The Labyrinth Index Charles Stross,2018-10-30 “A bizarre yet effective yoking of the spy and horror genres.” —The Washington Post Book World The Lovecraftian Singularity has descended upon the world in The Labyrinth Index, beginning an exciting new story arc in Charles Stross' Hugo Award-winning Laundry Files series! Since she was promoted to the head of the Lords Select Committee on Sanguinary Affairs, every workday for Mhari Murphy has been a nightmare. It doesn't help that her boss, the new Prime Minister of Britain, is a manipulative and deceptive pain in the butt. But what else can she expect when working under the thumb of none other than the elder god N'yar Lat-Hotep a.k.a the Creeping Chaos? Mhari's most recent assignment takes her and a ragtag team of former Laundry agents across the pond into the depths of North America. The United States president has gone missing. Not that Americans are alarmed. For some mysterious reason, most of the country has forgotten the executive branch even exists. Perhaps it has to do with the Nazgûl currently occupying the government and attempting to summon Cthulhu. It's now up to Mhari and her team to race against the Nazgûl's vampire-manned dragnet to find and, for his own protection, kidnap the president. Who knew an egomaniacal, malevolent deity would have a soft spot for international relations? Let's Pretend This Never Happened Jenny Lawson,2013-03-05 The #1 New York Times bestselling (mostly true) memoir from the hilarious author of *Furiously Happy*. “Gaspingly funny and wonderfully inappropriate.”—O, The Oprah Magazine When Jenny Lawson was little, all she ever wanted was to fit in. That dream was cut short by her fantastically unbalanced father and a morbidly eccentric childhood. It did, however, open up an opportunity for Lawson to find the humor in the strange shame-spiral that is her life, and we are all the better for it. In the irreverent *Let's Pretend This Never Happened*, Lawson's long-suffering husband and sweet daughter help her uncover the surprising discovery that the most terribly human moments—the ones we want to pretend never happened—are the very same moments that make us the people we are today. For every intellectual misfit who thought they were the only ones to think the things that Lawson dares to say out loud, this is a poignant and hysterical look at the dark, disturbing, yet wonderful moments of our lives. On Art and Science Shyam Wuppuluri, Dali Wu,2019-11-02 Einstein once remarked After a certain high level of technical skill is achieved, science and art tend to coalesce in aesthetics, plasticity, and form. The greatest scientists are always artists as well. In this volume, some of the world's leading thinkers come together to expound on the interrelations between sciences and arts. While one can segregate art and place it outside the scientific realm, it is, nevertheless, inextricably linked to our essential cognitive/emotional/perceptual modalities and abilities, and therefore lies alongside and in close contact with the method of science and philosophy. What inspiration can scientists draw from art and how can scientific spirit foster our understanding and creation of aesthetic works? How are art and science grounded in our cognition? What role does perception play in science and art? Are criteria for beauty in art and science the same? How does evolution shape our understanding of art? How do science, art and scientifico-artistic frameworks shape society as a whole and help us address its pressing issues? The epistemological and ontological aspects haunt artists, philosophers and scientists alike. The essays in this volume address these manifold questions while also elucidating the pragmatic role they play in our daily life.

Explainable and Interpretable Models in Computer Vision and Machine Learning Hugo Jair Escalante, Sergio Escalera, Isabelle Guyon, Xavier Baró, Yağmur Güçlütürk, Umut Güçlü, Marcel van Gerven,2018-11-29 This book compiles leading research on the development of explainable and interpretable machine learning methods in the context of computer vision and machine learning. Research progress in computer vision and pattern recognition has led to a variety of modeling techniques with almost human-like performance. Although these models have obtained astounding results, they are limited in their explainability and interpretability: what is the rationale behind the decision made? what in the model structure explains its functioning? Hence, while good performance is a critical required characteristic for learning machines, explainability and interpretability capabilities are needed to take learning machines to the next step to include them in decision support systems involving human supervision. This book, written by leading international researchers, addresses key topics of explainability and interpretability, including the following: · Evaluation and Generalization in Interpretable Machine Learning · Explanation Methods in Deep Learning · Learning Functional Causal Models with Generative Neural Networks · Learning Interpretable Rules for Multi-Label Classification · Structuring Neural Networks for More Explainable Predictions · Generating Post Hoc Rationales of Deep Visual Classification Decisions · Ensembling Visual Explanations · Explainable Deep Driving by Visualizing Causal Attention · Interdisciplinary Perspective on Algorithmic Job Candidate Search · Multimodal Personality Trait Analysis for Explainable Modeling of Job Interview Decisions · Inherent Explainability Pattern Theory-based Video Event Interpretations

This intensive volume presents its readily reproducible protocols with great clarity and consistency to best aid neuroscientists and neurobiologists

in laboratory testing and experimentation. Comprehensive and cutting-edge, *Animal Models of Acute Neurological Injuries* is an ideal guide for scientists and researchers who wish to pursue this vital course of study with the proficiency and precision that the field requires.

