Schlieren and Shadowgraph Techniques G.S. Settles,2012-12-06 Schlieren and shadowgraph techniques are basic and valuable tools in various scientific and engineering disciplines. They allow us to see the invisible: the optical inhomogeneities in transparent media like air, water, and glass that otherwise cause only ghostly distortions of our normal vision. These techniques are discussed briefly in many books and papers, but there is no up-to-date complete treatment of the subject before now. The book is intended as a practical guide for those who want to use these methods, as well as a resource for a broad range of disciplines where scientific visualization is important. The colorful 400-year history of these methods is covered in an extensive introductory chapter accessible to all readers.

The modules have been prepared with the purpose of serving as practical guides for practitioners, as well as educational material for those who wish to learn more about specific topics within the field of rural electrification and the electric cooperative model. The overall objective of these modules is to improve rural electrification project design, implementation, construction, and system operation, ultimately leading to a higher quality and more reliable electric service for those consumers involved.

PoC or GTFO Manul Laphroaig,2017-10-31 This highly anticipated print collection gathers articles published in the much-loved International Journal of Proof-of-Concept or Get The Fuck Out. PoC||GTFO follows in the tradition of Phrack and Uninformed by publishing on the subjects of offensive security research, reverse engineering, and file format internals. Until now, the journal has only been available online or printed and distributed for free at hacker conferences worldwide. Consistent with the journal's quirky, biblical style, this book comes with all the trimmings: a leatherette cover, ribbon bookmark, bible paper, and gilt-edged pages. The book features more than 80 technical essays from numerous famous hackers, authors of classics like Reliable Code Execution on a Tamagotchi, ELFs are Dorky, Elves are Cool, Burning a Phone, Forget Not the Humble Timing Attack, and A Sermon on Hacker Privilege. Twenty-four full-color pages by Ange Albertini illustrate many of the clever tricks described in the text.

AU-18 Space Primer Air Command Staff College,2012-08-01 The US National Space Policy released by the president in 2006 states that the US government should develop space professionals. As an integral part of that endeavor, AU-18, Space Primer, provides to the joint war fighter an unclassified resource for understanding the capabilities, organizations, and operations of space forces. This primer is a useful tool both for individuals who are not space aware-unacquainted with space capabilities, organizations, and operations-and for those who are space aware, especially individuals associated with the space community, but not familiar with space capabilities, organizations, and operations outside their particular areas of expertise. It is your guide and your invitation to all the excitement and opportunity of space. Last published in 1993, this updated version of the Space Primer has been made possible by combined efforts of the Air Command and Staff College's academic year 2008 Jointspacemindedness and Operational Space research seminars, as well as select members of the academic year 2009 Advanced Space research seminar. Written by two white hat hackers, this book is aimed at making vital information known so that you can find ways to secure your Mac OS X systems, and examines the sorts of attacks that are prevented by Leopard's security defenses, what attacks aren't, and how to best handle those weaknesses.

Future U.S. Workforce for Geospatial Intelligence National Research Council,Policy and Global Affairs,Board on Higher Education and Workforce,Division on Earth and Life Studies,Board on Earth Sciences and Resources,Committee on the Future U.S. Workforce for Geospatial Intelligence,2013-04-28 We live in a changing world with multiple and evolving threats to national security, including terrorism, asymmetrical warfare (conflicts between agents with different military powers or tactics), and social unrest. Visually depicting and assessing these threats using imagery and other geographically-referenced information is the mission of the National Geospatial-Intelligence Agency (NGA). As the nature of the threat evolves, so do the tools, knowledge, and skills needed to respond. The challenge for NGA is to maintain a workforce that can deal with evolving threats to national security, ongoing scientific and technological advances, and changing skills and expectations of workers. Future U.S. Workforce for Geospatial Intelligence assesses the supply of expertise in 10 geospatial intelligence (GEOINT) fields, including 5 traditional areas (geodesy and geophysics, photogrammetry, remote sensing, cartographic science, and geographic information systems and geospatial analysis) and 5 emerging areas that could improve geospatial intelligence (GEOINT fusion, crowdsourcing, human geography, visual analytics, and forecasting). The report also identifies gaps in expertise relative to NGA's needs and suggests ways to ensure an adequate supply of geospatial intelligence expertise over the next 20 years.

High-Performance and Specialty Fibers Japan The Society of Fiber Science and Techno,2016-08-16 This book reviews the key technologies and characteristics of the modern man-made specialty fibers mainly developed in Japan. Since the production of many low-cost man-made fibers shifted to China and other Asian countries, Japanese companies have focused on production of high-quality, high-performance super fibers as well as highly functionalized fibers so-called 'Shin-gosen'. Zylon™ and Dyneema™ manufactured by Toyobo, Technora™ produced by Teijin, and Vectran™ developed by Kuraray are those examples of super fibers. Carbon fibers Torayca™ from Toray have occupied the most advanced high-performance application area. Various types of polyester fibers having design-shaped cross-sections and special fiber morphologies and those showing specific physico-chemical properties have also been developed to acquire a high-value textile market of the world. This book describes how these high-tech fibers have been developed and what aspects are the most important in each fiber based on its structure-property relationship. Famous specialists both in industry and academia are responsible for the contents, explaining the design concepts and the special technologies for the production of these special fibers. For university teachers and students, this volume is an excellent textbook that elucidates the basic concepts of modern fibers. At the same time, researchers, both in academia and industry, will find a comprehensive overview of recent man-made fibers. This publication, presenting the most easily understandable general survey of specialty man-made fibers to date, is dedicated to the 70th-anniversary of

the Society of Fiber Science and Technology, Japan.

