<u>Art and the Home</u> Imogen Racz,2015-01-26 Our homes contain us, but they are also within us. They can represent places to be ourselves, to recollect childhood memories, or to withdraw into adult spaces of intimacy; they can be sites for developing rituals, family relationships, and acting out cultural expectations. Like the personal, social, and cultural elements out of which they are constructed, homes can be not only comforting, but threatening too. The home is a rich theme running through post-war western art, and it continues to engage contemporary artists today - yet it has been the subject of relatively little critical writing. Art and the Home: Comfort, Alienation and the Everyday is the first single-authored, up-to-date book on the subject. Imogen Racz provides a theme-led discussion about how the physical experience of the dwelling space and the psychological complexities of the domestic are manifested in art, focusing mainly on sculpture, installation and object-based practice; discussing the work and ideas of artists as diverse as Louise Bourgeois, Gordon Matta-Clark, George Segal and Cornelia Parker within their artistic and cultural contexts.

Russian Trade Policy Sergei Sutyrin,Olga Y. Trofimenko,Alexandra Koval,2019-05-28 This book reveals the key trends in the modern Russian trade policy to provide a deeper understanding of the main challenges and barriers, possible paths and opportunities in its development. An international team of authors investigates specific factors influencing the Russian trade policy evolution; recent trends in Russia's international trade development; and the impact of Russia's participation in the World Trade Organization on the domestic economy. Particular attention is paid to regional integration processes that involve Russia and their outcomes; as well as challenges in the remaining and building commercial relations with Russia's traditional and 'new' trade partners, taking into consideration those alienating the West and economic sanctions regimes. The analysis of key trends is combined with a special focus on selected industries and economic partners of Russia. The book contains a variety of case studies investigating the ways in which political and business actors adapt to the transformation of Russian trade policy, how Russia participates in the WTO dispute settlement mechanism, and what the driving forces and outputs are for the national economic agents. Finally, the authors consider what the reasonable expectations might be regarding the future prospects of Russian trade policy. The book presents a unique, comprehensive and multidimensional analysis of modern Russian trade policy. Filling an important gap in the existing literature, this book will be of value to all those interested in Russia's economic development path.

Transformative Approaches to Patient Literacy and Healthcare Innovation Garcia, Manuel B.,de Almeida, Rui Pedro Pereira,2024-03-22 The disconnect between technology and traditional practices poses a significant challenge. Many healthcare professionals and individuals struggle to navigate the influx of emerging technologies, hindering the full realization of their potential in revolutionizing health literacy and medical practice. The lack of cohesive understanding and integration of technologies like mobile applications, wearable devices, artificial intelligence, and telemedicine impedes the seamless delivery of healthcare services and obstructs individuals from actively managing their health. Transformative Approaches to Patient Literacy and Healthcare Innovation offers a comprehensive solution to bridge the gap between healthcare and technology. Delving into the dynamic fusion of these domains, it unravels the transformative power of technology applications, showcasing how they enhance health literacy and empower individuals to make informed decisions about their well-being. By providing insights into the integration of mobile health apps, electronic health records, extended reality, artificial intelligence, and more, the book equips readers with the knowledge needed to navigate the evolving healthcare landscape with confidence.

Desiring Hong Kong, Consuming South China Eric Kit-wai Ma,2011-12-01 This is a study of the complex and changing cultural patterns in Hong Kong's relationship with the neighbouring mainland. From interviews, TV dramas, media representations and other sources, it traces the fading of Hong Kong's once-influential position as a role model for less developed mainland cities and explores changing perceptions as China grows in confidence and Hong Kong encounters a powerful nation culture in the mainland. Part One ('Desiring Hong Kong') examines the history of cross-border relations and movements from the 1970s, focusing on Hong Kong as an object of desire for people in South China. Part Two ('Consuming South China'), moves to the turn of the century, when, despite increased communications and a 'disappearing border', Hong Kong is no longer a powerful role model; it nevertheless continues to be a resourceful node in the chain of global capitalism. This is a timely and provocative discussion of a topical issue, and one written in an approachable style using lively case studies. In contrast with the popular theorization that Hong Kong shows her true colour in "the politics of disappearance", this book argues that Hong Kong returns with a politics of reappearance in a dense network of 'fear and excitement', differentiating and assimilating with the mainland at the same time. It will be of interest to scholars and students in cultural studies, political science, sociology and cultural geography. It will also have some general appeal to policy-makers, journalists, and the concerned public.

