Unfunding Terror Jimmy Gurulé, 2010-01-01 Jimmy Gurulé knows how to bankrupt terrorists like few others do. As Undersecretary of the Treasury for Enforcement, he spearheaded the fight against al-Qaeda's global bank accounts, helping to earn the highest grade awarded on the 9/11 Commissioners report card. As an author, he performs once again. *Unfunding Terror* provides policymakers and laymen alike a clear roadmap on how to keep terrorists out of the global financial system. Timothy J. Roemer, Center for National Policy, former US Congressman and member of the National Commission on Terrorist Attacks Upon the United States (9/11 Commission) Jimmy Gurulé has given us a superbly comprehensive and well-written assessment of why, regarding terrorism, Deep Throat's principle is bang on: follow the money. R. James Woolsey, venture partner, VantagePoint, and former Director of Central Intelligence, US A detailed study by a true scholar-practitioner, *Unfunding Terror* explains the legal response to terror finance in language accessible to both the expert and layman. Required reading. Matthew Levitt, Director, Stein Program on Counterterrorism and Intelligence, The Washington Institute for Near East Policy and former Deputy Assistant Secretary of the Treasury for Intelligence and Analysis, US Professor Gurulé is comprehensive: he describes the problem (terrorist funding by those in the free world), analyzes the legal responses (make it a crime, freeze terrorist assets, impose regulations on financial institutions), critiques the administration's and international community's efforts to unfund terrorists (political rhetoric, not in fact backed up with effective strategies or implementation), and outlines concrete legal and administrative remedies. Would that they to whom the recommendations are addressed act on them quickly. Too much is at stake to let terrorists, who condemn the West as corrupt, get their funding to attack the US and its allies from the West itself. That would be a form of social suicide. G. Robert Blakey, Notre Dame Law School, US The September 11, 2001 terrorist attacks that claimed the lives of 2,973 innocent civilians required as much as \$500,000 to stage. At the time, al Qaeda was operating on an annual budget of between \$30 and \$50 million. However, despite the obvious fact that terrorists need money to terrorize, preventing the financing of terrorism was not a priority for the United States or the international community prior to 9/11. Jimmy Gurulé, former Under Secretary for Enforcement in the US Department of the Treasury, provides the first book-length, comprehensive analysis of the legal regime that evolved following the terrorist attacks. The book begins with a discussion of how shutting down the pipelines of funding is as important as dismantling the terrorist cells themselves. Next, the book covers the various means and methods used by terrorist groups to raise money, and examines how money is transferred globally to finance their lethal activities. The principal components of the legal strategy to disrupt the financing of terrorism are then discussed and evaluated. Unfortunately, the author concludes that the legal regime has met with mixed results, and finds that the sense of urgency to deprive terrorists of funding that existed following 9/11 has since dissipated. As a result, international efforts to freeze terrorist assets have dramatically declined. Moreover, the US Department of Justice has suffered several embarrassing and disappointing legal defeats in prosecuting major terrorist financiers. The author provides numerous recommendations to Congress, the Executive Branch, and the UN

Security Council for strengthening the legal regime to deny terrorists the money needed to wage global jihad, acquire weapons of mass destruction, and launch another terrorist attack on the scale of 9/11. *Unfunding Terror* fills an important gap in the literature and will be essential reading for counter-terrorism experts, law enforcement and national security.

The World of Agricultural Economics Carin Martiin, 2013-04-12 This textbook takes a truly international approach towards agricultural economics, uniting many different perspectives on the subject and providing insight into agriculture in general, and into how practical farming works in particular. The book is laced throughout with real world examples and other pedagogical features. Topics covered are wide-ranging and include: world food production and population the food chain and food safety non-foods derived from farming land and soil issues arable and animal production and management at farm level. *The World of Agricultural Economics: an introduction* is primarily an introductory textbook for students in agricultural economics, agronomy and adjacent fields. However, its accessible approach means that it is also suitable for readers without any previous knowledge in the field, who are seeking an introduction to agriculture.

