Web Security Hanqing Wu, Liz Zhao, 2015-04-06 In late 2013, approximately 40 million customer debit and credit cards were leaked in a data breach at Target. This catastrophic event, deemed one of the biggest data breaches ever, clearly showed that many companies need to significantly improve their information security strategies. *Web Security: A White Hat Perspective* presents a comprehensive guide to web security technology and explains how companies can build a highly effective and sustainable security system. In this book, web security expert Wu Hanqing reveals how hackers work and explains why companies of different scale require different security methodologies. With in-depth analysis of the reasons behind the choices, the book covers client script security, server applications security, and Internet company security operations. It also includes coverage of browser security, cross sites script attacks, click jacking, HTML5/PHP security, injection attacks, authentication, session management, access control, web frame security, DDOS, leaks, Internet transactions security, and the security development lifecycle.

**Sound, Music, and Motion** Mitsuko Aramaki, Olivier Derrien, Richard Kronland-Martinet, Sølvi Ystad, 2014-12-04 This book constitutes the thoroughly refereed post-conference proceedings of the 10th International Symposium on Computer Music Modeling and Retrieval, CMMR 2013, held in Marseille, France, in October 2013. The 38 conference papers presented were carefully reviewed and selected from 94 submissions. The chapters reflect the interdisciplinary nature of this conference with following topics: augmented musical instruments and gesture recognition, music and emotions: representation, recognition, and audience/performers studies, the art of sonification, when auditory cues shape human sensorimotor performance, music and sound data mining, interactive sound synthesis, non-stationarity, dynamics and mathematical modeling, image-sound interaction, auditory perception and cognitive inspiration, and modeling of sound and music computational musicology.

**Stealing The Network** Syngress, 2003-05-19 *Stealing the Network: How to Own the Box* is NOT intended to be a install, configure, update, troubleshoot, and defend book. It is also NOT another one of the countless Hacker books out there. So, what IS it? It is an edgy, provocative, attack-oriented series of chapters written in a first hand, conversational style. World-renowned network security personalities present a series of 25 to 30 page chapters written from the point of an attacker who is gaining access to a particular system. This book portrays the street fighting tactics used to attack networks and systems. Not just another hacker book, it plays on edgy market success of *Steal This Computer Book* with first hand, eyewitness accounts A highly provocative expose of advanced security exploits Written by some of the most high profile White Hats, Black Hats and Gray Hats Gives readers a first ever look inside some of the most notorious network intrusions

**Adaptive, tolerant and efficient composite structures** Martin Wiedemann, Michael Sinapius, 2014-09-20 Composite structures are most efficient in performance and production cost when combined with smart materials making them adaptable to changing operational conditions. The specific production processes of composites offer the possibility to integrate more functions thus making the structure more valuable. Active functions can be realized by smart materials, e.g. morphing, active vibration control, active structure acoustic control or structure health monitoring. The foundation is a sound understanding of materials, design methods, design principles, production technologies and adaptronics. Along the complete process chain this disciplines together deliver advanced lightweight solutions for applications ranging from mechanical engineering to vehicles, airframe and finally space structures. This book provides the scientific foundations as well as inspiring new ideas for engineers working in the field of composite lightweight structures.

*Oxford Picture Dictionary* Jayme Adelson-Goldstein, Norma Shapiro, 2016-10-31 The OPD Third Canadian Edition is an illustrated, theme-based dictionary for second-language learners. This four-colour dictionary defines words through pictures, and presents each new word in context. The OPD, along with its workbooks and many other components, can be used as a reference book or as text for high school or adult ESL students at the beginner level. For years, the Canadian edition of the OPD has been the industry leader among picture dictionaries. The new edition is a revision which updates and refreshes some existing content, adds new content, and makes some improvements based on market research and what users like most in the competition. The OPD is designed for use both in and out of the classroom. Speaking exercises are presented throughout the OPD to allow students to practise new vocabulary in pairs or small groups. Specific Canadian Features: In addition to the updating and refreshing, the following topics have been specifically Canadianized: \* health care \* government, military service, civic engagement, driver licensing Change details in 3e: \* 10 New Pages \* 45 new or revised large- and medium-size illustrations and tech art \* 37 new photos and 2 realia revisions \* 150 new and 52 revised Spot Illustrations \* more than 562 word modifications (new words or changes)

*Our Digital World: Introduction to Computing* Jon Gordon, Karen Lankisch, Nancy Muir, Denise Seguin, Anita Verno, 2012-07-30 Today's post secondary students tend to be highly connected. They engage with a variety of technologies in a typical day. Our Digital World combines online activities and textbook resources to create an innovative hybrid learning product that appeals to contemporary students. It captures the excitement of cutting-edge technology developments and inspires students to explore topics and related ethical and security issues through videos, online research, and hands-on activities.

