X-Men(tm) The Last Stand Chris Claremont,2006-05-16 A novelization of the major motion picture! TAKE A STAND. The world has acquired a lethal new weapon against X-gene mutants, whose superhuman powers separate them—for better, for worse, forever—from ordinary mortals. Now, for the first time, mutants have a choice: retain their godlike abilities, though their powers may isolate and alienate them, or surrender them and become human. The mutant antibody is called a cure, but its invention may trigger a struggle that destroys every living soul on Earth. As Magneto declares all-out war against humanity and its dreaded cure, the U.S. president mobilizes the military. But it is Charles Xavier and the X-Men who truly must brace for the ultimate battle, for they alone are powerful enough to determine the outcome. Lessons of the past are useless in the coming life-and-death conflict, as new players—mutants possessing unprecedented, unearthly skills—take center stage. With so many joining forces with Magneto's evil Brotherhood, the X-Men will face their ultimate test against an enemy whose forces far outnumber their own. Now, as the world trembles, the Phoenix slowly rises. . .

X-Men Michael Mallory,2014-09-01 X-Men: The Characters and Their Universe tells the story of this unique band of comic book heroes from their creation in 1963 by the dream team of writer Stan Lee and artist Jack Kirby, through their late 1970s re-emergence as a platform for socially and politically relevant storytelling, and up to the present as one of the globe's hottest franchises. This colorful, lavishly illustrated volume also traces how the characters have been adapted into the media of television and film, including the ground-breaking 1992 animated series and the blockbuster feature films, including X-Men III: The Final Stand, released in May of 2006. For fans of the comic books, this volume also provides a unique one-source catalogue of every major character that appeared from 1963 to the present, including all the various teamings of characters, the significant comic book series, the various character relationships and evolutions, and the classic storylines that have all woven together over the decades to create the dazzlingly complex and fascinating tapestry of the world of mutants. X-Men: The Characters and Their Universe is a book that no fan of Marvel Comics, of super heroics, of animation and action adventure filmmaking, even of popular culture of the late 20th century itself, will want to be without.

The Best There is at what He Does Jason Powell,2016 The X-Men franchise is a sprawling comic-book mythology, to which hundreds of creators have contributed material over the past 50 years. The period from 1975 to 1991 is special, however, as the X-Men universe was guided by the voice of one writer, who wrote every single issue of THE UNCANNY X-MEN during that span. His name is Chris Claremont, and he made the X-Men what it is today. THE BEST THERE IS AT WHAT HE DOES is an appreciation of the long-term narrative Claremont lovingly crafted month after month, over the course of nearly 17 years. Proceeding chronologically through the issues, this exhaustive overview analyzes the trends, arcs, and themes that emerge over the course of his landmark comics opus. From Sequart Organization.