De Valera and Roosevelt Bernadette Whelan, 2020-12-10 How did Irish and American diplomacy operate in Washington DC and Dublin during the 1930s era of economic depression, rising fascism and Nazism? How did the Anglo-American relationship affect American-Irish diplomatic relations? Why and how did Éamon de Valera and Franklin D. Roosevelt move their countries towards neutrality in 1939? This first comprehensive history of American and Irish diplomacy during the 1930s focuses on formal and informal diplomacy, examining all aspects of diplomatic life to explain the relationship between the two administrations from 1932 to 1939. Bernadette Whelan reveals how diplomats worked on behalf of their governments to implement Franklin D. Roosevelt and Éamon de Valera's foreign policies – particularly when Éamon de Valera believed in the existence of a 'special' transatlantic relationship but Franklin D. Roosevelt increasingly favoured a strong relationship with Britain. Drawing on a wide range of under-used sources, this is a major new contribution to the history of American and Irish diplomacy and revises our understanding of the importance of Ireland to a US administration.

Salt & Light; The Complete Jesus Jonathan Geoffrey Dean, 2022-07-10 What did Jesus do? What did Jesus say? Who was Jesus? *Salt & Light; The Complete Jesus* is the highly acclaimed and award-winning definitive statement concerning Jesus of Nazareth, history's most compelling figure. The single most important book about the Historical Jesus in the last 30 years, more comprehensive than Josh McDowell's *Evidence That Demands a Verdict* and more powerful than C.S. Lewis' *Mere Christianity*. However, even today, there is still general confusion surrounding Jesus: Was (Is) Jesus God? Did Jesus even exist? Did he rise from the dead? What are we to make of the miracles? Is he Peter's Jesus or Paul's Christ? Or both? Is there evidence for Jesus outside the Bible? Should we still believe? If so, believe what? What does ALL the evidence point to? *Salt & Light* does not shy away from addressing these and other tough questions. For the first time ever, after years of research using the complete body of early Christian literature and recent modern scholarship, including new and exciting discoveries in many

areas such as early manuscripts, science, New Testament studies, archaeology, and history, the real Jesus emerges. Dean offers an eminently readable yet powerful portrait of the authentic Jesus full of astonishing facts for both believers and sceptics alike. So come along for an utterly fascinating journey and meet the historical Jesus, learn about his mission, and discover his teaching! Energy Efficiency: Innovations: Driving Prosperity, Slashing Emissions Henry Kelly, 2020-11-06 Energy efficiency touches all parts of the economy and lies at the heart of all plausible strategies for addressing climate change. A fascinating range of new technologies and new business models have emerged in the past few years and are rapidly reshaping the field and driving efficiency improvements – many of them completely unexpected. This book provides a fresh look at energy efficiency written in a way that can be interesting to experts and serve as an entry point for novices. With chapters written by recognized experts in their fields of expertise, the book provides readers with a clear perspective on the state-of-the art developments of both new technologies and new approaches to system design and operations in buildings, industry, transportation, and urban design. Strategies for electrification and optimization based on data and powerful algorithms are also explored in depth. The discussion includes new mobility systems, smart buildings, reimaged industrial processes, new materials, and smart grid integration. Related Link(s)

Private Collecting, Exhibitions, and the Shaping of Art History in London Stacey J. Pierson, 2017-01-12 The Burlington Fine Arts Club was founded in London in 1866 as a gentlemen's club with a singular remit – to exhibit members' art collections. Exhibitions were proposed, organized, and furnished by a group of prominent members of British society who included aristocrats, artists, bankers, politicians, and museum curators. Exhibitions at their grand house in Mayfair brought many private collections and collectors to light, using members' social connections to draw upon the finest and most diverse objects available. Through their unique mode of presentation, which brought museum-style display and interpretation to a grand domestic-style gallery space, they also brought two forms of curatorial and art historical practice together in one unusual setting, enabling an unrestricted form of connoisseurship, where new categories of art were defined and old ones expanded. The history of this remarkable group of people has yet to be presented and is explored here for the first time. Through a framework of exhibition themes ranging from Florentine painting to Ancient Egyptian art, a study of lenders, objects, and their interpretation paints a picture of private collecting activities, connoisseurship, and art world practice that is surprisingly diverse and interconnected.

