The Fourth Monkey J. D. Barker, 2017-06

The Coast-to-Coast Murders James Patterson, J. D. Barker, 2020-09-21 A detective and FBI agent join forces on what seems like an open-and-shut case—but a new rash of killings sends them on a pulse-pounding race against time in this intense thriller. Michael and Megan Fitzgerald are siblings who share a terrifying past. Both adopted, and now grown—Michael is a long-haul truck driver, Megan a college student majoring in psychology—they trust each other before anyone else. They've had to. Their parents are public intellectuals, an Ivy League clinical psychologist and a renowned psychiatrist, and they brought up their adopted children in a rarefied, experimental environment. It sheltered them from the world's harsh realities, but it also forced secrets upon them, secrets they keep at all costs. In Los Angeles, Detective Garrett Dobbs and FBI Agent Jessica Gimble have joined forces to work a murder that seems like a dead cinch. Their chief suspect is quickly identified and apprehended—but then there's another killing just like the one they've been investigating. And another. And not just in Los Angeles—the spree spreads across the country. The Fitzgerald family comes to the investigators' attention, but Dobbs and Gimble are at a loss—if one of the four is involved, which Fitzgerald might it be? From coastal California to upstate New York, Dobbs and Gimble race against time and across state lines to stop an ingenious and deeply deranged killer—one whose dark and

twisted appetites put them outside the range of logic or experience.

The Joy-Ride and After A. L. Barker, 2014-11-20 *The Joy-Ride and After* was A.L. Barker's third collection of shorter pieces, first published in 1963. It offers three novellas, linked by certain recurrent characters and by their variations on the themes of loneliness and insecurity. The first tells of what has led to a young garage-hand 'borrowing' his employer's car, and of the disastrous consequences that ensue. In the second, a betrayed wife loses her memory after an accident, and finds herself on a barge with an old reprobate. The third concerns the tribulations of a canteen manager who has an inscrutable boss and an extravagant wife. Whether they live in slum tenement or suburban semi-detached, these 'ordinary' people become alive and phenomenal to us through the force and sympathy of Barker's imagination.

John Brown's Body A. L. Barker, 2014-11-20 'An extraordinary achievement.' A. S. Byatt *John Brown's Body*, first published in 1969, was A.L. Barker's fourth novel and was shortlisted for the second annual Booker Prize in 1970. Marise Tomelty is the young wife of a travelling salesman, who dislikes sex and is terrified of open spaces. Ralph Shilling, a dealer in pesticides, lives in the flat above the Tomeltys'. One day Marise's husband casually mentions that he recognises Ralph as John Brown: a man acquitted, for lack of evidence, of the gruesome double murder of two sisters. Nevertheless, Marise encourages Ralph's attentions, intoxicated by a heady mix of passion and fear. 'She is formidable, and from a bare corner of human relations gathers a

rich harvest.' Adam Mars-Jones 'It would be hard to find anyone who chooses words more exactly or constructs with more precision.' Penelope Fitzgerald

The Noise James Patterson, 2021-08-05 'A really entertaining thriller [that] like Michael Crichton . . . keeps ratcheting up the suspense' BOOKLIST

_____ Two sisters have always stood together. Now, they're the only ones left. In the shadow of Mount Hood in the US Pacific Northwest, sixteen-year-old Tennant is checking rabbit traps with her eight-year-old sister Sophie. The girls are suddenly overcome by a strange vibration rising out of the forest, building in intensity until it sounds like a deafening crescendo of screams. From out of nowhere, their father sweeps them up and drops them through a trapdoor into a storm cellar. But the noise only gets worse . . . _____ 'No one gets this big without amazing natural storytelling talent - which is what Jim has, in spades' LEE CHILD 'The master storyteller of our times' HILLARY RODHAM CLINTON 'It's no mystery why James Patterson is the world's most popular thriller writer . . . Simply put: nobody does it better' JEFFERY DEAVER 'Patterson boils a scene down to the single, telling detail, the element that defines a character or moves a plot along. It's what fires off the movie projector in the reader's mind' MICHAEL CONNELLY 'One of the greatest storytellers of all time' PATRICIA CORNWELL 'A writer with an unusual skill

at thriller plotting' MARK LAWSON, GUARDIAN 'James Patterson is The Boss. End of.' IAN RANKIN

