*The Telling Image* Lois Farfel Stark,2018-02-06 Next Generation Indie Book Awards, Best Non Fiction 2019 National Indie Excellence Award Winner Nautilus Book Awards, Gold #1 Amazon Best Seller in Architecture History & Periods Amazon Best Seller in Art Subjects & Themes Seeing the World Through Shape How do humans make sense of the world? In answer to this timeless question, award winning documentary filmmaker, Lois Farfel Stark, takes the reader on a remarkable journey from tribal ceremonies in Liberia and the pyramids in Egypt, to the gravity-defying architecture of modern China. Drawing on her experience as a global explorer, Stark unveils a crucial, hidden key to understanding the universe: Shape itself. The Telling Image is a stunning synthesis of civilization's changing mindsets, a brilliantly original perspective urging you to re-envision history not as a story of kings and wars but through the lens of shape. In this sweeping tour through time, Stark takes us from migratory humans, who imitated a web in round-thatched huts and stone circles, to the urban ladder of pyramids and skyscrapers, organized by hierarchy and measurements, to today's world of interconnected networks. In The Telling Image Stark reveals how buildings, behaviors, and beliefs reflect humans' search for pattern and meaning. We can read the past and glimpse the future by watching when shapes shift. Stark's beautifully illustrated book asks of all its readers: See what you think.

*Images of the Heart: the Author's Mind* Samuel R. Merritt Sr.,2015-01-31 Images of the Heart: The Authors Mind is just the thoughts or emotions of Samuels other book, Images of the Heart, which is a collection of writings in rhythmic poetry form penned by Samuel R. Merritt Sr. Most of these writings were inspired by the request or actions of others. In Samuels other book, sometimes simple statements from others was all the inspiration that was needed. Each poem tells a story in its own way. They relate the hope of feelings that others want to express to another. Yet, these words are stated through the view and incite of the poet. He reveals a different perspective from the considered normal view. His words are not from inside the box out, but from outside the box in. The words are designed to tell the story of the subject of the poem, from the view point of the subject. That is the subject is telling you its own story so you can see from its eyes what it sees.

*HUMANS* Henry Carroll,2021-10-26 A startling and original look at what it means to be human in a rapidly changing world, from bestselling author and art writer Henry Carroll, with images by a diverse and innovative group of contemporary photographers See through the eyes of a new generation of photographers responding to the rapidly unfolding issues shaping our lives. In this series of small, insightful, and beautifully presented books, Henry Carroll, the bestselling photography writer of the last decade, considers the ideas behind images to present personal perspectives on climate change, race, sexuality, gender, faith, inequality, beauty, power, and our contradictory relationship to animals and the natural world. The first book in the series, HUMANS, reveals how contemporary photographers use visual language to pose honest and confronting questions about our bodies, the purpose of faith in a fact-based world, systemic social structures that limit and allow freedom, and the opposing forces of unconditional love and abject cruelty. In this diverse collection of arresting images and insightful text, Carroll regards the photographers as modern-day philosophers, original thinkers who fuse technique, concept, and imagination in order to provoke meaningful visual reflections on what matters most. For both creators and consumers of images, HUMANS is an immersive and supremely relevant book offering a treasure trove of ideas and visual inspiration designed to cultivate a deeper, more personal understanding of who we are, why we are, and what we think.

Moving Images Jasmine Alinder,2009 When the American government began impounding Japanese American citizens after Pearl Harbor, photography became a battleground. The control of the means of representation affected nearly every aspect of the incarceration, from the mug shots criminalizing Japanese Americans to the prohibition of cameras in the hands of inmates. The government also hired photographers to make an extensive record of the forced removal and incarceration. In this insightful study, Jasmine Alinder explores the photographic record of the imprisonment in war relocation centers such as Manzanar, Tule Lake, Jerome, and others. She investigates why photographs were made, how they were meant to function, and how they have been reproduced and interpreted subsequently by the popular press and museums in constructing versions of public history. Alinder provides calibrated readings of the photographs from this period, including works by Dorothea Lange, Ansel Adams, Manzanar camp inmate Toyo Miyatake (who constructed his own camera to document the complicated realities of camp life), and contemporary artists Patrick Nagatani and Masumi Hayashi. Illustrated with more than forty photographs, Moving Images reveals the significance of the camera in the process of incarceration as well as the construction of race, citizenship, and patriotism in this complex historical moment.