Transactions on Edutainment IX Zhigeng Pan, Adrian David Cheok, Wolfgang Mueller, Fotis Liarokapis, 2013-03-16 This journal subline serves as a forum for stimulating and disseminating innovative research ideas, theories, emerging technologies, empirical investigations, state-of-the-art methods, and tools in all different genres of edutainment, such as game-based learning and serious games, interactive storytelling, virtual learning environments, VR-based education, and related fields. It covers aspects from educational and game theories, human-

computer interaction, computer graphics, artificial intelligence, and systems design. This issue contains a special section on serious games with 8 outstanding contributions from the VS-Games 2011 conference; furthermore, there are 13 regular papers. These contributions clearly demonstrate the use of serious games and virtual worlds for edutainment applications and form a basis for further exploration and new ideas.

**Moon-face and Other Stories** Jack London, 1906 JACK LONDON (1876-1916), American novelist, born in San Francisco, the son of an itinerant astrologer and a spiritualist mother. He grew up in poverty, scratching a living in various legal and illegal ways -robbing the oyster beds, working in a canning factory and a jute mill, serving aged 17 as a common sailor, and taking part in the Klondike gold rush of 1897. This various experience provided the material for his works, and made him a socialist. The son of the Wolf (1900), the first of his collections of tales, is based upon life in the Far North, as is the book that brought him recognition, The Call of the Wild (1903), which tells the story of the dog Buck, who, after his master's death, is lured back to the primitive world to lead a wolf pack. Many other tales of struggle, travel, and adventure followed, including The Sea-Wolf (1904), White Fang (1906), South Sea Tales (1911), and Jerry of the South Seas (1917). One of London's most interesting novels is the semi-autobiographical Martin Eden (1909). He also wrote socialist treatises, autobiographical essays, and a good deal of journalism.

Smart Energy Strategies ,2008 The enormous challenge of creating a longterm sustainable energy system calls for the participation of engineers, natural and social scientists. They can contribute both through their research and by helping to craft strategies that steer the future development of the system. A sustainable energy system cannot be developed by technical fixes alone; action is required on a broad front, including institutional and regulatory changes. There is an abundance of scientific evidence on which to base decisions on how to proceed. Still, research has a crucial role to play as well. Smart Energy Strategies highlights smart solutions: advances in technical and social-science energy research, particularly advances related to new information technology (e.g. control and communication); and experience with targeted applications of information technology in the supply and consumption of energy. The conference has focused on smart strategies taking into account current technical and institutional systems, with their inertia and shortcomings; future energy-related challenges: energy security; the growing energy needs of the disadvantaged; and unintended consequences of energy systems, particularly climate change but also uncontrolled money flows; smart technical, institutional, and regulatory mechanisms for meeting these challenges.

Analytical Molecular Biology Helen Parkes, V (Ginny) Saunders, 2007-10-31 In spite of the wide variety and complexity of biological materials, nucleic acids are ubiquitous. DNA is becoming the bioanalyte of choice due to the vast amount of information embedded in its sequence, its robust chemical nature and the range of highly sensitive analytical techniques that have been developed. The results of such analyses can have an important impact on our society both commercially and in terms of the quality of life. Absolute confidence in the data generated is therefore of the utmost importance. This book, produced by LGC as part of the VAM (Valid Analytical Measurement) Programme, introduces the issues of validation and quality to the bioanalytical community, specifically addressing DNA-based analyses. It aims to raise awareness of the factors that can influence the validity of DNA analysis and the production of quality data. Emphasis is placed on VAM principles, as well as additional challenges that are associated with the analysis of real samples, for example, complex food matrices or forensic samples that have been subjected to environmental insult. Information is collated from a variety of sources including literature, discussions and LGC research, and offers constructive advice where possible.

*Oral History Meets Linguistics* Erich Kasten, Katja Roller, Joshua Wilbur, 2017-05-22 Oral histories constitute a common source of research data for linguists, historians, as well as for social and cultural anthropologists.

However, respective discourses on this theme have rarely been interdisciplinary. During a workshop at the Freiburg Institute for Advanced Studies (FRIAS) in December 2015, it became apparent how scientists from various fields of research can benefit from such an intellectual exchange. With its contributions to minority languages and linguistic contact varieties this volume aims at bridging this gap by providing multifaceted interdisciplinary views on diverse approaches to oral history research. This volume contains contributions by Lyudmila S. Bogoslovskaya, Michael Duerr, Ophira Gamliel, Annette Gerstenberg, Erich Kasten, Sonya Kinsey, Igor Krupnik, Cord Pagenstecher, Stefan Pf nder, Michael Riessler, Katja Roller, and Joshua Wilbur.