Digital Media Distribution Paul McDonald,Courtney Brannon Donoghue,Timothy Havens,2021-09-07 A deep dive into the new era of digital content production and distribution In the twenty-first century, the platforms that both create and host content have become nearly as important as media itself. Companies such as Netflix, Spotify, and YouTube have attained a massive hold on the public imagination and have become an almost ineluctable part of people's everyday lives. While the workings of media distribution had until very recently remained inconsequential to the average consumer, the recent popularization of various online platforms has made the question of distribution immediate to everyone. Digital Media Distribution: Portals, Platforms, Pipelines provides a timely examination of the multifaceted distribution landscape in a moment of transformation and conceptualizes media distribution as a complex site of power, privilege, and gatekeeping. These tensions have local, national, and global consequences on the autonomy of creative workers, as well as on how we gain access to, engage with, and understand cultural products. Drawing on original research into distribution practices in industries as diverse as television, film, videogames, literature, and adult entertainment, each chapter explores how digitization has changed media distribution and its broader economic, industrial, social, and cultural implications. Bringing together experts from around the world and across the media industries, Digital Media Distribution: Portals, Platforms, Pipelines presents a vast array of critical approaches and illustrative case studies for understanding the factors that have an impact on the way media travels and moves throughout our digital lives.

Enceladus and the Icy Moons of Saturn Paul M. Schenk,Roger N. Clark,Carly J. A. Howett,Anne J. Verbiscer,J. Hunter Waite,2018-11-27 With active geysers coating its surface with dazzlingly bright ice crystals, Saturn's large moon Enceladus is one of the most enigmatic worlds in our solar system. Underlying this activity are numerous further discoveries by the Cassini spacecraft, tantalizing us with evidence that Enceladus harbors a subsurface ocean of liquid water. Enceladus is thus newly realized as a forefront candidate among potentially habitable ocean worlds in our own solar system, although it is only one of a family of icy moons orbiting the giant ringed planet, each with its own story. As a new volume in the Space Science Series, Enceladus and the Icy Moons of Saturn brings together nearly eighty of the world's top experts writing more than twenty chapters to set the foundation for what we currently understand, while building the framework for the highest-priority questions to be addressed through ongoing spacecraft exploration. Topics include the physics and processes driving the geologic and geophysical phenomena of icy worlds, including, but not limited to, ring-moon interactions, interior melting due to tidal heating, ejection and reaccumulation of vapor and particulates, ice tectonics, and cryovolcanism. By contextualizing each topic within the profusion of puzzles beckoning from among Saturn's many dozen moons, Enceladus and the Icy Moons of Saturn synthesizes planetary processes on a broad scale to inform and propel both seasoned researchers and students toward achieving new advances in the coming decade and beyond.

III-Nitride Based Light Emitting Diodes and Applications Tae-Yeon Seong,Jung Han,Hiroshi Amano,Hadis Morkoc,2014-07-08 Light emitting diodes (LEDs) are already used in traffic signals, signage lighting, and automotive applications. However, its ultimate goal is to replace traditional illumination through LED lamps since LED lighting significantly reduces energy consumption and cuts down on carbon-dioxide emission. Despite dramatic advances in LED technologies (e.g., growth, doping and processing technologies), however, there remain critical issues for further improvements yet to be achieved for the realization of solid-state lighting. This book aims to provide the readers with some contemporary LED issues, which have not been comprehensively discussed in the published books and, on which the performance of LEDs is seriously dependent. For example, most importantly, there must be a breakthrough in the growth of high-quality nitride semiconductor epitaxial layers with a low density of dislocations, in particular, in the growth of Al-rich and In-rich GaN-based semiconductors. The materials quality is directly dependent on the substrates used, such as sapphire, Si, etc. In addition, efficiency droop, growth on different orientations and polarization are also important. Chip processing and packaging technologies are key issues. This book presents a comprehensive review of contemporary LED issues. Given the interest and importance of future research in nitride semiconducting materials and solid state lighting applications, the contents are very timely. The book is composed of chapters written by leading researchers in III-nitride semiconducting materials and device technology. This book will be of interest to scientists and engineers working on LEDs for lighting applications. Postgraduate researchers working on LEDs will also benefit from the issues this book provides.

Beautiful Code Greg Wilson,Andy Oram,2007-06-26 How do the experts solve difficult problems in software development?
