Medieval Bruges Andrew Brown, Jan Dumolyn, 2018-04-30 Bruges was undoubtedly one of the most important cities in medieval Europe. Bringing together specialists from both archaeology and history, this 'total' history presents an integrated view of the city's history from its very beginnings, tracing its astonishing expansion through to its subsequent decline in the sixteenth century. The authors' analysis of its commercial growth, industrial production, socio-political changes, and cultural creativity is grounded in an understanding of the city's structure, its landscape and its built environment. More than just a biography of a city, this book places Bruges within a wider network of urban and rural development and its history in a comparative framework, thereby offering new insights into the nature of a metropolis.

Visual Global Politics Roland Bleiker, 2018-02-13 We live in a visual age. Images and visual artefacts shape international events and our understanding of them. Photographs, film and television influence how we view and approach phenomena as diverse as war, diplomacy, financial crises and election campaigns. Other visual fields, from art and cartoons to maps, monuments and videogames, frame how politics is perceived and enacted. Drones, satellites and surveillance cameras watch us around the clock and deliver images that are then put to political use. Add to this that new technologies now allow for a rapid distribution of still and moving images around the world. Digital media platforms, such as Twitter, YouTube, Facebook and Instagram, play an important role across the political spectrum, from terrorist recruitment drives to social justice campaigns. This book offers the first comprehensive engagement with visual global politics. Written by leading experts in numerous scholarly disciplines and presented in accessible and engaging language, *Visual Global Politics* is a one-stop source for students, scholars and practitioners interested in understanding the

crucial and persistent role of images in today's world.

Fingerprints and Other Ridge Skin Impressions Christophe Champod, Chris J. Lennard, Pierre Margot, Milutin Stoilovic, 2017-12-19 Since its publication, the first edition of *Fingerprints and Other Ridge Skin Impressions* has become a classic in the field. This second edition is completely updated, focusing on the latest technology and techniques—including current detection procedures, applicable processing and analysis methods—all while incorporating the expansive growth of literature on the topic since the publication of the original edition. Forensic science has been challenged in recent years as a result of errors, courts and other scientists contesting verdicts, and changes of a fundamental nature related to previous claims of infallibility and absolute individualization. As such, these factors represent a fundamental change in the way training, identifying, and reporting should be conducted. This book addresses these questions with a clear viewpoint as to where the profession—and ridge skin identification in particular—must go and what efforts and research will help develop the field over the next several years. The second edition introduces several new topics, including Discussion of ACE-V and research results from ACE-V studies Computerized marking systems to help examiners produce reports New probabilistic models and decision theories about ridge skin evidence interpretation, introducing Bayesnet tools Fundamental understanding of ridge mark detection techniques, with the introduction of new aspects such as nanotechnology, immunology and hyperspectral imaging Overview of reagent preparation and application Chapters cover all aspects of the subject, including the formation of friction ridges on the skin, the deposition of latent marks, ridge skin mark identification, the detection and enhancement of such marks, as well the recording of fingerprint evidence. The book serves as an essential reference for practitioners working in the field of fingermark detection and

identification, as well as legal and police professionals and anyone studying forensic science with a view to understanding current thoughts and challenges in dactyloscopy.

The Ocean and Cryosphere in a Changing Climate Intergovernmental Panel on Climate Change (IPCC),2022-05-19 The Intergovernmental Panel on Climate Change (IPCC) is the leading international body for assessing the science related to climate change. It provides policymakers with regular assessments of the scientific basis of human-induced climate change, its impacts and future risks, and options for adaptation and mitigation. This IPCC Special Report on the Ocean and Cryosphere in a Changing Climate is the most comprehensive and up-to-date assessment of the observed and projected changes to the ocean and cryosphere and their associated impacts and risks, with a focus on resilience, risk management response options, and adaptation measures, considering both their potential and limitations. It brings together knowledge on physical and biogeochemical changes, the interplay with ecosystem changes, and the implications for human communities. It serves policymakers, decision makers, stakeholders, and all interested parties with unbiased, up-to-date, policy-relevant information. This title is also available as Open Access on Cambridge Core.

