**Terrorism Within Comparative International Context**

M.R. Haberfeld, Joseph F. King, Charles A. Lieberman, 2009-09-03

The introductory chapter of this book presents the concepts of the benefits inherent in the study of comparative approach for an effective counterterrorism response on the local law enforcement level and overviews the inception of the project. Throughout the twentieth century and into the twenty-first century, especially after the events of September 11, 2001, the legitimacy of law enforcement practices has been cited as a major concern for international criminal justice. As policing practitioners and scholars throughout the world shifted focus from a traditional reactive, crime control stance to the need for accountability mechanisms to ensure the support of citizenry in combating crime and terrorism, the democratization of policing was seen as the best mechanism for achieving long-term gains in public order at the same time as protecting human rights. While the need to maintain human rights remains an important issue, balancing these concerns with the important public safety interests of societies is paramount.

*National Intellectual Capital and the Financial Crisis in Austria, Belgium, the Netherlands, and Switzerland* Carol Yeh-Yun Lin, Leif Edvinsson, Jeffrey Chen, Tord Beding, 2013-09-05 In the first decade of the twenty-first century, the biggest event of worldwide proportion was the 2008 global financial crisis, which was caused primarily by ineffective governance, failed surveillance systems, and implementation flaws. While fiscal and monetary policies succeeded in pulling many countries out of a financial freefall, most economies have performed beneath pre-recession levels as governments continued to struggle with their finances. Examining the financial crisis from the viewpoint of intangible assets provides a different perspective from traditional

economic approaches. National Intellectual Capital (NIC), comprised mainly of human capital, market capital, process capital, renewal capital, and financial capital, is a valuable intangible asset and a key source of national competitive advantage in today's knowledge economy. The authors—pioneers in the field—present extensive data and a rigorous conceptual framework to analyze the connections between the global financial crisis and NIC development. Covering the period from 2005 to 2010 across 48 countries, the authors establish a positive correlation between NIC and GDP per capita and consider the impact of NIC investment for short-term recovery and long-term risk control and strategy formulation. Each volume in a series of SpringerBriefs on NIC and the financial crisis provides in-depth coverage of the impact of the crisis, the aftermath, future prospects, and policy implications for a regional cluster. This volume focuses on Austria, Belgium, the Netherlands, and Switzerland.

*Navigating Intellectual Capital After the Financial Crisis*

Carol Yeh-Yun Lin, Leif Edvinsson, Jeffrey Chen, Tord

Beding, 2014-07-24 In the first decade of the twenty-first century, the biggest event of worldwide proportion was the 2008 global financial crisis, which was caused primarily by ineffective governance, failed surveillance systems and implementation flaws. While fiscal and monetary policies succeeded in pulling many countries out of a financial freefall, most economies have performed beneath pre-recession levels as governments continued to struggle with their finances. Examining the financial crisis from the viewpoint of intangible assets provides a different perspective from traditional economic approaches. National Intellectual Capital (NIC), comprised mainly of human capital, market capital, process capital, renewal capital and financial capital, is a valuable intangible asset and a key source of national competitive advantage in today's knowledge economy. The authors—pioneers in the field—present extensive data and a

rigorous conceptual framework to analyze the connections between the global financial crisis and NIC development. Covering the period from 2005 to 2010 across 48 countries, the authors establish a positive correlation between NIC and GDP per capita and consider the impact of NIC investment for short-term recovery and long-term risk control and strategy formulation. This book summarizes and synthesizes the data presented in a series of eleven SpringerBriefs volumes on “National Intellectual Capital and the Financial Crisis,” concerning the co-developments between NIC and GDP growth and describes the internal and external factors that influenced the relative success or failure of national strategies in weathering the crisis. The authors go on to explore the impacts of various policy reforms, including stimulus packages and consolidations employed around the world, with particular respect to the factors enhancing or impeding short-term recovery versus long-term growth. Finally, they propose a new model of “sustainable national intellectual capital” and challenge readers to consider how to pass on a healthy globe and harmonious society to the next generation.

