Bennett,2016-03-22 Full of larger-than-life characters, stunning acts of bravery, and heart-rending sacrifice, *Tried by Fire* narrates the rise and expansion of Christianity from an obscure regional sect to the established faith of the world's greatest empire with influence extending from India to Ireland, Scandinavia to Ethiopia, and all points in between. William J. Bennett explores the riveting lives of saints and sinners, paupers and kings, merchants and monks who together—and against all odds—changed the world forever. Strengthened by poets, preachers, and theologians, they advanced in devotion and love. In this moving and accessible narrative, *Tried by Fire* speaks across centuries to offer insight into the people and events that shaped the faith that continues to shape our lives today.

Dogmatic Constitution on Divine Revelation Pope Paul VI., 1965 This document's purpose is to spell out the Church's understanding of the nature of revelation--the process whereby God communicates with human beings. It touches upon questions about Scripture, tradition, and the teaching authority of the Church. The major concern of the document is to proclaim a Catholic understanding of the Bible as the word of God. Crafting Peace Sasha Lezhnev, 2005 Crafting Peace analyzes warlords in depth, including their organizational structure and the context in which they operate, ultimately exploring the effectiveness of various short and long-term strategies to deal with warlords. Instead of focusing strictly on economic causes, the focus here is on the extremely frail political/security environment that allows warlords to rise up, seize power, and profit in the midst of chaos. This deeper political context, under-analyzed in other texts in terms of its effect on warlordism, is crucial to understanding both why warlords arise and how they should be dealt with. This book suggests a two-pronged strategic approach to help craft peace: unseating certain intransigent warlords through immediate, coercive measures; and taking away the anarchic environment in which these actors thrive by implementing several policies aimed at rebuilding law and order over the long-term. Sasha Lezhnev discusses this approach by looking at real-world cases in Sierra Leone and Tajikistan. Crafting Peace presents a new way of looking at eliminating warlords and restoring peace in war-torn states that will prove essential to both scholars and practitioners in international relations and political science.

Tackling Health Inequalities Surindar Kishen Dhesi, 2018-10-25 Although environmental health has received some recognition as a field which can positively impact on the social determinants of health, it remains little known outside its immediate sphere of influence. There is also limited literature available to support the potential impact of the profession in public health policy circles, and there has been an overreliance on anecdotal rather than firm evidence. This book presents the findings of an empirical research project focussed on public health policymaking (English Health and Wellbeing Boards), health inequalities and environmental health and provides an insight to the environmental health profession and routes of impact and influence. It discusses environmental health in the context of public health, the role of the profession, issues of visibility and opportunities for impact in today's policy landscape. In particular, a focus on the local government context is timely given the shifting of the public health function from the National Health Service to local authorities. This book is essential reading for students, practitioners and policymakers in the fields of environmental

health and public health.

Redefining European Economic Integration Dariusz Adamski,2018-04-30 European economic integration has relied on policies intended to make the European Union strong and resilient economically, socially and politically. The Eurozone crisis and Brexit have demonstrated, however, how fragile this hope was and how contested reforms to the major European economic policies have become. Dariusz Adamski explains the evolution of these policies - from the Economic and Monetary Union to the internal market, international trade, the EU's climate policy, as well as its redistributive policies - and demonstrates how this evolution has made European economic integration increasingly frail. He shows how erroneous economic and political assumptions regarding the direction of the European integration project have interplayed with the EU's constitutional context. Arguing that flaws in individual policies contributing to European economic integration can be remedied in compliance with the existing constitutional setup, he explains why such solutions would be economically beneficial and politically feasible.

As soon as the clock reaches five, she receives a text message telling her that the bar across the street has a happy hour when drinks are cheaper. Nancy deletes the message almost without reading it. She has given her mobile service provider permission to send her unsolicited local promotional messages after five - otherwise she would have to pay a higher subscription rates - but that does not mean she actually has to read the message, does it?