Plug-In Electric Vehicles David B. Sandalow,2009-09-01 Plug-in electric vehicles are coming. Major automakers plan to commercialize their first models soon, while Israel and Denmark have ambitious plans to electrify large portions of their vehicle fleets. No technology has greater potential to end the United States' crippling dependence on oil, which leaves the nation vulnerable to price shocks, supply disruptions, environmental degradation, and national security threats including terrorism. What does the future hold for this critical technology, and what should the U.S.

government do to promote it? Hybrid vehicles now number more than one million on America's roads, and they are in high demand from consumers. The next major technological step is the plug-in electric vehicle. It combines an internal combustion engine and electric motor, just as hybrids do. But unlike their precursors, PEVs can be recharged from standard electric outlets, meaning the vehicles would no longer be dependent on oil. Widespread growth in the use of PEVs would dramatically reduce oil dependence, cut driving costs and reduce pollution from vehicles. National security would be enhanced, as reduced oil dependence decreases the leverage and resources of petroleum exporters. Brookings fellow David Sandalow heads up an authoritative team of experts including former government officials, private-sector analysts, academic experts, and nongovernmental advocates. Together they explain the current landscape for PEVs: the technology, the economics, and the implications for national security and the environment. They examine how the national interest could be served by federal promotion and investment in PEVs. For example, can tax or procurement policy advance the cause of PEVs? Should the public sector contribute to greater research and development? Should the government insist on PEVs to replenish its huge fleet of official vehicles? Plug-in electric vehicles are coming. But how soon, in what numbers, and to what effect? Federal policies in the years ahead will go a long way toward answering those questions. David Sandalow and his colleagues examine what could be done in that regard, as well as what should be done.

The Future of the Bamiyan Buddha Statues Masanori Nagaoka, 2020-12-07 This Open Access book explores heritage conservation ethics of post conflict and provides an important historical record of the possible reconstruction of the Bamiyan Buddha statues, which was inscribed

in the UNESCO World Heritage List in Danger in 2003 as “Cultural Landscape and Archaeological Remains of the Bamiyan Valley”. With the condition that most surface of the original fragments of the Buddha statues were lost due to acts of deliberate destruction, this publication explores a reference point for conservation practitioners and policy makers around the world as they consider how to respond to on-going acts of destruction of cultural heritage. Whilst there has been an emerging debate to the ethics and nature of heritage reconstruction, this volume provides a plethora of ideas and approaches concerning the future treatment of the Bamiyan Buddha statues. It also addresses a number of fundamental questions on potential heritage reconstruction: how it will be done; who will decide; and what it should be done for. Moreover when it comes to the inscribed World Heritage properties, how can reconstructed heritage using non-original materials be considered to retain authenticity? With a view to serving as a precedent for potential decisions taken elsewhere in the world for cultural properties impacted by acts of violence and destruction, this volume introduces academic researches, experiences and observations of heritage conservation theory and practice of heritage reconstruction. It also addresses the issue not merely from the point of a material conservation philosophy but within the context of holistic strategies for the protection of human rights and promotion of peace building.

Graph Drawing Software Michael Jünger, Petra Mutzel, 2012-12-06 After an introduction to the subject area and a concise treatment of the technical foundations for the subsequent chapters, this book features 14 chapters on state-of-the-art graph drawing software systems, ranging from general tool boxes" to customized software for various applications. These chapters are written by leading experts: they follow a uniform scheme and can be read independently from each other. The text covers many industrial applications.

Plant Mineral Nutrients Frans J.M. Maathuis, 2012-10-17 The study of plant mineral nutrition has both academic and applied aspects to it. Today, research into plant mineral nutrition is more pertinent than ever in the face of a growing world population and the increasing need for sustainable agriculture. In *Plant Mineral Nutrients: Methods and Protocols*, expert researchers in the field detail a comprehensive collection of methodologies that are routinely used in plant mineral nutrition research. These include methods and protocols for plant growth parameters, ion contents and composition, soil analyses, flux measurements and the use of public facilities for high throughput analyses. Written in the highly successful *Methods in Molecular Biology*TM series format, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily reproducible laboratory protocols, and key tips on troubleshooting and avoiding known pitfalls. Authoritative and practical, *Plant Mineral Nutrients: Methods and Protocols* seeks to aid scientist in the further study of into plants and their mineral nutrients.