**The Netherlands** Pat Seward, Sunandini Arora Lal, Caitlyn Paley, 2016-04-15 The Netherlands is a place often equated with blonde-haired, blue-eyed people and wooden shoes; however, it is much more than that. The Netherlands is a prosperous country that has a vibrant history and a unique culture. This book explores the Netherlands of the past and well as the present, and what it is like to live there today. All books of the critically-acclaimed Cultures of the World® series ensure an immersive experience by offering vibrant photographs with descriptive nonfiction narratives, and interactive activities such as creating an authentic traditional dish from an easy-to-follow recipe. Copious maps and detailed timelines present the past and present of the country, while exploration of the art and architecture help your readers to understand why diversity is the spice of Life.

**Chaplaincy** Mark A. Jumper, Steven E. Keith, Michael W.

Langston,2024-03-26 This comprehensive introduction to the ministry of chaplaincy brings together three authors who oversee three of the leading chaplaincy programs in the United States. Written from an evangelical perspective, the book covers the foundations of chaplaincy and surveys specific types of chaplaincy work. In the first half of the book, the authors delve into the history of chaplaincy work as well as its biblical, theological, and philosophical foundations. They introduce students to important topics such as endorsement, placement, and the constitutional and legal parameters of such work. They also consider the person of the chaplain and the understanding of chaplaincy as Christian ministry. In the second half of the book, the authors bring together expert contributors to survey ten specific contexts for chaplaincy work, such as education, healthcare, the military, corporations, prisons, public safety, and sports, and they explore the future of chaplaincy. This book will be an invaluable resource for students of chaplaincy.

**Regulation of the Voluntary Sector** Mark Sidel,2009-10-16 Have we gone too far in enacting laws, promulgating regulations and announcing policies that threaten freedom of association, either now or ‘in waiting’ for the future? Regulation of the Voluntary Sector focuses on the legal and political environment for civil society in an era in which counter-terrorism policy and law have challenged civil society and civil liberties in a number of countries. The ways in which counter-terrorism law and policy affect civil society can and do differ dramatically by country and region. Through the lens of developments since September 11th, Mark Sidel provides the first comparative analysis of state responses to voluntary sector activity. Comparing the situations in the UK and the US, as well as in Australia, Canada, India and within the European Union, he surveys the increasing efforts to delimit and restrict voluntary sector activities – such as fundraising and grant-making – as well as opposition to them.

**Technology, Transgenics and a Practical Moral Code**

Dennis R. Cooley, 2009-09-28 Most philosophers still like to feel that they have a special subject matter, well insulated from anything that the social scientists, and scientists in general, have to tell them. That is not healthy for philosophy; and it is all too likely to lead to an ethics that continues, as of old, to plead for its ultimates—the fact that one is totally ineffectual being decently concealed by an impressive terminology. (Stevenson 1963, pp. 114–5) Many so-called moral theories do not even attempt to explain or justify common morality but are used to generate guides to conduct intended to replace common morality. These proposed moral guides, those generated by all of the standard consequentialist, contractarian, and deontological theories, are far simpler than the common moral system and sometimes yield totally unacceptable answers to moral problems. Since these philosophers who put forward these theories have usually dismissed common morality as confused, they are completely unaware of the complexity involved in making moral decisions and judgments. It is not surprising that many who take morality seriously and try to apply it to real problems faced by actual people are so critical of moral theory. (Bernard Gert 1998, p. 6) As both Stevenson and Gert note, ethics requires social and other sciences for by its very nature, ethics is a practical enterprise.

Netherlands in Pictures Francesca DiPiazza, 2010-08-01 Reviews the geography, climate, wildlife, history, politics, culture, economy, and government of the Netherlands.

