Lester R. Brown

*The Trouble with Nigeria* Chinua Achebe, 1984 This novel about Nigeria prophesied the 1983 coup.

**Eco-Economy** Lester R. Brown, 2013-10-31 In 1543, Polish astronomer Nicolaus Copernicus challenged the view that the sun revolved around the earth, arguing instead that the earth revolved around the sun. His paper led to a revolution in thinking. In Lester Brown's brilliant and invigorating account of the industrial economy, he shows how a rethink of its fossil fuel-based, throwaway ethos is necessary to ensure that it works with, not against, the natural environment. The issue now is whether the environment is part of the economy or the economy is part of the environment. Brown argues the latter, pointing out that treating the environment as part of the economy has produced an economy that is destroying its natural support systems. One of the foremost experts on the new economic opportunities, Brown shows the vast economic potential and environmental gains that exist from eliminating the waste and destruction of current consumption. He describes how the global economy can be restructured to make it compatible with the earth's ecosystem so that economic progress can continue, with high standards of living and secure employment for all, while conserving resources and restoring the environment. In the new economy, wind farms replace coal mines, hydrogen-powered fuel cells replace internal combustion engines, and cities are designed for people, not cars. *Eco-Economy* is a map of how to get from here to there. It is an essential guide to the economy of the 21st century and will be compelling reading for business readers and environmentalists alike looking for ways to build a better future.

The Industrial Revolution Pat Hudson, 2014-08-29 This is an introduction to the Industrial Revolution which offers an integrated account of the economic and social aspects of change during the period. Recent revisionist thinking has implied that fundamental change in economic, social and political life at the time of the Industrial Revolution was minimal or non-existent. The author challenges this interpretation, arguing that the process of revision has gone too far; emphasizing continuity at the expense of change and neglecting many historically unique features of the economy and society. Elements given short shrift in many current interpretations are reassigned their central roles.

**Managing in the Global Economy** Richard M. Steers, Luciana Nardon, 2014-12-18 This definitive text will bring a new level of professionalism to courses in International Management. Truly global in focus, it is a comprehensive primer on the challenges and prospects of international management, with a particular emphasis on developing global managers who are skilled in economics, strategy, and general management. In addition, the authors help readers develop an in-depth understanding of the role of cultural differences in managerial effectiveness. The text is divided into three parts: the emerging global economy; culture, organization, and strategy; and managing global operations. Management topics include: organizing for international business, global business strategy, building strategic alliances, international negotiations, global staffing, managing a competitive workforce, TQM and employee involvement, and managing multicultural teams. Throughout the text, the authors integrate current conceptual materials on global management with in-depth country analyses and real-world business examples. Each chapter begins with an opening case vignette (from countries around the world) and concludes with a list of key terms and in-depth

exercises (Global Manager's Workbook). The text also provides country ratings for 50 countries on economic activity, political risk, and cultural differences, as well as a 35 item instrument for students to measure their own cultural awareness