**Henry Ford** David Long,2016-07-15 The History Makers biography of Henry Ford illustrates the transformation of an American businessman from his building successes and ideals to his emergence as an icon of industry and the modern world. This title starts by analyzing his origins and the stages of his career, then goes beyond chronology to evaluate his emblematic principles and inventiveness. From life to legacy, readers witness the evolution of a man into legend.

*Listening to Images* Tina M. Campt,2017-03-17 In Listening to Images Tina M. Campt explores a way of listening closely to photography, engaging with lost archives of historically dismissed photographs of black subjects taken throughout the black diaspora. Engaging with photographs through sound, Campt looks beyond what one usually sees and attunes her senses to the other affective frequencies through which these photographs register. She hears in these photos—which range from late nineteenth-century ethnographic photographs of rural African women and photographs taken in an early twentieth-century Cape Town prison to postwar passport photographs in Birmingham,

England and 1960s mug shots of the Freedom Riders—a quiet intensity and quotidian practices of refusal. Originally intended to dehumanize, police, and restrict their subjects, these photographs convey the softly buzzing tension of colonialism, the low hum of resistance and subversion, and the anticipation and performance of a future that has yet to happen. Engaging with discourses of fugitivity, black futurity, and black feminist theory, Campt takes these tools of colonialism and repurposes them, hearing and sharing their moments of refusal, rupture, and imagination.

**English Pronunciation for Speakers of Spanish** María de los Ángeles Gómez González,Teresa Sánchez Roura,2016-01-15 English Pronunciation for Speakers of Spanish fills a gaping hole in the market for books on English phonetics and pronunciation because it not only combines theoretical issues and applications to practice, but it also adopts a contrastive English-Spanish approach to better suit the needs of Spanish-speaking learners of English (SSLE), enabling them to build gradually on the knowledge gained in each chapter. The book covers the key concepts of English phonetics and phonology in seven chapters written in an accessible and engaging style: 1. Phonetics and Phonology 2. The Production and Classification of Speech Sounds 3. Vowels and Glides 4. Consonants 5. Segment Dynamics: Aspects of Connected Speech 6. Beyond the Segment: Stress and Intonation 7. Predicting Pronunciation from Spelling (and vice versa) Features: in-text audio illustrations, as well as over a hundred written and audio exercises with corresponding keys and different kinds of artwork (Tables, Figures, illustrations, spectrograms, etc.) classic readings in the discipline in the Further Reading section of each chapter highlights the phonetic contrasts and specific cues that are more important to aid comprehension in English and offers guidelines on correct pronunciation habits to help SSLE sound as close as possible to native English The book's companion website, EPSS Multimedia Lab, can be used on computers, smartphones and tablets, and is useful for the self-taught student and the busy lecturer alike. Features of the website: a complete sound bank defining and illustrating the sounds of English RP as compared with those of Peninsular Spanish written definitions and animated diagrams, videos and original recordings (by native speakers of English and Spanish) showing the articulation of each sound, alongside its most common spellings, as well as pronunciation practice for individual words and whole sentences a comprehensive selection of over a hundred written and audio exercises (with their keys) for practice both at home or in the language lab audio files corresponding to the audio illustrations given in the written book a repository of useful resources by topics and a list of online glossaries and pronunciation dictionaries

**Reading Pictures** Alberto Manguel,2002 This profoundly illuminating, entertaining book could well change the way we read the visual world around us, and certainly help open our eyes and minds to its astonishing riches. The language in which we speak about art has become steadily more abstruse, a jargon that only art critics and con-artists can understand, though for thousands of years this was not the case. Today, we live in a kaleidoscopic new world of images: Is there a vocabulary we can learn in order to read these images? Is there something we can do so as not to remain passive when we flip through an illustrated book, or download images on a screen? Are there ways in which we can read the stories within paintings, monuments, buildings and sculptures? We say every picture tells a story -- but does it? Taking a handful of extraordinary images -- photographed, painted, built, sculpted -- Alberto Manguel explores how each one attempts to tell a story that we, the viewer, must decipher or invent. Reading Pictures is not about art history or theory -- it is about the astonishing pleasures and surprises of stories.
