The Meaning of Persons Paul Tournier, The Meaning of Persons, is a book classified as a book of Psychology of the personality. The author, doctor Paul Tourier, was a prolific writer, and the Father of some new paradigms in the medical field. Paul Tournier is a giant of medicine, psychology and the Christian faith. It was very interesting to consider that every person shows some outside unreal mask about him or herself. At the same time, every person must find, sincerely his own being. This is the central idea of the book, being from where the author takes his stand. Tournier assures that every man there is a part of impenetrable mystery even to himself. The relationships we maintain with our peers greatly depend on who we are. It is extremely important to improve ourselves in order to improve our relationships. If we are surrounded by people every day of our lives, then every effort that we put forth to improve our relationships, will be worthwhile. A human being is a whole within its self. The Swiss doctor in this book shows us many cases of people that were affected physically, and because of that began to suffer psychologically. A typical case would be the loss of an arm or leg. The person's whole personality is affected. This holistic vision of man helps us to realize that a person cannot be divided into parts or sections. Every man is an inseparable essence. From this truth, a new one can be derived. There are as many personalities as people on the face of the earth. While it may be possible to classify certain aspects of human personalities, every individual person manages his or her own personality. The person and the community are important for the author. In other words, a person could not exist outside of his or her community. Only in human inter-relationship can a person discover his or her real personality. From a spiritual point of view, this reminds me of something that the Bible tells us that the prophet Isaiah experienced when he was called to the ministry. When Isaiah saw God's glory, he became more aware of his own person. God cleanses Isaiah from sin and gives him a job to do in his community. That is why I consider that spiritual growth is the primary foundation to knowing oneself and others.

Energy Systems Modeling Hooman Farzaneh,2019-04-09 This book serves as an introductory reference guide for those studying the application of models in energy systems. The book opens with a taxonomy of energy models and treatment of descriptive and analytical models, providing the reader with a foundation of the basic principles underlying the energy models and positioning these principles in the context of energy system studies. In turn, the book provides valuable insights into the varied applications of different energy models to answer complex questions, including those concerning specific aspects of energy policy measures dealing with issues of supply and demand. Case studies are provided in all of the chapters, offering real-world examples of how existing models fit the classification methods outlined here. The book's remaining chapters address a broad range of principles and applications, taking the reader from the basic principles involved, to state-of-the-art energy production and consumption processes, using modeling and validation/illustration in case studies to do so. With its in-depth mathematical foundation, this book serves as a comprehensive collection of work on modeling energy systems and processes, taking inexperienced graduate students from the basics through to a high-level understanding of the modeling processes in question, while also providing professionals and academic researchers in the field of energy planning with an up-to-date reference guide covering the latest works.

Postmodern and Poststructural Approaches to Nursing Research Julianne Cheek,1999-11-18 In the first three chapters, the author examines definitions of postmodern and postcultural approaches and ways in which they can be used to influence and inform us about health care. Chapters 4 and 5 look at the practical aspects of proposing and carrying out research projects using these approaches. Cheek concludes by reviewing the intellectual journey required in coming to grips with the meaning and application of these approaches, and she suggests ways in which the reader can continue to grow in his or her pursuit.--BOOK JACKET.

Computer Graphics Through OpenGL® Sumanta Guha,2018-12-19 COMPREHENSIVE COVERAGE OF SHADERS AND THE PROGRAMMABLE PIPELINE From geometric primitives to animation to 3D modeling to lighting, shading and texturing, Computer Graphics Through OpenGL®: From Theory to Experiments is a comprehensive introduction to computer graphics which uses an active learning style to teach key concepts. Equally emphasizing theory and practice, the book provides an understanding not only of the principles of 3D computer graphics, but also the use of the OpenGL® Application Programming Interface (API) to code 3D scenes and animation, including games and movies. The remaining chapters explore more advanced topics, including the structure of curves and surfaces, applications of projective spaces and transformations and the implementation of graphics pipelines. This book can be used for introductory undergraduate computer graphics courses over one to two semesters. The careful exposition style attempting to explain each concept in the simplest terms possible should appeal to the self-study student as well. Moon-face and Other Stories Jack London,1906 JACK LONDON (1876-1916), American novelist, born in San Francisco, the son of an itinerant astrologer and a spiritualist mother. He grew up in poverty, scratching a living in various legal and illegal ways -robbing the oyster beds, working in a canning factory and a jute mill, serving aged 17 as a common sailor, and taking part in the Klondike gold rush of 1897. This various experience provided the material for his works, and made him a socialist. The son of the Wolf (1900), the first of his collections of tales, is based upon life in the Far North, as is the book that brought him recognition, The Call of the Wild (1903), which tells the story of the dog Buck, who, after his master's death, is lured back to the primitive world to lead a wolf pack. Many other tales of struggle, travel, and adventure followed, including The Sea-Wolf (1904), White Fang (1906), South Sea Tales (1911), and Jerry of the South Seas (1917). One of London's most interesting novels is the semi-autobiographical Martin Eden (1909). He also wrote socialist treatises, autobiographical essays, and a good deal of journalism.