Climate Change, Security Risks and Conflict Reduction in Africa Charlène Cabot,2016-11-04 Millions of people are already affected by weather-related shocks every year in West Africa and climate change is highly likely to increase these threats. In the wake of climate change, rising temperatures, increasingly irregular rainfall and more frequent natural hazards will endanger the ways of life of vulnerable population groups in this region and destabilize their human security. A surge in violence and conflicts could take place. One of the conflict constellations could be between farmers and herders. A surge in violence and

conflicts could take place. One of the conflict constellations could be between farmers and herders. These groups are highly vulnerable to climate change due to their dependence on natural resources for their subsistence. Furthermore, they are historically prone to enter into conflict over issues of access to natural resources. However, social, economic and political circumstances fundamentally influence environmental conflicts. There might thus be opportunities to face the societal challenges of climate change in a peaceful way and the political and institutional framework could play an important role in reducing conflict and violence. In order to explore such a path, this study analyses the potential of political factors (policies and institutions) for the reduction of climate-change-induced or aggravated conflicts between farmers and herders. After a theoretical demonstration, a case study of agro-pastoral conflicts in Burkina Faso, Côte d'Ivoire, and Ghana is conducted. their subsistence. Sustainable Food Production Includes Human and Environmental Health W. Bruce Campbell, Silvia López-Ortíz, 2013-11-01 Agroecology not only encompasses aspects of ecology, but the ecology of sustainable food production systems, and related societal and cultural values. To provide effective communication regarding status and advances in this field, connections must be established with many disciplines such as sociology, anthropology, environmental sciences, ethics, agriculture, economics, ecology, rural development, sustainability, policy and education, or integrations of these general themes so as to provide integrated points of view that will help lead to a sustainable construction of values. Such designs are inherently complex and dynamic, and go beyond the individual farm to include landscapes, communities, and biogeographic regions by emphasizing their unique agricultural and ecological values, and their biological, societal, and cultural components and processes.

Voluntary Standard Systems Carsten Schmitz-Hoffmann, Michael Schmidt, Berthold Hansmann, Dmitry Palekhov, 2014-05-14 Emerging to the forefront of sustainable production and consumption are a promising and rapidly evolving concept known as Voluntary Standard Systems (VSS). They encompass the three pillars of sustainability – social, environmental and economic aspects and consequently they can be considered as a tool, which makes sustainable development visible. Currently, they are becoming a significant element in international trade and in the promotion of sustainable development strategies, especially in the context of globalised markets and supply chains. This volume provides a comprehensive overview of the current VSS concepts: from their nature and functioning, to the future outlook for their development. It places VSS in the broader context of global development issues and challenges, including development policy and international sustainability commitments,

progress towards achieving 'green economy' and meeting climate protection targets. The volume contains also a representative selection of case studies which demonstrate their wide range of application in different sectors of the economy.

Rethinking the measurement of undernutrition in a broader health context Alexander J. Stein,2013-11-01
Researchers and policymakers are paying increasing attention to the nexus of hunger, malnutrition, and public health, and to the related measurement of food and nutrition security. However, focusing on proxy indicators, such as food availability, and on selected head count figures, such as stunting rates, gives an incomplete picture. In contrast, global burden of disease (GBD) studies are outcome based, they follow an established methodology, and their results can be used to derive and monitor the burden of chronic and hidden hunger (undernutrition) at the global level. Judging by this measure, the international goal of halving global hunger between 1990 and 2015 has already been achieved—which is in stark contrast to the picture that emerges if the first Millennium Development Goal's indicator for measuring hunger is used. In view of current discussions of the post-2015 development agenda, this discrepancy highlights the need to choose carefully the indicators that are used for operationalizing any new set of goals. Better access to existing data, a more detailed coverage of nutrition-related health outcomes, and more frequent updates of GBD studies would facilitate further analyses and the monitoring of global food and nutrition security. While the disability-adjusted life years (DALYs) that are used as a health metric in GBD studies may be somewhat abstract, they can be converted tentatively into more easily understood monetary terms using per capita income figures. The resulting preferred estimate of the annual cost of global hunger in all its forms of 1.9 trillion international dollars may be better suited to illustrate the magnitude of remaining food and nutrition insecurity worldwide. Despite the progress that has been made so far in reducing global hunger, the problem is still huge and its eradication requires continued efforts.

Collision Course Kerry Higgs,2016-09-02 The story behind the reckless promotion of economic growth despite its disastrous consequences for life on the planet. The notion of ever-expanding economic growth has been promoted so relentlessly that "growth" is now entrenched as the natural objective of collective human effort. The public has been convinced that growth is the natural solution to virtually all social problems—poverty, debt, unemployment, and even the environmental degradation caused by the determined pursuit of growth. Meanwhile, warnings by scientists that we live on a finite planet that cannot sustain infinite economic expansion are ignored or even scorned. In *Collision Course*, Kerry Higgs examines how society's commitment to growth has marginalized scientific

