**For This Cause** Nascosta InCristo,2015-03-25 To be a drug addict is to be a slave to a beast that constantly screams to be fed. It's a feeling that Nascosta InCristo discovered as a teenager in Australia, where she grew up feeling ignored by her parents. She began skipping school and found new friends that made her feel loved. It was with them that she took her first toke of marijuana, rolling around on the grass and laughing uncontrollably after smoking it. In this candid memoir, she recalls how that first joint led her to a figurative and literal prison. More importantly, she reveals how she escaped to a brand new life full of possibilities. Whether you're a parent, teacher or counselor seeking to help a troubled loved one, a former drug addict or someone seeking to rediscover the freedom you've lost, you'll be inspired to overcome obstacles with For This Cause.

**The Akunin Project** Elena V. Baraban,Stephen M. Norris,2021-02-01 The Akunin Project is the first book to study the fiction and popular history of Grigorii Chkhartishvili, one of the most successful writers in post-Soviet Russia. In the first two decades of the twenty-first century, Chkhartishvili published over sixty books under the pen names Anatolii Brusnikin, Anna Borisova, Akunin-Chkhartishvili, and, most commonly, Boris Akunin. His series featuring the tsarist secret policeman Erast Fandorin has sold over 15 million books in Russia alone, making Akunin one of the bestselling authors of the post-Soviet era. Combining intertextuality, allusions, pastiche, and other markers of postmodern playfulness, many of Akunin's works have been translated into English and have also been adapted for film and television. Akunin's public profile has been further enhanced by his active involvement in mass political protests against Vladimir Putin. Despite Akunin's international reputation as a celebrated writer, there is very little critical work on his literary output and his mysterious persona. Bringing together scholars of literature, history, and culture, The Akunin Project fills this gap by exploring the author's bestselling adventure novels and recent histories of the Russian state. The book includes translations of five short works previously unavailable in English as well as an interview with the author.

**Round the World in Eighty Dishes** Lesley Blanch,2013-02-19 A grand tour for the taste buds—a delightful classic cookbook of the postwar era from a well-traveled woman. This charming little book was first published in 1956, when people in England were still enduring postwar restrictions on both traveling and eating. In the words of its author, Lesley Blanch, “benign fate whisked me elsewhere to follow less restricted ways, travelling widely and eating wildly.” Her gastronomic world tour includes eighty recipes, each prefaced by an account of where they were first tasted or with some amusing anecdote. You'll find delicious dishes from her journeys around Europe and to the Middle East and Far East, Africa, the Pacific, Central and South America, and even a good old Baked Virginia Ham from the USA.

**Stories I Stole from Georgia** Wendell Steavenson,2004-02-24 A memoir of life in Georgia after the fall of Communism introduces readers to the memorable, and sometimes insane, people who struggled to dominate the republics--and survive in them--after the decline of Soviet power.

**Engineers of the Soul** Frank Westerman,2012-08-07 A “fascinating” account of how Gorky, Pasternak, and other great writers were coerced to create propaganda for Stalin (Cleveland Plain Dealer). Sunday Times Best Travel Book of the Year In the Soviet Union, writers of renown, described by Stalin as “engineers of the soul,” were encouraged to sing the praises of canal and dam construction under titles such as Energy: The Hydraulic Power Station and Onward, Time! But their enthusiasm—spontaneous and idealistic at first—soon became obligatory, and as these colossal waterworks led to slavery and destruction, Soviet writers such as Maxim Gorky, Isaak Babel, Konstantin Paustovsky, and Boris Pasternak were forced to labor on in the service of a deluded totalitarian society. Combining investigative journalism with literary history, Engineers of the Soul is a journey through contemporary Russia and Soviet-era literature. Frank Westerman, a correspondent living in post-Communist Moscow, examines both the culture landscape under Stalin's rule and the books—and lives—of writers caught in the wheels of the Soviet system as art and reality were bent to radically new purposes. “Engagingly written and extensively researched, the book covers compelling historical and literary ground.” —Financial Times “A detailed and enthralling account of his journey through Soviet literature including discovering the revolution's best kept secrets while trying to appreciate the talented writers who created a web of deceit in the name of success.” —Publishers Weekly “A literary travelogue revealing a remarkable geography and a strange, fraught alliance when the pen was not as mighty as the hammer and sickle of the Soviet Union . . . insightful.” —Kirkus Reviews

**Panic in a Suitcase** Yelena Akhtiorskaya,2015-08-04 “A virtuosic debut [and] a wry look at immigrant life in the global age.” —Vogue Having left Odessa for Brighton Beach, Brooklyn, with a sense of finality, the Nasmertov family has discovered that the divide between the old world and the new is not nearly as clear-cut as they had imagined. With the collapse of the Soviet Union, returning is just a matter of a plane ticket, and the Russian-owned shops in their adopted neighborhood stock even the most obscure comforts of home. Pursuing the American Dream once meant giving up everything, but does the dream still work if the past refuses to grow distant and mythical, remaining alarmingly within reach? If the Nasmertov parents can afford only to look forward, learning the rules of aspiration, the family's youngest, Frida, can't help looking back—and asking far too many questions. Yelena Akhtiorskaya's exceptional debut has been hailed not only as the great novel of Brighton Beach but as a “breath of fresh air ... [and] a testament to Akhtiorskaya's wit, generosity, and immense talent as a young American author” (NPR).

