Political Trust Sonja Zmerli, Marc Hooghe, 2013 This book, by Sonja Zmerli and Marc Hooghe, presents cutting-edge empirical research on political trust as a relational concept. From a European comparative perspective it addresses a broad range of contested issues. Can political trust be conceived as a one-dimensional concept and to what extent do international population surveys warrant the culturally equivalent measurement of political trust across European societies? Is there indeed an observable general trend of declining levels of political trust? What are the individual, societal and political prerequisites of political trust and how do they translate into trustful attitudes? Why do so many Eastern European citizens still distrust their political institutions and how does the implementation of welfare state policies both enhance and benefit from political trust? The comprehensive empirical evidence presented in this book by leading scholars provides valuable insights into the relational aspects of political trust and will certainly stimulate future research. This book features: a state-of-the-art European perspective on political trust; an analysis of the most recent trends with regard to the development of political trust; a comparison of traditional and emerging democracies in Europe; the consequences of political trust on political stability and the welfare state; a counterbalance to the gloomy American picture of declining political trust levels.

Myth and Reality of the Legitimacy Crisis Carolien van Ham,J. J. A. Thomassen,Kees Aarts,R. B. Andeweg,2017 Theories about the decline of legitimacy or a legitimacy crisis are as old as democracy itself. Yet, representative democracy still exists, and the empirical evidence for a secular decline of political support in established democracies is limited, questionable, or absent. This lack of conclusive evidence calls into question existing explanatory theories of legitimacy decline. How valid are theories of modernization, globalization, media malaise, social capital, and party decline, if the predicted outcome (i.e. secular decline of political support) does not occur? And which (new) explanations can account for the empirical variation in political support in established democracies? This book systematically evaluates the empirical evidence for legitimacy decline in established democracies, the explanatory power of theories of legitimacy decline, and promises new routes in investigating and assessing political legitimacy. In doing so, the book provides a broad and thorough reflection on the state of the art of legitimacy research, and outlines a new research agenda on legitimacy.

Coping with Trauma Rolf J. Kleber,Danny Brom,Peter B. Defares,2017-11-13 This book provides a state-of-the-art guide to the rapidly growing field of traumatic stress. It reviews and integrates the many scientific findings from psychology, psychiatry and sociology into an encompassing model. This general

model is applicable to the reactions to war stress, disaster, violence, accidents and bereavement. Topics such as normal and disturbed coping patterns, social support and various risk factors are also discussed. In addition to the theoretical model, a number of treatment methods for posttraumatic stress disorders is described. Theoretical and practical issues of these treatments are presented. The efficiency of the methods is elucidated by the description of a psychotherapy outcome study on these methods. Information of prevention programs for victims of serious life events is also provided. This integrative approach is of interest to researchers, clinicians, public health workers, physicians, personnel workers, and all other professionals who are involved in research and/or health care with regard to traumatic events.

SEX and CIRCUMCISION Eric Clopper, 2019-04-22 On May 1, 2018, Eric Clopper premiered his one-man play 'Sex & Circumcision: An American Love Story' at Harvard University. This book contains the entire transcript of the play, annotated with additional lines and pictures throughout. In the book-version of Clopper's performance, he takes you through what he dubs Clopper's Five Censored Facts. You get a crash course in Judaic and American history surrounding circumcision, understand the true functions and value of the foreskin, and then he eviscerates the credibility of America's scientific and media communities, exposing the dark ideology that underpins so many of our once-trusted American institutions. The show climaxes in an unapologetic

declaration of war on baby mutilation and those who dare perpetuate it and ends with an impassioned appeal to the one thing we all have in common: our shared humanity. Harvard University stoked their book-burning flames with their own free speech policy immediately following the show's public release. Within 24 hours of the online release of Clopper's show, Harvard fired Clopper for his performance despite his show's incredible reception within the Harvard community and online. Now you can read the show they don't want you to see in paperback format. Enjoy.