Raphael and the Redefinition of Art in Renaissance Italy Robert Williams, 2017-04-03 A comprehensive re-assessment of Raphael's artistic achievement and the ways in which it transformed the idea of what art is.

A New World in a Small Place Robert Brentano, 2024-03-29 Distinguished historian Robert Brentano provides an entirely new perspective on the character of the church, religion, and society in the medieval Italian diocese of Rieti from 1188 to 1378. Combing through a cache of previously ignored documents stored in a tower of the cathedral, he uses wills, litigation proceedings, fiscal accounts, and other records to reconstruct the daily life of the diocese. This title is part of UC Press's *Voices Revived* program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a

backlist dating to 1893, Voices Revived makes high-quality, peer-reviewed scholarship accessible once again using print-on-demand technology. This title was originally published in 1994.

All Figured Out Ingrid Barclay,2015-01-19

Hungary and the Hungarians Enikő Csukovits,2020-09-14T17:35:00+02:00 During the Middle Ages the majority of people in Western Europe never met any Hungarians. They didn't even hear about them, as news about Hungary only reached Western Europe in times of extraordinary historical events– such as the adoption of Christianity at the turn of the 11th century, or the devastating Tatar invasion in 1241-1242. Obtaining information about the Hungarians from books was also difficult, as medieval Europe, even as late as in the 15th-16th centuries, lacked libraries that would have offered greater numbers of works on Hungary or on Hungarian topics. On top of it all, works that contained the most detailed and accurate information remained unknown, in their own period; posterity only found them in rare manuscript copies discovered much later. Yet once collected, we find that these sources, originating from distant parts of the continent and written for different purposes, contain information about Hungary and the Hungarians that most often reaffirm one another. This work examines these sources and sets out to answer four major questions: What did people in medieval Western Europe know, think, and believe about the Hungarians and Hungary? To what degree was this knowledge constant or fluid over the centuries that made up the medieval era, and were changes in knowledge followed by any changes in appreciation? Where was the country located in the hierarchy of European countries on the basis of the knowledge, suppositions, and beliefs relating to it? What were the most important elements in this image of the Hungarians and of Hungary, and which of them became the most enduring stereotypes?

Mexico at the World's Fairs Mauricio Tenorio-Trillo,2018-06-01 This intriguing study of

Mexico's participation in world's fairs from 1889 to 1929 explores Mexico's self-presentation at these fairs as a reflection of the country's drive toward nationalization and a modernized image. Mauricio Tenorio-Trillo contrasts Mexico's presence at the 1889 Paris fair—where its display was the largest and most expensive Mexico has ever mounted—with Mexico's presence after the 1910 Mexican Revolution at fairs in Rio de Janeiro in 1922 and Seville in 1929. Rather than seeing the revolution as a sharp break, Tenorio-Trillo points to important continuities between the pre- and post-revolution periods. He also discusses how, internationally, the character of world's fairs was radically transformed during this time, from the Eiffel Tower prototype, encapsulating a wondrous symbolic universe, to the Disneyland model of commodified entertainment. Drawing on cultural, intellectual, urban, literary, social, and art histories, Tenorio-Trillo's thorough and imaginative study presents a broad cultural history of Mexico from 1880 to 1930, set within the context of the origins of Western nationalism, cosmopolitanism, and modernism. This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, Voices Revived makes high-quality, peer-reviewed scholarship accessible once again using print-on-demand technology. This title was originally published in 1997.

Apollo 17 Lyndon B. Johnson Space Center, 1973 The Apollo 17 flight and lunar landing, the sixth and final lunar landing and third extended science capability mission in the Apollo Program, are discussed with emphasis on the scientific endeavors conducted on the lunar surface. The scientific investigation of the mission is presented in three interrelated types of activities: the lunar surface sampling and observation, the lunar surface experiments, and the inflight experiments. Collection, documentation, and description of the lunar samples are discussed with a preliminary

evaluation and analysis. The lunar surface experiments are described, including the results and their relationship to the scientific objectives of each experiment. The geochemical, photographic, geophysical, topographic, and medical data resulting from experiments conducted in flight are presented.
