**Power after Carbon** Peter Fox-Penner, 2020-05-19 As the electric power industry faces the challenges of climate change, technological disruption, new market imperatives, and changing policies, a renowned energy expert offers a roadmap to the future of this essential sector. As the damaging and costly impacts of climate change increase, the rapid development of sustainable energy has taken on great urgency. The electricity industry has responded with necessary but wrenching shifts toward renewables, even as it faces unprecedented challenges and disruption brought on by new technologies, new competitors, and policy changes. The result is a collision course between a grid that must provide abundant, secure, flexible, and affordable power, and an industry facing enormous demands for power and rapid, systemic change. The fashionable solution is to think small: smart buildings, small-scale renewables, and locally distributed green energy. But Peter Fox-Penner makes clear that these will not be enough to meet our increasing needs for electricity. He points instead to the indispensability of large power systems, battery storage, and scalable carbon-free power technologies, along with the grids and markets that will integrate them. The electric power industry and its regulators will have to provide all of these, even as they grapple with changing business models for local electric utilities, political instability, and technological change. *Power after Carbon* makes sense of all the moving parts, providing actionable recommendations for anyone involved with or relying on the electric power system.

**Christianity and the Postmodern Turn** Myron B. Penner, 2005-07-01 In our post-Cold War, post-colonial, post-Christian world, Western culture is experiencing a dramatic shift. Correspondingly, says Myron Penner, recent philosophy has taken a postmodern turn in which traditional concepts of reality, truth, language, and knowledge have been radically altered, if not discarded. Here James K.A. Smith, John Franke, Merold Westphal, Kevin Vanhoozer, Douglas Geivett, and R. Scott Smith respond to the question, What perils and/or promises does the postmodern turn hold for the tasks of Christian thinkers? Addressing topics such as the nature of rationality and biblical faith, the relationship of language to reality, and the impact of postmodern concerns on ethics, this book presents a variety of positions in vigorous dialogue with each other.

*Presumption of Innocence (Large Print Edition)* Stephen Penner, 2014-08-19 Large print edition of PRESUMPTION OF INNOCENCE by Stephen Penner.

Inorganic Chemistry Gary Wulfsberg, 2000-03-16 This is a textbook for advanced undergraduate

inorganic chemistry courses, covering elementary inorganic reaction chemistry through to more advanced inorganic theories and topics. The approach integrates bioinorganic, environmental, geological and medicinal material into each chapter, and there is a refreshing empirical approach to problems in which the text emphasizes observations before moving onto theoretical models. There are worked examples and solutions in each chapter combined with chapter-ending study objectives, 40-70 exercises per chapter and experiments for discovery-based learning.

**Overcoming Katrina** D. Penner, K. Ferdinand, 2016-11-09 *Overcoming Katrina* tells the stories of 27 New Orleanians as they fought to survive Hurricane Katrina and its aftermath. Their oral histories offer first-hand experiences: three days on a roof with Navy veteran Leonard Smith; at the convention center with waitress Eleanor Thornton; and with Willie Pitford, an elevator man, as he rescued 150 people in New Orleans East. *Overcoming* approaches the question of why New Orleans matters, from perspectives of the individuals who lived, loved, worked, and celebrated life and death there prior to being scattered across the country by Hurricane Katrina. This book's twenty-seven narrators range from Mack Slan, a conservative businessman who disparages the younger generation for not sharing his ability to make good, rational decisions, to Kalamu ya Salaam, who was followed by the New Orleans Police Department for several years as a militant defender of Black Power in the late 1960s and '70s. These narratives are memorials to the corner stores, the Baptist churches, the community health clinics, and those streets where the aunties stood on the corner, and whose physical traces have now all been washed away. They conclude with visions of a safer, equitably rebuilt New Orleans. \*Scroll down for more audio excerpts from

Overcoming Katrina\*.

**The End of Apologetics** Myron Bradley Penner, 2013-07-01 The modern apologetic enterprise, according to Myron Penner, is no longer valid. It tends toward an unbiblical and unchristian form of Christian witness and does not have the ability to attest truthfully to Christ in our postmodern context. In fact, Christians need an entirely new way of conceiving the apologetic task. This provocative text critiques modern apologetic efforts and offers a concept of faithful Christian witness that is characterized by love and grounded in God's revelation. Penner seeks to reorient the discussion of Christian belief, change a well-entrenched vocabulary that no longer works, and contextualize the enterprise of apologetics for a postmodern generation.

As the newly-named People's Champion, Julius and his friends must travel to a distant land to remind its people of the might of the Roman Empire: Britannia. It'll be just like a vacation! But when the motley menagerie of gladiators arrive in the cold, wet new land, they don't quite receive the welcome they were expecting. In fact, the Britons seem to hate the Romans. But what can a ragtag group of fighting animals do about it?

*Male Colors* Gary Leupp,2023-04-28 Tokugawa Japan ranks with ancient Athens as a society that not only tolerated, but celebrated, male homosexual behavior. Few scholars have seriously studied the subject,

and until now none have satisfactorily explained the origins of the tradition or elucidated how its conventions reflected class structure and gender roles. Gary P. Leupp fills the gap with a dynamic examination of the origins and nature of the tradition. Based on a wealth of literary and historical documentation, this study places Tokugawa homosexuality in a global context, exploring its implications for contemporary debates on the historical construction of sexual desire. Combing through popular fiction, law codes, religious works, medical treatises, biographical material, and artistic treatments, Leupp traces the origins of pre-Tokugawa homosexual traditions among monks and samurai, then describes the emergence of homosexual practices among commoners in Tokugawa cities. He argues that it was nurture rather than nature that accounted for such conspicuous male/male sexuality and that bisexuality was more prevalent than homosexuality. Detailed, thorough, and very readable, this study is the first in English or Japanese to address so comprehensively one of the most complex and intriguing aspects of Japanese history.