*Passport to Success* Jeanette S. Martin, Lillian H. Chaney, 2008-11-30 Like it or not, every business—even one conducted from the kitchen table—is global. No matter the industry, employees now routinely travel to other countries or interact with foreign customers, vendors, or fellow employees. Or they conduct business over the phone, via e-mail, or through video links. As a result, they have to understand international customs and etiquette or risk losing customers or botching business relations. And understanding business customs in other

cultures isn't merely playing good defense—it often leads to new products or service enhancements that help an enterprise grow. In *Passport to Success*, Jeanette Martin and Lillian Chaney apply their expertise in business etiquette, training, and intercultural communications to present a practical guide to conducting business successfully around the world. Each chapter in this book presents in-depth information on the business environment and culture in the top twenty trading partners of the United States: Canada, Mexico, Japan, China, United Kingdom, Germany, South Korea, Netherlands, France, Singapore, Taiwan, Belgium, Australia, Brazil, Hong Kong, Switzerland, Malaysia, Italy, India, and Israel. Chapters contain both practical tips and illustrative examples, and the book concludes with a listing of resources (books, magazines, organizations, and Web sites) for additional information. In addition, *Passport to Success* contains useful overview material that will help business people plan a trip abroad or a campaign to win customers in another country. Besides trade statistics and information on global trade agreements, readers will find information on using the Internet productively to conduct or seek business, how women can succeed in countries with traditional, male-oriented business cultures, how to build cross-cultural relationships, and ways language can enhance—or obstruct—business dealings. Every businessperson is now a player in the global market for goods and services. This book provides valuable tips that will help people avoid missteps and increase their sales and personal success when dealing with counterparts in other countries.

**Concise Manual of Hematology and Oncology** Michael Andreeff, Dietmar P. Berger, Benjamín Koziner, Monika Engelhardt, Hans A. Messner, Hartmut Henß, Roland Mertelsmann, N. Thatcher, 2008-05-16 A real boon for medical practitioners from a number of disciplines, this is a practice-oriented manual of medical oncology and hematology for day-to-day use in caring for patients' hematologic and neoplastic

diseases. It is founded on the longstanding experience of a large specialized university department accustomed to having to provide reliable advice in a broad range of circumstances. The authors have chosen not to give a comprehensive review of the various subjects but have instead focused on practical methods which have proven to be useful in their experience, with special emphasis on standardizing chemotherapy protocols.

**Shaping Education Policy** Douglas E. Mitchell, Robert L. Crowson, Dorothy Shipps, 2011-06-01 Shaping Education Policy is a comprehensive overview of education politics and policy during the most turbulent and rapidly changing period in American history. Respected scholars review the history of education policy to explain the political powers and processes that shape education today. Chapters cover major themes that have influenced education, including the civil rights movement, federal involvement, the accountability movement, family choice, and development of nationalization and globalization. Sponsored by the Politics of Education Association, this edited collection examines the tumultuous shifts in education policy over the last six decades and projects the likely future of public education. This book is a necessary resource for understanding the evolution, current status, and possibilities of educational policy and politics.

*Agricultural Biotechnology and Intellectual Property* Jay P. Kesan, 2007-01-01 Scientists are becoming progressively more involved in developing methods for increasing agricultural productivity and designing plants with certain qualities. As such, genetic engineering has given plant breeders a means to exercise property rights over different varieties of plants. This has created many implications and given way to much controversy, with most objections being raised against the idea of owning life. With the use of comparative studies, this book discusses the legal, agribusiness and public policy issues that connect intellectual property protection with advancements in agricultural biotechnology.

*The Media, the Public and Agricultural Biotechnology*

Dominique Brossard, James Shanahan, T. Clint Nesbitt, This book reviews the literature on communication about biotechnology. Other books deal with this topic, however this book with the use of case studies, looks at public opinion data, communication theory, and international examples; to provide a complementary overview of how the public sees this controversial topic.