Handbook on Political Trust Sonja Zmerli,Tom W.G. van der Meer,2017-01-27 Political trust – in government, parliament, or political parties – has taken centre stage in political science for more than half a century, reflecting ongoing concerns with the legitimacy and functioning of representative democracy. To provide scholars, students and policy makers with a tool to navigate through the complexity of causes and consequences of political trust, this Handbook offers an excellent overview of the conceptual, theoretical, methodological and empirical state of the art, complemented by accounts of regional particularities, and authored by international experts in this field.

New Participatory Dimensions in Civil Society Jan W. van Deth, William A. Maloney, 2012-03-15 This book examines citizen engagement in contemporary democratic politics and the development of new participatory forms. Based on empirical information gathered from citizens, activists and organizations, it examines the changing face of democratic participation. Advanced democracies are 'plagued' by the complex problem of basing political decisions on the active engagement of citizens and citizens' organisations. Although the benefits of an active citizenry appear great, the reality is that most citizens positively embrace a relatively marginal role in organised politics. The conventional activist –citizens as active members engaged in voluntary associations and collective decision-making – seems to be replaced by passive supporters and donors or ephemeral or episodic democratic participators. This volume aims to address several issues at the core of this transformation: the rise of checkbook participation, the growing attractiveness of individualized forms of participation, and the increasing relevance of professional expertise. Looking beyond the traditional single focus on participation or on organizations in isolation, the book innovatively examines the empirical link that can be established between actual developments in democratic participations and the organizational framework in European countries. *New Participatory Dimensions in Civil Society* is essential reading for students and scholars of democracy, participation, civil society, politics and sociology.

Civic Engagement in Postwar Japan Rieko Kage, 2010-12-15 Despite reduced incomes, diminished opportunities for education, and the psychological trauma of defeat, Japan experienced a rapid rise in civic engagement in the immediate aftermath of World War II. Why? *Civic Engagement in Postwar Japan* answers this question with a new general theory of the growth in civic engagement in postwar democracies. It argues that wartime mobilization unintentionally instills civic skills in the citizenry, thus laying the groundwork for a postwar civic engagement boom. Meanwhile, legacies of prewar associational activities shape the costs of association-building and information-gathering, thus affecting the actual extent of the postwar boom. Combining original data collection, rigorous statistical methods, and in-depth historical case analyses, this book illuminates one of the keys to making postwar democracies work.

The Oxford Handbook of Social and Political Trust Eric M. Uslaner, 2018-01-02 This volume explores the foundations of trust, and whether social and political trust have common roots. Contributions by noted scholars examine how we measure trust, the cultural and social psychological roots of trust, the foundations of political trust, and how trust concerns the law, the economy, elections, international relations, corruption, and cooperation, among myriad societal factors. The rich assortment of essays on these themes addresses questions such as: How does national identity shape trust, and how does trust form in developing countries and in new democracies? Are minority

groups less trusting than the dominant group in a society? Do immigrants adapt to the trust levels of their host countries? Does group interaction build trust? Does the welfare state promote trust and, in turn, does trust lead to greater well-being and to better health outcomes? The Oxford Handbook of Social and Political Trust considers these and other questions of critical importance for current scholarly investigations of trust.

The Last Mermaid Shana Abé, 2008-04-29 Shana Abé has entranced countless readers with her passion-filled novels of adventure, intrigue, and romance. Now the author of *The Secret Swan* delivers a gift from the sea: three hauntingly beautiful tales connected by a legend, a locket, and a love beyond time. 531 a.d.: The tiny island of Kell is said to be enchanted, inhabited by an extraordinary creature who comforts shipwrecked sailors passing into the next world. Prince Aedan of the Isles believes in no such nonsense—until he awakens on Kell itself and meets the sensuous siren who rescued him from the sea. 1721: Ronan MacMhuirich, Earl of Kell, is the target of an unlikely assassin: Leila, a mysterious woman from an exotic land. But his irresistibly beautiful would-be slayer is in just as much danger as Ronan when she falls for this man with a magic of his own. 2004: What do you do when you inherit a Scottish island you never knew existed—and find yourself pursued by a handsome stranger who wants to buy it from you? That's what happens to Ruri Kell when she accepts Iain MacInnes's invitation to visit her birthright, and listens to a proposition as sinfully tempting as everything else about him.