Implacable Foes Waldo Heinrichs, Marc Gallicchio, 2017-05-01 On May 8, 1945, Victory in Europe Day-shortened to V.E. Day-brought with it the demise of Nazi Germany. But for the Allies, the war was only half-won. Exhausted but exuberant American soldiers, ready to return home, were sent to join the fighting in the Pacific, which by the spring and summer of 1945 had turned into a gruelling campaign of bloody attrition against an enemy determined to fight to the last man. Germany had surrendered unconditionally. The Japanese would clearly make the conditions of victory extraordinarily high. In the United States, Americans clamored for their troops to come home and for a return to a peacetime economy. Politics intruded upon military policy while a new and untested president struggled to strategize among a military command that was often mired in rivalry. The task of defeating the Japanese seemed nearly unsurmountable, even while plans to invade the home islands were being drawn. Army Chief of Staff General George C. Marshall warned of the toll that the agony of enduring battle would likely take. General Douglas MacArthur clashed with Marshall and Admiral Nimitz over the most effective way to defeat the increasingly resilient Japanese combatants. In the midst of this division, the Army began a program of partial demobilization of troops in Europe, which depleted units at a time when they most needed experienced soldiers. In this context of military emergency, the fearsome projections of

the human cost of invading the Japanese homeland, and weakening social and political will, victory was salvaged by means of a horrific new weapon. As one Army staff officer admitted, The capitulation of Hirohito saved our necks. In *Implacable Foes*, award-winning historians Waldo Heinrichs (a veteran of both theatres of war in World War II) and Marc Gallicchio bring to life the final year of World War Two in the Pacific right up to the dropping of the atomic bombs over Hiroshima and Nagasaki, evoking not only Japanese policies of desperate defense, but the sometimes rancorous debates on the home front. They deliver a gripping and provocative narrative that challenges the decision-making of U.S. leaders and delineates the consequences of prioritizing the European front. The result is a masterly work of military history that evaluates the nearly insurmountable trials associated with waging global war and the sacrifices necessary to succeed.

The Rose Code Kate Quinn, 2021-03-09 "The reigning queen of historical fiction" -- Fiona Davis, New York Times bestselling author of *The Lions of Fifth Avenue* The New York Times and USA Today bestselling author of *The Huntress* and *The Alice Network* returns with another heart-stopping World War II story of three female code breakers at Bletchley Park and the spy they must root out after the war is over. 1940. As England prepares to fight the Nazis, three very different women answer the call to mysterious country

estate Bletchley Park, where the best minds in Britain train to break German military codes. Vivacious debutante Osla is the girl who has everything—beauty, wealth, and the dashing Prince Philip of Greece sending her roses—but she burns to prove herself as more than a society girl, and puts her fluent German to use as a translator of decoded enemy secrets. Imperious self-made Mab, product of east-end London poverty, works the legendary codebreaking machines as she conceals old wounds and looks for a socially advantageous husband. Both Osla and Mab are quick to see the potential in local village spinster Beth, whose shyness conceals a brilliant facility with puzzles, and soon Beth spreads her wings as one of the Park's few female cryptanalysts. But war, loss, and the impossible pressure of secrecy will tear the three apart. 1947. As the royal wedding of Princess Elizabeth and Prince Philip whips post-war Britain into a fever, three friends-turned-enemies are reunited by a mysterious encrypted letter--the key to which lies buried in the long-ago betrayal that destroyed their friendship and left one of them confined to an asylum. A mysterious traitor has emerged from the shadows of their Bletchley Park past, and now Osla, Mab, and Beth must resurrect their old alliance and crack one last code together. But each petal they remove from the rose code brings danger--and their true enemy--closer...

Molecular Mechanisms for Repair of DNA Philip Hanawalt, 2012-12-06 An age has passed in the 40 years since we first observed recovery from radiation

damage in irradiated bacteria. During the early 1930s, we had been discussing the possibility of rapid changes after radiation exposure with Farring ton Daniels, Benjamin Duggar, John Curtis, and others at the University of Wisconsin. After working with living cells, we had concluded that organisms receiving massive insults must have a wide variety of repair mechanisms available for restoration of at least some of the essential properties of the cell. The problem was how to find and identify these recovery phenomena. At that time I was working on a problem considered to be of great importance-the existence of the so-called mitogenetic rays. Several hundred articles and a score of books had already appeared dealing with mitogenetic rays, a type of radiation that was thought to exist in the shorter ultraviolet region. Our search for mitogenetic rays necessitated the design of experiments of greatest sensitivity for the detection of ultraviolet. It was vital that conditions be kept as constant as possible during exposure. All the work was done at icewater temperature (3-5°C) during and after exposure. We knew that light was an important factor for cell recovery, so all our experiments were done in dim light, with the plated-out cells being covered with dark cloth. Our statements on the effect of visible light stimulated Kelner to search for 'photoreactivation' (as it was later called).

Clare Through the Twentieth Century Lindsey Shaw-Miller,2001 Numerous histories have been written of the older colleges of Oxford and Cambridge. During the 20th century, Clare, founded in 1326, has two - Manfield Forbes' eccentric six century survey up to 1926, and Richard Eden's recent Clare College and the Founding of Clare Hall. However no previous attempt has been made by the College, or as far as is known by any Oxbridge college, to present a wide-ranging overview of college life and learning through the 20th century.