**The Insanity Defense the World Over** Simon, Ahn-Redding, 2008-07-02 The Defense of Insanity, The World Over is the 10th in a series of books that examines and compares social issues or social problems from an explicitly comparative perspective. This volume examines and compares the criteria and procedures surrounding the defense of insanity across twenty-two countries. In addition to the criteria for each of the countries, Simon and Ahn-Redding report the burden of proof; whether this burden is on the side of the defense or the prosecution; the degree, beyond a reasonable doubt or by a preponderance of the evidence; the form the verdict takes; who typically decides, a judge or a jury; what role experts play in the proceedings; and what happens to the defendant if he or she is found not guilty by reason of insanity. The Defense of Insanity, The World Over provides a history of the defense of insanity going as far back as ancient Greek and Roman societies including the development of the defense in modern legal codes beginning with the British criteria in 1265. This one-of-a-kind study also looks at how the defense of insanity is treated in Jewish and Islamic law. Simon and Ahn-Redding have crafted an expert study that will appeal to scholar of sociology, criminal justice, and international studies.

The Road Vasily Grossman, 2010-09-28 The Road rings together short stories, journalism, essays, and letters by Vasily Grossman, the author of Life and Fate, providing new insight into the life and work of this extraordinary writer. The stories range from Grossman's first success, "In the Town of Berdichev," a piercing reckoning with the cost of war, to such haunting later

works as “Mama,” based on the life of a girl who was adopted at the height of the Great Terror by the head of the NKVD and packed off to an orphanage after her father’s downfall. The girl grows up struggling with the discovery that the parents she cherishes in memory are part of a collective nightmare that everyone else wishes to forget. The Road also includes the complete text of Grossman’s harrowing report from Treblinka, one of the first anatomies of the workings of a death camp; “The Sistine Madonna,” a reflection on art and atrocity; as well as two heartbreaking letters that Grossman wrote to his mother after her death at the hands of the Nazis and carried with him for the rest of his life. Meticulously edited and presented by Robert Chandler, The Road allows us to see one of the great figures of twentieth-century literature discovering his calling both as a writer and as a man.

A Question of Balance Brenda J. Norton, 2016-01-21 This book offers a cross-national analysis of judicial decisions and legislative action in three religiously pluralistic Western democracies—the United States, France, and the Netherlands—that shows how each balances individual rights with communal bonds and adheres to or retreats from human rights norms for women and religious practices.

Queer(ing) Russian Art Brian James Baer, Yevgeniy Fiks, 2023-08-22 While the topic of queer sexuality in imperial Russia and the Soviet Union has been investigated for decades by scholars working in the fields of sociology, history, literary studies, and musicology, it has yet to be studied in any comprehensive or systematic way by those working in the visual arts. *Queer(ing) Russian Art: Realism, Revolution, Performance* is meant to address this lacuna by providing a platform for new scholarship that connects Russian art with queerness in a variety of ways. Situated at the intersection of Visual Studies and Queer Studies and working from different theoretical and disciplinary perspectives, the contributors expose and explore the queer

imagery and sensibilities in works of visual art produced in pre-Soviet, Soviet and post-Soviet contexts and beneath the surface of conventional histories of Russian and Soviet art.

**Business Statistics on the Web** Paula Berinstein, 2003 This practical guide shows researchers how to tap the Internet for statistics about companies, markets, and industries; how to organize and present statistics; and how to evaluate them for reliability.

**Liberation from Allergies** Chris D. Meletis, 2009-07-08 In this comprehensive book, a naturopath explains why allergies occur and what works—and doesn't—to alleviate them. Millions of Americans suffer with allergies, yet medicine has yet to determine exactly what causes a person to be allergic. In this comprehensive book, naturopath Chris D. Meletis examines a wide-range of allergies, including those to foodstuffs, dust and other airborne allergens, and materials like latex and chemicals. He explores theories of why allergies occur and are rising, including the hygiene hypothesis, which argues that overbathing and overuse of antibiotics and antibacterial agents means our immune systems never build up the necessary resistance to these substances when we are young.