Three seductive love stories, three passionate couples, all linked by one of the most romantic myths of all.

Social Pacts in Europe Sabina Avdagic, Martin Rhodes, Jelle Visser, 2011-05-12
The result of a four-year long comparative research study centered at the European University Institute in Florence, Italy, and financed by the

European Commission's Sixth Framework Programme, Social Pacts in Europe presents the first full-length theoretical and comparative empirical study of new social pacts in Europe. Its aim is to bring the level of sophistication achieved in an earlier literature on neo-corporatism to the more contemporary phenomenon of 'social pacting'. The book brings a wide range of complementary theories to bear on the emergence, evolution and institutionalization of pacts, compares systematically a wide range of cases across Europe, and provides in-depth studies of Ireland, Italy, Portugal, Spain, the Netherlands, and Slovenia. The book contributes to the scholarly debate on economic adjustment and institutional change in European capitalism by focusing on three inter-related questions: (i) what explains national variation in reliance on social pacts; (ii) what determines the outcomes of individual pact negotiations; and (iii) under what conditions are pacts repeated and become regular features of socio-economic governance? The book's theoretical innovations include a novel application of fuzzy-set Qualitative Comparative Analysis (fs/QCA) to help explain national differences in social pact adoption; the application of a game theoretic approach to explain social pact emergence; and a reinterpretation of traditional neo-corporatist and new institutionalist theory to help understand social pact consolidation and institutionalization.

Political Science and Changing Politics Philip van Praag, 2017 This book is an introduction to political science. What is it that political scientists

are actually studying? Or, to put it another way: What do we mean when we talk about politics?

Fransje Killaars Fransje Killaars, Bianca Stigter, Sven Lütticken, 2012

Fransje Killaars (born 1959) is internationally renowned for her installations of brightly colored textiles. She refers to her hand-woven carpets, blankets and collection of colored fabrics as the 'alphabet' that she draws upon to create her installations. Killaars is fascinated by the power of color, the relationship between people and textiles and the ways textiles are bound up with daily life. In addition to her installations, Killaars has made a name for herself with commissions for the public domain. These works are impressive room-filling installations and wall hangings, with the horizontal layers of fabric typical of her work, inspired by fabric swatch books. This commissioned work can be seen at the Herenkamer at the Catshuis, the lobby of the Netherlands Foundation for Visual Arts, Design and Architecture and the foyer of the Dutch Ministry of Education, Culture and Science. Killaars recently designed a piece for the North Delegate's Lounge of the UN Headquarters in New York.

Political Theory and Christian Vision Jonathan Chaplin, Paul A. Marshall, 1994 *Political Theory and Christian Vision* explores the field of Christian political theory, a discipline to which Bernard Zylstra devoted his life's work. His particular interests lay in the philosophical and methodological questions that underlie the study of empirical political systems. In his view, the neglect of rigorous critical reflection on the presuppositions of the discipline left many of its current practitioners lacking direction and their output lacking coherence. It was his aim to demonstrate the necessity for and the potential fruitfulness of an integrated, philosophically self-conscious and inter-disciplinary practice of political theory. The essays in this book, all written by former students or colleagues of Zylstra, are illustrative of this concern with issues arising

at the foundations of the discipline. Those in the first section address questions immediately related to the normative character of those foundations. Further essays explore the nature of the state, the challenges of pluralism, and the nature of political economy. Co-published with the Institute for Christian Studies.