Diversity Without Dogma Gilmore Crosby,2022-12-20 Social Scientist Kurt Lewin said, No research without action, and no action without research. Too much of the current DEI (diversity, equity, and inclusion) approach is insight-based instead of action-based. Even though institutional racism is identified as the root problem, the change effort is focused on looking inward for bias instead of taking action to eliminate institutional racism and other isms. A Lewinian approach, in contrast, is balanced. What people think is important, but no more important than what people do. If you bring people together to change things, this will change what people think! We don't need therapy nearly as much as we need action based on dialogue! Instead of spending your energy soul-searching for evidence in your thoughts and behaviors that you have unconscious biases, this book helps put your energy into doing something practical about racism. To get there, this book uses Lewin's social science to build a framework for sorting through the many approaches to and positions held on race, racism, diversity, and related topics.

While the framework is and must be applicable to any prejudice, systemic or individual, the bulk of this exploration is focused on racism, which to a large degree has become the primary social justice focus of our times. Painfully aware that conversations about race can easily deteriorate into polarization, the author lays a path toward finding common ground.

Culture and Rural–Urban Revitalisation in South Africa Mziwoxolo Sirayi,Modimowabarwa Kanyane,Giulio Verdini,2021-06-14 This book captures ground-breaking attempts to utilise culture in territorial development and regeneration processes in the context of South Africa and our 'new normal' brought by COVID-19, the fourth industrial revolution, and climate change the world over. The importance of culture in rural-urban revitalisation has been underestimated in South Africa and the African continent at large. Despite some cultural initiatives that are still at developmental stages in big cities, such as Johannesburg, eThekwini and Cape Town, there is concern about the absence of sustainable policies and plans to support culture, creativity, and indigenous knowledge at national and municipal levels. Showcasing alternative strategies for making culture central to development, this book discusses opportunities to shift culture and indigenous knowledge from the peripheries and place them at the epicentre of sustainable development and the mainstream of cultural planning, which can then be applied in the contexts of Africa and the Global South. Governmental institutions, research councils, civil society organisations, private sector, and higher education institutions come together in a joint effort to explain the nexus between culture, economic development, rural-urban linkages, grassroots and technological innovations. Culture and Rural-Urban Revitalization in South Africa is an ideal read for those interested in rural and urban planning, cultural policy, indigenous knowledge and smart rural village model.

The Impact of Higher Education Ranking Systems on Universities Kevin Downing,Petrus Johannes Loock,Sarah Gravett,2021-04-05 This book, written by three generations of rankings academics with considerable experience from three very different regions of the globe, lifts the lid on the real impact of higher education ranking systems (HERS) on universities and their stakeholders. It critically analyses the criteria that make up the 'Big Three' global ranking systems and, using interviews with senior administrators, academics and managers, discusses their impact on universities from four very different continents. Higher education continues to be dominated by a reputational hierarchy of institutions that sustains and is reinforced by HERS. Despite all the opinions and arguments about the legitimacy of the rankings as a construct, it seems experts agree that they are here to stay. The question, therefore, seems to be less about whether or not universities should be compared and ranked, but the manner in which this is undertaken. Delivering a fresh perspective on global rankings, this book summarizes the development of HERS and provides a critical evaluation of the effects of HERS on four different major regions — South Africa, the Arab region, South East Asia, and Australia. It will appeal to any academic, student, university administrator or governing body interested in or affected by global higher education ranking systems.

Stamped from the Beginning Ibram X. Kendi,2016-04-12 The National Book Award winning history of how racist ideas were created, spread, and deeply rooted in American society. Some Americans insist that we're living in a post-racial society. But racist thought is not just alive and well in America -- it is more sophisticated and more insidious than ever. And as award-winning historian Ibram X. Kendi argues, racist ideas have a long and lingering history, one in which nearly every great American thinker is complicit. In this deeply researched and fast-moving narrative, Kendi chronicles the entire story of anti-black racist ideas and their staggering power over the course of American history. He uses the life stories of five major American intellectuals to drive this history: Puritan minister Cotton Mather, Thomas Jefferson, abolitionist William Lloyd Garrison, W.E.B. Du Bois, and legendary activist Angela Davis. As Kendi shows, racist ideas did not arise from ignorance or hatred. They were created to justify and rationalize deeply entrenched discriminatory policies and the nation's racial inequities. In shedding light on this history, Stamped from the Beginning offers us the tools we need to expose racist thinking. In the process, he gives us reason to hope.
