**Captivate** Vanessa Van Edwards,2017-04-25 Do you feel awkward at networking events? Do you wonder what your date really thinks of you? Do you wish you could decode people? You need to learn the science of people. As a human behavior hacker, Vanessa Van Edwards created a research lab to study the hidden forces that drive us. And she's cracked the code. In Captivate, she shares shortcuts, systems, and secrets for taking charge of your interactions at work, at home, and in any social situation. These aren't the people skills you learned in school. This is the first comprehensive, science backed, real life manual on how to captivate anyone—and a completely new approach to building connections. Just like knowing the formulas to use in a chemistry lab, or the right programming language to build an app, Captivate provides simple ways to solve people problems. You'll learn, for example... · How to work a room: Every party, networking event, and social situation has a predictable map. Discover the sweet spot for making the most connections. · How to read faces: It's easier than you think to speed-read facial expressions and use them to predict people's emotions. · How to talk to anyone: Every conversation can be memorable—once you learn how certain words generate the pleasure hormone dopamine in listeners. When you understand the laws of human behavior, your influence, impact, and income will increase significantly. What's more, you will improve your interpersonal intelligence, make a killer first impression, and build rapport quickly and authentically in any situation—negotiations, interviews, parties, and pitches. You'll never interact the same way again.

**Unlocking the Power of Networks** Stephen Goldsmith,Donald F. Kettl,2009-12-01 The era of strict top-down, stovepiped public management in America is over. The traditional dichotomy between public ownership and privatization is an outdated notion. Public executives have shifted their focus from managing workers and directly providing services to orchestrating networks of public, private, and nonprofit organizations to deliver those services. Unlocking the Power of Networks employs original sector-specific analyses to reveal how networked governance achieves previously unthinkable policy goals. Stephen Goldsmith and Donald F. Kettl head a stellar cast of policy practitioners and scholars exploring the potential, strategies, and best practices of high-performance networks while identifying next-generation issues in public-sector network management. They cover the gamut of public policy issues, including national security, and the book even includes a thought-provoking look at how jihadist terrorists use the principles of network management to pursue their goals. Contributors: William G. Berberich (Virginia Tech), Tim Burke (Harvard University), G. Edward DeSeve (University of Pennsylvania),William D. Eggers (Manhattan Institute), Anne M. Khademian (Virginia Tech), H. Brinton Milward (University of Arizona), Mark H. Moore (Harvard University), Paul Posner (George Mason University), Jörg Raab (Tilburg University), and Barry G. Rabe (University of Michigan).

Do you feel awkward at networking events? Do you wonder what your date really thinks of you? Do you wish you could decode people? You need to learn the science of people. As a human behavior hacker, Vanessa Van Edwards created a research lab to study the hidden forces that drive us. And she's cracked the code. **The Counter-Creationism Handbook** Mark Isaak,2007-01-12 Those opposed to the teaching of evolution often make well-rehearsed claims about science that sound powerful and convincing. **Famine in North Korea** Stephan Haggard,Marcus Noland,2009-06-22 In the mid-1990s, as many as one million North Koreans died in one of the worst famines of the twentieth century. Stephan Haggard and Marcus

Noland present the most comprehensive and penetrating account of the famine to date, examining not only the origins and aftermath of the crisis but also the regime's response to outside aid and the effect of its current policies on the country's economic future. North Korea's famine exemplified the depredations that can arise from tyrannical rule and the dilemmas such regimes pose for the humanitarian community. To reveal the state's culpability is a vital project of historical recovery, especially in light of our current engagement with the North Korean question.

**Foreign Policies of EU Member States** Amelia Hadfield,Ian Manners,Richard G. Whitman,2017-06-14 Foreign Policies of EU Member States provides a clear and current overview of the motivations and outcomes of EU Member States regarding their foreign policy-making within and beyond the EU. It provides an in-depth analysis of intra-EU policy-making and sheds light, in an innovative and understandable way, on the lesser-known aspects of the inter-EU and extra-EU foreign policies of the twenty-eight Member States: First, EU Member States must cooperate within the mechanisms of the EU, including the Common Foreign and Security Policy (CFSP). Second, EU, Member States continue to construct their own inter-EU foreign policies. Third, the sovereign prerogative exercised by all EU Member States is to construct their own foreign policies on everything from trade and defence with the rest of the world. This combination of clarity, thematic structure and empirical case studies make this an ideal textbook for all upper-level students of European foreign policy, comparative European politics and European studies. -- from back cover.

**North Korea and the Science of Provocation** Robert Daniel Wallace,2016-02-09 Why does North Korea routinely turn to provocation to achieve foreign policy goals? Are the actions of the volatile Kim regime predictable, based on logical responses to the conditions faced by North Korea? This book, an examination of the Hermit Kingdom over the past 50 years, explains why the Democratic People's Republic of Korea uses hostility and coercion as instruments of foreign policy. Using three case studies and quantitative analysis of more than 2,000 conflict events, the author explores the relationship between North Korea's societal conditions and its propensity for external conflict. These findings are considered in light of diversionary theory, the idea that leaders use external conflict to divert attention from domestic affairs. Analyzing the actions of an isolated state such as North Korea provides a template for conflict scholarship in general.
