspects of occurrence and spread of a disease that are pertinent to effective control, involves the systematic collection, analysis, interpretation, and dissemination of health data. Disease detection and diagnosis is the act of discovering a novel, emerging, or reemerging disease or disease event and identifying its cause. Diagnosis is the cornerstone of effective disease control and prevention efforts, including surveillance. Disease surveillance and detection relies heavily on the astute individual: the clinician, veterinarian, plant pathologist, farmer, livestock manager, or agricultural extension agent who notices something unusual, atypical, or suspicious and brings this discovery in a timely way to the attention of an appropriate representative of human public health, veterinary medicine, or agriculture. Most developed countries have the ability to detect and diagnose human, animal, and plant diseases. *Global Infectious Disease Surveillance and Detection: Assessing the Challenges-*

Research Design and Methods Kenneth S. Bordens, Bruce B. Abbott, 2010-09-01 Research Design and Methods: A Process Approach guides students through the research process, from conceiving of and developing a research idea, to designing and conducting a study, to analyzing and reporting data. The authors present students with information on the numerous decisions they must make when designing and conducting research and indicate how their early decisions affect how data are collected, analyzed, and interpreted later in the research process. A focus on the importance of ethical conduct, both in the treatment of research subjects and in the reporting of research results, directs the text.

Cyberbullying Across the Globe Raúl Navarro, Santiago Yubero, Elisa Larrañaga, 2015-11-24 This book provides a much-needed analysis of the current research in the global epidemic of electronic bullying. Scholars and professionals from the Americas, Europe, and Asia offer data, insights, and solutions, acknowledging both the social psychology and technological contexts underlying cyberbullying phenomena. Contributors address questions that are just beginning to emerge as well as longstanding issues concerning family and gender dynamics, and provide evidence-based prevention and intervention strategies for school and home. The global nature of the book reflects not only the scope and severity of cyberbullying, but also the tenacity of efforts to control and eradicate the problem. Included in the coverage: • Gender issues and cyberbullying in children and adolescents: from gender differences to gender identity measures. • Family

relationships and cyberbullying. • Examining the incremental impact of cyberbullying on outcomes over and above traditional bullying in North America. • A review of cyberbullying and education issues in Latin America. • Cyberbullying prevention from child and youth literature. • Cyberbullying and restorative justice. Cyberbullying across the Globe is an essential resource for researchers, graduate students, and other professionals in child and school psychology, public health, social work and counseling, educational policy, and family advocacy.

Innovative Security Solutions for Information Technology and Communications Jean-Louis Lanet, Cristian Toma, 2019-02-05 This book constitutes the thoroughly refereed proceedings of the 11th International Conference on Security for Information Technology and Communications, SecITC 2018, held in Bucharest, Romania, in November 2018. The 35 revised full papers presented together with 3 invited talks were carefully reviewed and selected from 70 submissions. The papers present advances in the theory, design, implementation, analysis, verification, or evaluation of secure systems and algorithms.

Rethinking EU Consumer Law Geraint Howells, Christian Twigg-Flesner, Thomas Wilhelmsson, 2017-07-28 In Rethinking EU Consumer Law, the authors analyse the development of

EU consumer law on the basis of a number of clear themes, which are then traced through specific areas. Recurring themes include the artificiality of the EU's consumer image, the problems created by the drive towards maximum harmonisation, and the unexpected effects EU Consumer Law has had on national law. The book argues that EU Consumer Law has the potential of enhancing the protecting of consumers throughout the EU and could offer a model for consumer law elsewhere in the world, but in order to unlock this potential, there needs to be a rethink with regard to the EU's approach to consumer law and policy.

Applications in Electronics Pervading Industry, Environment and Society Sergio Saponara, Alessandro De Gloria, 2020-03-20 This book provides a thorough overview of cutting-edge research on electronics applications relevant to industry, the environment, and society at large. It covers a broad spectrum of application domains, from automotive to space and from health to security, while devoting special attention to the use of embedded devices and sensors for imaging, communication and control. The book is based on the 2019 ApplePies Conference, held in Pisa, Italy in September 2019, which brought together researchers and stakeholders to consider the most significant current trends in the field of applied electronics and to debate visions for the future. Areas addressed by the conference included information communication technology; biotechnology and biomedical imaging; space; secure, clean and efficient energy; the environment; and smart, green and integrated transport. As electronics technology continues to develop apace, constantly meeting previously unthinkable targets, further attention needs to be directed toward the electronics applications and the development of systems that facilitate human activities. This book, written by industrial and academic professionals, represents a valuable contribution in this endeavor.

Continuous Manufacturing of Pharmaceuticals Peter Kleinebudde, Johannes Khinast, Jukka Rantanen, 2017-09-05 A comprehensive look at existing technologies and processes for continuous manufacturing of pharmaceuticals As rising costs outpace new drug development, the pharmaceutical industry has come under intense pressure to improve the efficiency of its

manufacturing processes. Continuous process manufacturing provides a proven solution. Among its many benefits are: minimized waste, energy consumption, and raw material use; the accelerated introduction of new drugs; the use of smaller production facilities with lower building and capital costs; the ability to monitor drug quality on a continuous basis; and enhanced process reliability and flexibility. Continuous Manufacturing of Pharmaceuticals prepares professionals to take advantage of that exciting new approach to improving drug manufacturing efficiency. This book covers key aspects of the continuous manufacturing of pharmaceuticals. The first part provides an overview of key chemical engineering principles and the current regulatory environment. The second covers existing technologies for manufacturing both small-molecule-based products and protein/peptide products. The following section is devoted to process analytical tools for continuously operating manufacturing environments. The final two sections treat the integration of several individual parts of processing into fully operating continuous process systems and summarize state-of-art approaches for innovative new manufacturing principles. Brings together the essential know-how for anyone working in drug manufacturing, as well as chemical, food, and pharmaceutical scientists working on continuous processing Covers chemical engineering principles, regulatory aspects, primary and secondary manufacturing, process analytical technology and quality-by-design Contains contributions from researchers in leading pharmaceutical companies, the FDA, and academic institutions Offers an extremely well-informed look at the most promising future approaches to continuous manufacturing of innovative pharmaceutical products Timely, comprehensive, and authoritative, Continuous Manufacturing of Pharmaceuticals is an important professional resource for researchers in industry and academe working in the fields of pharmaceuticals development and manufacturing.

Psychology as a Human Science Amedeo Giorgi, 2020-06-14 Psychology as a Human Science: A Phenomenologically Based Approach is a classic text in the field of psychology that is as relevant today as it was when it was first published in 1970. Giorgi's text helped establish the philosophical foundation humanistic psychology and the human science approach. He provides an important critique of traditional methods in psychology while providing his alternative. This new version includes a new introduction by Giorgi along with a new Foreword by Rodger Broomé.

Populism and World Politics Frank A. Stengel, David B. MacDonald, Dirk Nabers, 2019-01-11 This volume is the first to analyze populism's international dimension: its impact on, and interaction with, foreign policy and international politics. The contributions to this volume engage conceptual theoretical issues and overarching questions such as the still under-specified concept of populism or the importance of leadership and the mass media for populism's global rise. They zoom in on populism's effect on both different countries' foreign policies and core international concerns, including the future of the liberal world order and the chances for international conflict and cooperation more generally.