findings on the limits of growth, casting them as bogus predictions of imminent doom. Higgs tells how in 1972, *The Limits to Growth*—written by MIT researchers Donella Meadows, Dennis Meadows, Jorgen Randers, and William Behrens III—found that unimpeded economic growth was likely to collide with the realities of a finite planet within a century. Although the book's arguments received positive responses initially, before long the dominant narrative of growth as panacea took over. Higgs explores the resistance to ideas about limits, tracing the propagandizing of “free enterprise,” the elevation of growth as the central objective of policy makers, the celebration of “the magic of the market,” and the ever-widening influence of corporate-funded think tanks—a parallel academic universe dedicated to the dissemination of neoliberal principles and to the denial of health and environmental dangers from the effects of tobacco to global warming. More than forty years after *The Limits to Growth*, the idea that growth is essential continues to hold sway, despite the mounting evidence of its costs—climate destabilization, pollution, intensification of gross global inequalities, and depletion of the resources on which the modern economic edifice depends.

Food Production and Nature Conservation Iain J. Gordon, Herbert H.T. Prins, Geoff R. Squire, 2016-11-25 Feeding the world's growing human population is increasingly challenging, especially as more people adopt a western diet and lifestyle. Doing so without causing damage to nature poses an even greater challenge. This book argues that in order to create a sustainable food supply whilst conserving nature, agriculture and nature must be reconnected and approached together. The authors demonstrate that while the links between nature and food production have, to some extent, already been recognized, until now the focus has been to protect one from the impacts of the other. Instead, it is argued that nature and agriculture can, and should, work together and ultimately benefit from one another. Chapters describe efforts to protect nature through globally connected protected area systems and illustrate how farming methods are being shaped to protect nature within agricultural systems. The authors also point to many ways in which nature benefits agriculture through the ecosystem services it provides. Overall, the book shows that nature conservation and food production must be considered as equally important components of future solutions to meet the global demand for food in a manner that is sustainable for both the human population and the planet as a whole.

Horticulture: Plants for People and Places, Volume 3 Geoffrey R. Dixon, David E. Aldous, 2014-06-10 This Trilogy explains “What is Horticulture?”. Volume three of *Horticulture: Plants for People and Places* presents readers with detailed accounts of the scientific and scholastic concepts which interact with the arts and humanities and which now underpins the rapidly evolving subject of Social Horticulture. This discipline transcends the barriers between science, medicine and the arts. This volume covers:- Horticulture and Society, Diet and Health, Psychological Health, Wildlife, Horticulture and Public Welfare, Education, Extension, Economics, Exports and Biosecurity, Scholarship and Art, Scholarship and Literature, Scholarship and History and the relationship between Horticulture and Gardening. This volume brings the evolution of the Discipline and Vocation of Horticulture firmly into the 21st Century. It covers new ground by providing a detailed analysis of the value of Horticulture as a force for

enhancing society in the forms of social welfare, health and well-being, how knowledge is transferred within and between generations, and the place of Horticulture in the Arts and Humanities. Substantial emphasis is given to the relationships between health, well-being and plants by the internationally acclaimed authors who have contributed accounts of their work in this book.

Sustainable Intensification to Advance Food Security and Enhance Climate Resilience in Africa Rattan Lal, Bal Ram Singh, Dismas L. Mwaseba, David Kraybill, David O. Hansen, Lars Olav Eik, 2014-10-10 This 32-chapter volume represents the core of several oral and poster presentations made at the conference. In addition to Introduction and Conclusion sections, the book is thematically divided into 7 sections, namely, 1) Land Use and Farming Systems, 2) Effects of Climate Change on Crop Yield, 3) Soil Nutrient and Water Management for Carbon Sequestration, 4) Rehabilitation of Degraded Lands through Forestry and Agroforestry, 5) Management of Animal Production for Greenhouse Gas Emissions, 6) Smallholder Adaptation to Climate Change, and 7) Economic, Social and Policy Issues. It addresses these themes in the context of sustainable intensification (SI). It implies increasing agronomic production from the existing land while improving/restoring its quality and decreasing the C or environmental footprint. Simply put, SI means producing more from less.

Sustainable Poultry Production in Europe Emily Burton, Joanne Gatcliffe, Helen Masey O'Neill, Dawn Scholey, 2016-04-27 Examining sustainable poultry production systems across Europe, this book contains a selected cross section of papers from the 2014 UK Poultry Science Symposium. It reviews essential topics such as resources and supply chains, the global poultry market, risk management, zoonoses and green issues. Providing a compilation of the most current research in the poultry science and production industry, this book is an important resource for both researchers and professionals.