*House of Many Gods* Kiana Davenport,2008-09-30 From Kiana Davenport, the bestselling author of *Song of the Exile* and *Shark Dialogues*, comes another mesmerizing novel about her people and her islands. Told in spellbinding and mythic prose, *House of Many Gods* is a deeply complex and provocative love story set against the background of Hawaii and Russia. Interwoven throughout with the indelible portrait of a native Hawaiian family struggling against poverty, drug wars, and the increasing military occupation of their sacred lands. Progressing from the 1960s to the turbulent present, the novel begins on the island of O'ahu and centers on Ana, abandoned by her mother as a child. Raised by her extended family on the "lawless" Wai'anae coast, west of Honolulu, Ana, against all odds, becomes a physician. While tending victims of Hurricane 'Iniki on the neighboring island of Kaua'i, she meets Nikolai, a Russian filmmaker with a violent and tragic past, who can confront reality only through his unique prism of lies. Yet he is dedicated to recording the ecological horrors in his motherland and across the Pacific. As their lives slowly and inextricably intertwine, Ana and Nikolai's story becomes an odyssey that spans decades and sweeps the reader from rural Hawaii to the forbidding Arctic wastes of Russia; from the poverty-stricken Wai'anae coast to the glittering harshness of "new Moscow" and the haunting, faded beauty of St. Petersburg. With stunning narrative inventiveness, Davenport has created a timeless epic of loss and remembrance, of the search for family and identity, and, ultimately, of the redemptive power of love.

*The Suitcase* Sergei Dovlatov,2011-04-01 Sergei Dovlatov's subtle, dark-edged humor and wry observations are in full force in *The Suitcase* as he examines eight objects—the items he brought with him in his luggage upon his emigration from the U.S.S.R. These seemingly undistinguished possessions, stuffed into a worn-out suitcase, take on a riotously funny life of their own as Dovlatov inventories the circumstances under which he acquired them, occasioning a brilliant series of interconnected tales: A poplin shirt evokes the bittersweet story of a courtship and marriage, while a pair of boots (of the kind only the Nomenklatura can afford) calls up the hilarious conclusion to an official banquet. Some driving gloves—remnants of Dovlatov's short-lived acting career—share space with neon-green crepe socks, reminders of a failed black-market scam. And in curious juxtaposition, the belt from a prison guard's uniform lies next to a stained jacket that once belonged to Fernand Léger. Imbued with a comic nostalgia overlaid with Dovlatov's characteristically dry wit, *The Suitcase* is an intensely human, delightfully ironic novel from the finest Soviet satirist to appear in English since Vladimir Voinovich.

*Proceedings of the Tenth International Conference on Calorimetry in Particle Physics* Ren-yuan Zhu,2003-01-16 Annotation The International Conference on Calorimetry in Particle Physics has become the major forum for state-of-the-art developments of calorimetry techniques. The tenth conference was attended by about 150 physicists from 20 countries and covered all aspects of calorimetric particle detection and measurements, with emphasis on high energy physics experiments as well as experiments in nuclear physics and astrophysics. The proceedings contain three parts: introductory papers, contributed papers and a summary. The introductory papers start with a historical review of the development of calorimetry technology, and continue with overviews of the current status of calorimetry in high energy physics and astrophysics, which are followed by discussions on calorimetry in future accelerator facilities, such as linear colliders and the Super B Factory. The Tenth Conference was attended by more than 150 physicists from 16 countries and covered all aspects of calorimetric particle detection and measurements, with emphasis on high energy physics and astrophysics experiments. The proceedings contain three parts: introductory papers, contributed papers and perspective papers. The introduction starts with a historical review of calorimetry developments, and continues with overviews of the current status of calorimetry in high energy physics and astrophysics, which are followed by discussions on calorimetry in future accelerator facilities, such as linear colliders and the Super B factories. A "hot" technology regarding the "energy flow concept" is also discussed. The contributed papers are organized in 11 sessions. The perspective papers summarize the physics and limitation of calorimeter applications in high energy physics, astrophysics and medical industries.
