On a Method of Multiprogramming W.H.J. Feijen,A.J.M. van Gasteren,2013-06-29 Here, the authors propose a method for the formal development of parallel programs - or multiprograms as they prefer to call them. They accomplish this with a minimum of formal gear, i.e. with the predicate calculus and the well- established theory of Owicki and Gries. They show that the Owicki/Gries theory can be effectively put to work for the formal development of multiprograms, regardless of whether these algorithms are distributed or not.

Fundamentals of Telemedicine and Telehealth Shashi Gogia,2019-10-27 Fundamentals of Telemedicine and Telehealth provides an overview on the use of information and communication technologies (ICTs) to solve health problems, especially for people living in remote and underserved areas. With the advent of new technologies and improvement of internet connectivity, telehealth has become a new subject requiring a new understanding of IT devices and how to utilize them to fulfill health needs. The book discusses topics such as digitizing patient information, technology requirements, existing resources, planning for telehealth projects, and primary care and specialized applications. Additionally, it discusses the use of telemedicine for patient empowerment and telecare in remote locations. Authored by IMIA Telehealth working group, this book is a valuable source for graduate students, healthcare workers, researchers and clinicians interested in using telehealth as part of their practice or research. Presents components of healthcare that can be benefitted from remote access and when to rely on them Explains the current technologies and tools and how to put them to effective use in daily healthcare Provides legal provisions for telehealth implementation, discussing the risks of remote healthcare provision and cross border care

Jews Who Rock Guy Oseary,2016-09-27 Foreword by Ben Stiller Afterword by Perry Farrell Jewish achievement in the sciences? Celebrated. Jews in literature? Lionized. But until now, there's been no record of the massive contributions of Jews in Rock n' Roll. Jews Who Rock features 100 top Jewish rockers, from Bob Dylan to Adam Horowitz, Courtney Love (yes, she's half Jewish) to John Zorn, with a

IOL Power Kenneth J. Hoffer, 2011 IOL Power by Kenneth J. Hoffer, MD will be the definitive resource worldwide for ophthalmologists who strive to increase the accuracy for all IOL calculations, especially for multifocal IOLs and overcoming the challenges that arise when treating patients that have had laser refractive surgery, such as RK, PRK, LASIK, and LASEK. Inside the pages of IOL Power, Dr. Hoffer is joined by some of the most respected international physicians and physicists in the field of IOL power such as Aramberri, Haigis, Norrby, Olsen and Shammas. Together their expertise, spanning over 35 years, makes even the most difficult subjects easy to understand. This volume will become the definitive reference source on the subject of IOL power calculation. Some topics include: * Ultrasound velocities for axial length measurement * Optical AL (IOLMaster and Lenstar) in difficult eyes * Manual and automatic keratometry and instrumentation * Topography & Scheimpflug camera corneal power * Value of theoretic formulas * Formula personalization * Multifocal and toric IOLs * Aspheric IOLs * Effect of IOL tilt on astigmatism Chapters Cover: * All aspects of obtaining the most accurate biometry * Available modern calculation formulas * Latest instruments * Problems that can arise, how to prevent and repair them IOL Power by Kenneth J. Hoffer, MD is structured in a logical manner so as to cover every facet of IOL power from the basics to the most complicated subjects to achieve the most accurate and precise calculations and should be in the hands of all ophthalmic surgeons, technicians, residents and students.

Peeking at Peak Oil Kjell Aleklett, 2012-05-19 The term "Peak Oil" was born in January 2001 when Colin Campbell formed the Association for the Study of Peak Oil & Gas (ASPO). Now, Peak Oil is used thousands of times a day by journalists, politicians, industry leaders, economists, scientists and countless others around the globe. Peak Oil is not the end of oil but it tells us the end is in sight. Anyone interested in food production, economic growth, climate change or global security needs to understand this new reality. In Peeking at Peak Oil Professor Kjell Aleklett, President of ASPO International and head of the world's leading research group on Peak Oil, describes the decade-long journey of Peak Oil from extremist fringe theory to today's accepted fact: Global oil production is entering terminal decline. He explains everything you need to know about Peak Oil and its world-changing consequences from an insider's perspective. In simple steps, Kjell tells us how oil is formed, discovered and produced. He uses science to reveal the errors and deceit of national and international oil authorities, companies and governments too terrified to admit the truth. He describes his personal involvement in the intrigues of the past decade. What happens when a handful of giant oil fields containing two thirds of our planet's oil become depleted? Will major oil consumers such as the EU and US face rationing within a decade? Will oil producing nations conserve their own oil when they realize that no one can export oil to them in the future? Does Peak Oil mean Peak Economic Growth? If you want to know the real story about energy today and what the future has in store, then you need to be "Peeking at Peak Oil".

Janice VanCleave's A+ Projects in Chemistry Janice VanCleave, 1993-08-30 Janice VanCleave's A+ Projects in Chemistry Are you having a hard time coming up with a good idea for the science fair? e-Learning Ecologies Bill Cope, Mary Kalantzis, 2017-02-17 e-Learning Ecologies explores

transformations in the patterns of pedagogy that accompany e-learning—the use of computing devices that mediate or supplement the relationships between learners and teachers—to present and assess learnable content, to provide spaces where students do their work, and to mediate peer-to-peer interactions. Written by the members of the new learning research group, this textbook suggests that e-learning ecologies may play a key part in shifting the systems of modern education, even as technology itself is pedagogically neutral. The chapters in this book aim to create an analytical framework with which to differentiate those aspects of educational technology that reproduce old pedagogical relations from those that are genuinely innovative and generative of new kinds of learning. Featuring case studies from elementary schools, colleges, and universities on the practicalities of new learning environments, *e-Learning Ecologies* elucidates the role of new technologies of knowledge representation and communication in bringing about change to educational institutions.

Military Operations and the Notion of Control Under International Law Rogier Bartels, Jeroen C. van den Boogaard, Paul A. L. Ducheine, Eric Pouw, Joop Voetelink, 2021-08-22 This book is a tribute to the work of Professor Terry Gill, offered to him by friends and colleagues who are also academics and/or practitioners in the field of International Law of Military Operations (ILMO). ILMO is a distinct sub-discipline within public international law and domestic public law, covering all domains of military operations: land, sea, air and (cyber)space. As such, ILMO includes elements of other branches of public international law, such as international humanitarian law, human rights law, the law on the use of force, the law of the sea, the law of State responsibility, arms control law and the law of international organisations. Importantly, as a hybrid field of law, ILMO covers the legal basis for military deployment both nationally and internationally, as well as the subsequent international legal regimes applicable to the forces (once deployed) and the domestic administrative and constitutional issues related to the relevant forces. Control is a central notion of ILMO and is the leading theme of this book. The contributions in this book reflect the variety of legal frameworks applicable to military operations and offer an insightful view into the various legal and factual roles of control. The legal notion of control is considered, inter alia, in relation to restraints in the decision to deploy military forces and the legal basis for doing so. The impact of control is also discussed in relation to State and command responsibility and in different situations, including during peace operations, occupation and other situations of armed conflict. Additionally, control is considered over the armed forces themselves, over detainees migrants at sea and over the type or scale of force used in military operations, through targeting rules or rules of engagement. Furthermore, the book contains several discussions of control in the case law of international courts, within arms control law, weapons law and in the context of autonomous weapons systems. The editors of the book are all practitioners, academically affiliated to the Faculty of Military Sciences (War Studies) of the Netherlands Defence Academy and/or the Law Faculty of the University of Amsterdam.
