Variation and change in the lexicon Mark Kaunisto, 2015-07-14 The present volume is a corpus-based study of the occurrence, variation, and change in the use of English adjective pairs in -ic and -ical over several centuries. The study involves the analysis of large, multi-million-word corpora representing the English language at various stages. It examines the nature of competition between the two affixes: what kind of rivalry existed, what kinds of words entered into competition, and in what ways the rivalry was resolved. The book presents close studies of six notably differentiated -ic/-ical adjective pairs, namely classic/classical, comic/comical, economic/economical, electric/electrical, historic/historical, and magic/magical, as well as commentaries on some 40 other -ic/-ical pairs, which manifest different types of shifts in use through history. It also includes critical discussion of general perceptions on and approaches to the practical use of corpora, stressing the importance of close and careful study of the materials under analysis. It further emphasises the value of consulting a variety of sources alongside corpora, including dictionaries and language usage manuals. This volume is of interest to language scholars in many fields, including corpus linguistics, diachronic linguistics, semantic change, lexicology, and word formation.

China's New Socialist Countryside Russell Harwood, 2013-10-13 Based on ethnographic fieldwork, this case study examines the impact of economic development on ethnic minority people living along the upper-middle reaches of the Nu (Salween) River in Yunnan. In this highly mountainous, sparsely populated area live the Lisu, Nu, and Dulong (Drung) people, who until recently lived as subsistence farmers, relying on shifting cultivation, hunting, the collection of medicinal plants from surrounding forests, and small-scale logging to sustain their household economies. China's New Socialist Countryside explores how compulsory education, conservation programs, migration for work, and the expansion of social and economic infrastructure are not only transforming livelihoods, but also intensifying the Chinese Party-state's capacity to integrate ethnic minorities into its political fabric and the national industrial economy.

African American Foreign Correspondents Jinx Coleman Broussard, 2013-06-07 Though African Americans have served as foreign reporters for almost two centuries, their work remains virtually unstudied. In this seminal volume, Jinx Coleman Broussard traces the history of black participation in international newsgathering. Beginning in the mid-1800s with Frederick Douglass and Mary Ann Shadd Cary -- the first black woman to edit a North American newspaper -- African American Foreign Correspondents highlights the remarkable individuals and publications that brought an often-overlooked black perspective to world reporting. Broussard focuses on correspondents from 1840 to the present, including reporters such as William Worthy Jr., who helped transform the role of modern foreign correspondence by gaining the right for journalists to report from anywhere in the world unimpeded; Leon Dash, a professor of journalism and African American studies at the University of Illinois, who reported from Africa for the Washington Post in the 1970s and 1980s; and Howard French, a professor in Columbia University's journalism school and a globetrotting foreign correspondent. African American Foreign Correspondents provides insight into

how and why African Americans reported the experiences of blacks worldwide. In many ways, black correspondents upheld a tradition of filing objective stories on world events, yet some African American journalists in the mainstream media, like their predecessors in the black press, had a different mission and perspective. They adhered primarily to a civil rights agenda, grounded in advocacy, protest, and pride. Accordingly, some of these correspondents -- not all of them professional journalists -- worked to spur social reform in the United States and force policy changes that would eliminate oppression globally. Giving visibility and voice to the marginalized, correspondents championed an image of people of color that combatted the negative and racially construed stereotypes common in the American media. By examining how and why blacks reported information and perspectives from abroad, African American Foreign Correspondents contributes to a broader conversation about navigating racial, societal, and global problems, many of which we continue to contend with today.

The P53 Protein Guillermina Lozano,Arnold Jay Levine,2016 Decades of research on the tumor suppressor p53 have revealed that it plays a significant role as a guardian of the genome, protecting cells against genotoxic stress. In recent years, p53 research has begun to move into the clinic in attempts to understand how p53 is frequently inactivated in-and sometimes even promotes-human cancer. Written and edited by experts in the field, this collection from Cold Spring Harbor Perspectives in Medicine covers the rapid progress that has recently been made in basic and clinical research on p53. The contributors review new observations about its basic biology, providing updates on the functions of its isoforms and domains, the myriad stresses and signals that trigger its activation or repression, and its downstream effects on genome stability and the cell cycle that enforce tumor suppression in different cell and tissue types. They also discuss how p53 dysfunction contributes to cancer, exploring the various inherited and somatic mutations in the human TP53 gene, the impact of mutant p53 proteins on tumorigenesis, and the prognostic value and clinical outcomes of these mutations. Drugs that are being developed to respond to tumors harboring aberrant p53 are also described. This book is therefore essential reading for all cancer biologists, cell and molecular biologists, and pharmacologists concerned with the treatment of this disease.

Managing Security Overseas Scott Alan Ast,2009-08-18 Threats to multinational corporations come in two forms: natural and man-made. This book illustrates the types of risks that confront corporations when working outside of North America. It provides key tools and understanding that are required to do business in a safe and secure manner, no matter the level of risk. It walks through a logical framework for safety and security program development from Day One. Using real-world case studies and examples, the book is a useful reference to security managers, security consultants, contractors, frequent global business travelers, and for those who are presently or soon-to-be assigned in overseas positions.

A Question of Class Duane Carr,1996 Rednecks have long been subjects of scorn and ridicule, especially in the South because of an antebellum caste and class system, parts of which persist to this day. In *A Question of Class*, Carr probes the historical and sociological reasons for the descent of rednecks into poverty, their inability to rise above it, and their continuing subjugation to a stereotype developed by others and too often accepted by themselves. Carr also records the progress in southern fiction of this negative stereotype - from antebellum writers who saw rednecks as threats to the social order, to post-Civil War writers who lamented the lost potential of these people and urged sympathy and understanding, to modern writers who reverted, in some sense, to Old South attitudes, and finally, to contemporary writers who point toward a more democratic acceptance of this much maligned group.

Will Sustainability Fly? Walter J. Palmer,2016-02-11 While international negotiations to reduce greenhouse gas (GHG) emissions have been less than satisfactory, there is a presumption that a significant level of multi-lateral commitment will be realized at some point. International air and marine travel have been left to one side in past talks because the pursuit of agreement proceeds on the basis of commitment by sovereign nations and the effects of these specific commercial activities are, by their nature, difficult to corral and assign to specific national jurisdictions. However, air travel is increasing and, unless something is done, emissions from this segment of our world economy will form a progressively larger percentage of the total, especially as emissions fall in other activities. This book focuses on fuel. The aim is to provide background in technical and policy terms, from the broadest reliable sources of information available, for the necessary discourse on society's reaction to the evolving aviation emissions profile. It considers what policy has been, why and how commercial air travel is committed to its current liquid fuel, how that fuel can be made without using fossil-source materials, and the barriers to change. It also advances some elements of policy remedies that make sense in providing an environmentally and economically sound way forward in a context that comprehends a more complete vision of sustainability than 'renewable fuels' traditionally have. The goal of Will Sustainability Fly? is to broaden and contextualize the knowledge resource available to academics, policy makers, air industry leaders and stakeholders, and interested members of the public.