Animal Traffic Rosemary-Claire Collard,2020-08-24 Parrots and snakes, wild cats and monkeys---exotic pets can now be found everywhere from skyscraper apartments and fenced suburban backyards to roadside petting zoos. In *Animal Traffic* Rosemary-Claire Collard investigates the multibillion-dollar global exotic pet trade and the largely hidden processes through which exotic pets are produced and traded as lively capital. Tracking the capture of animals in biosphere reserves in Mexico, Guatemala, and Belize; their exchange at exotic animal auctions in the United States; and the attempted rehabilitation of former exotic pets at a wildlife center in Guatemala, Collard shows how exotic pets are fetishized both as commodities and as objects. Their capture and sale sever their ties to complex socio-ecological networks in ways that make them appear as if they do not have lives of their own. Collard demonstrates that the enclosure of animals in the exotic pet trade is part of a bioeconomic trend in which life is increasingly commodified and objectified under capitalism. Ultimately, she calls for a “wild life” politics in which animals are no longer enclosed, retain their autonomy, and can live for the sake of themselves.

Religion, Faith and Crime Kim Sadique,Perry Stanislas,2016-05-28 This unique collection brings together international contributors from a range of disciplines to explore crime and responses to crime through a religious/faith-based lens. At a time when religion is under the media spotlight in terms of religiously-motivated hate crime, terrorism and child abuse this book provides an important platform for academic debate. It examines these and other key issues including: faith as a coping strategy, religion as a motivating factor and the role of religion and morality in shaping criminal justice responses. Depression, Emotion and the Self Matthew Ratcliffe,Achim Stephan,2014-07-15 This volume addresses the question of what it is like to be depressed. Despite the vast amount of research that has been conducted into the causes and treatment of depression, the experience of depression remains poorly understood. Indeed, many depression memoirs state that the experience is impossible for others to understand. However, it is at least clear that changes in emotion, mood, and bodily feeling are central to all forms of depression, and these are the book's principal focus. In recent years, there has been a great deal of valuable philosophical and interdisciplinary research on the emotions, complemented by new developments in philosophy of psychiatry and scientifically-informed phenomenology. The book draws on all these areas, in order to offer a range of novel insights into the nature of depression experiences. To do so, it brings together a distinguished group of philosophers, psychiatrists, anthropologists, clinical psychologists and neuroscientists, all of whom have made important contributions to current research on emotion and/or psychiatric illness.

Arsenic in Groundwater M. Manzurul Hassan,Peter J. Atkins,2016-01-15 Arsenic-contaminated groundwater has created one of the world's largest environmental health crises. This book addresses the arsenic issue within a scientific and social science framework, with the context set by environmental and legal considerations. The text explores the methodological issues of spatial, quantitative, and qualitative enquiries on arsenic poisoning, for instance, using GIS to investigate the distribution of arsenic-laced water in space-time to uncover the pattern of variations over scales from meters to kilometers. The authors also include spatial risk maps that indicate the possible long-term strategies of mitigation.

The Hidden History of the Supreme Court and the Betrayal of America Thom Hartmann,2019-10-01 Thom Hartmann, the most popular progressive radio host in America and a New York Times bestselling author, explains how the Supreme Court has spilled beyond its Constitutional powers and how we the people should take that power back. Taking his typically in-depth, historically informed view, Thom Hartmann asks, What if the Supreme Court didn't have the power to strike down laws? According to the Constitution, it doesn't. From the founding of the republic until 1803, the Supreme Court was the final court of appeals, as it was always meant to be. So where did the concept of

judicial review start? As so much of modern American history, it began with the battle between the Federalists and Anti-Federalists, and with Marbury v. Madison. Hartmann argues it is not the role of the Supreme Court to decide what the law is but rather the duty of the people themselves. He lays out the history of the Supreme Court of the United States, since Alexander Hamilton's defense to modern-day debates, with key examples of cases where the Supreme Court overstepped its constitutional powers. The ultimate remedy to the Supreme Court's abuse of power is with the people--the ultimate arbiter of the law--using the ballot box. America does not belong to the kings and queens; it belongs to the people.
