The Web and the Rock Thomas Wolfe,1939 Thomas Wolfe contended that *The Web and the Rock*, the precursor to *You Can't Go Home Again*, was not only a turning away from the books I have written in the past, but a genuine spiritual and artistic change. To demonstrate his commitment to a new literary direction, he transformed his protagonist Eugene Gant into the more mature and aware George Webber.

1950s in Vogue Rebecca Tuite,2019-12-10 A large-scale publication dedicated to the 1950s as captured in the pages of *American Vogue*. This book is illustrated by fashion's greatest photographs of that period—the era when the magazine became the cultural force it is today. One of only seven editors in chief in *American Vogue*'s history, Jessica Daves has remained one of fashion's most enigmatic figures. Diana Vreeland's direct predecessor in the role, it is Daves who first catapulted the magazine into modernity. A testament to a changing America on every level, Daves's *Vogue* was the first to embrace a "high/low" blend of fashion in its pages and to introduce world-renowned artists, literary greats, and cultural icons into every issue, offering the reader a complete vision of how design, interiors, architecture, entertaining, art, literature, and culture all connected and contributed to refining and defining taste and personal style. Daves profiled icons of American style, from John and Jackie Kennedy to Charles and Ray Eames, alongside Dior, Chanel, Givenchy, and Balenciaga creations. Organized in multifaceted, thematic chapters, *1950s in Vogue* features carefully curated photographs, illustrations, and page spreads from the *Vogue* archives (with iconic images as well as lesser-known wonders), and unpublished photographs and letters from Jessica Daves's personal archives. Revealing a fascinating and hitherto little-explored moment in *Vogue* history, *1950s in Vogue* is a must-have reference for lovers of fashion, photography, and style.

Data and Text Processing for Health and Life Sciences Francisco M.

Couto,2019-06-10 This open access book is a step-by-step introduction on how shell scripting can help solve many of the data processing tasks that Health and Life specialists face everyday with minimal software dependencies. The examples presented in the book show how simple command line tools can be used and combined to retrieve data and text from web resources, to filter and mine literature, and to explore the semantics encoded in biomedical ontologies. To store data this book relies on open standard text file formats, such as TSV, CSV, XML, and OWL, that can be open by any text editor or spreadsheet application. The first two chapters, *Introduction* and *Resources*, provide a brief introduction to the shell scripting and describe popular data resources in Health and Life Sciences. The third chapter, *Data Retrieval*, starts by

introducing a common data processing task that involves multiple data resources. Then, this chapter explains how to automate each step of that task by introducing the required commands line tools one by one. The fourth chapter, Text Processing, shows how to filter and analyze text by using simple string matching techniques and regular expressions. The last chapter, Semantic Processing, shows how XPath queries and shell scripting is able to process complex data, such as the graphs used to specify ontologies. Besides being almost immutable for more than four decades and being available in most of our personal computers, shell scripting is relatively easy to learn by Health and Life specialists as a sequence of independent commands. Comprehending them is like conducting a new laboratory protocol by testing and understanding its procedural steps and variables, and combining their intermediate results. Thus, this book is particularly relevant to Health and Life specialists or students that want to easily learn how to process data and text, and which in return may facilitate and inspire them to acquire deeper bioinformatics skills in the future.

Muscle Pain: Understanding the Mechanisms Siegfried Mense, Robert D. Gerwin, 2010-06-21 This edition of the companion volumes *Muscle Pain: Understanding the Mechanisms* and *Muscle Pain: Diagnosis and Treatment* is essential reading for those interested in clinical approaches to acute and chronic pain conditions involving muscle tissues and in the mechanisms underlying these conditions. The volumes cover a very important topic in pain medicine, since muscle pain is very common and can often be difficult to diagnose and treat effectively. Furthermore, chronic pain involving muscle and other components of the musculoskeletal system increases with age, such that it is a common complaint of those of us who are middle-aged or older. Indeed, as changing population demographics in "westernized" countries result in higher proportions of the population living longer and being middle-aged and elderly, chronic muscle pain will likely become even more of a health problem. In the case of acute muscle pain, this can often be very intense, and in the short term can limit or modify the use of components of the musculoskeletal system associated with the sensitive muscle. Chronic muscle pain can also be intense, as well as unpleasant and disabling, and it is in many cases the over-riding symptom of most musculoskeletal disorders that are associated with long-term deleterious changes in musculoskeletal function.

My Story Marilyn Monroe, 2006-11-25 Written at the height of her fame but not published until over a decade after her death, this autobiography of actress and sex symbol Marilyn Monroe (1926-1962) poignantly recounts her childhood as an unwanted orphan, her early adolescence, her rise in the film industry from bit player to celebrity, and her marriage to Joe DiMaggio. In this intimate account of a very public life, she tells of her first (non-consensual) sexual experience, her romance with the Yankee Clipper, and her prescient vision of herself as the kind of girl they found dead in the hall bedroom with an empty bottle of sleeping pills in her hand. The Marilyn in these pages is a revelation: a gifted, intelligent, vulnerable woman who was far more complex than the unwitting sex siren she portrayed on screen. Lavishly illustrated with photos of Marilyn, this special book celebrates the life and career of an American icon—from the unique perspective of the icon herself.

I, Cosmo Carlisle Sorosiak, 2021-03-30 A golden retriever narrates a hilarious, heart-tugging tale of a dog and his humans as he tries to keep his family together while everything around them falls apart. Ever since Cosmo became a big brother to Max ten years ago, he's known what his job was: to protect his boy and make him happy. Through many good years marked by tennis balls and pilfered turkey, torn-up toilet paper and fragrant goose poop, Cosmo has doggedly kept his vow. Until recently, his biggest problems were the evil tutu-wearing sheepdog he met on Halloween and the arthritis in his own joints. But now, with Dad-scented blankets appearing on the couch and arguing voices getting louder, Cosmo senses a tougher challenge ahead. When Max gets a crazy idea to teach them both a dance routine for a contest, how can Cosmo refuse, stiff hips or no? Max wants to remind his folks of all the great times they've had together dancing – and make them forget about the “d” word that's making them all cry. Told in the open, optimistic, unintentionally humorous voice of a golden retriever, *I, Cosmo* will grab readers from the first page – and remind them that love and loyalty transcend whatever life throws your way.

The Geometry and Cohomology of Some Simple Shimura Varieties. (AM-151) Michael Harris, Richard Lawrence Taylor, Richard Taylor, 2001-11-04 This book aims first to prove the local Langlands conjecture for GL_n over a p -adic field and, second, to identify the action of the decomposition group at a prime of bad reduction on the l -adic cohomology of the simple Shimura varieties. These two problems go hand in hand. The results represent a major advance in algebraic number theory, finally proving the conjecture first proposed in Langlands's 1969 Washington lecture as a non-abelian generalization of local class field theory. The local Langlands conjecture for $GL_n(K)$, where K is a p -adic field, asserts the existence of a correspondence, with certain formal properties, relating n -dimensional representations of the Galois group of K with the representation theory of the locally compact group $GL_n(K)$. This book constructs a candidate for such a local Langlands correspondence on the vanishing cycles attached to the bad reduction over the integer ring of K of a certain family of Shimura varieties. And it proves that this is roughly compatible with the global Galois correspondence realized on the cohomology of the same Shimura varieties. The local Langlands conjecture is obtained as a corollary. Certain techniques developed in this book should extend to more general Shimura varieties, providing new instances of the local Langlands conjecture. Moreover, the geometry of the special fibers is strictly analogous to that of Shimura curves and can be expected to have applications to a variety of questions in number theory.

How Tobacco Smoke Causes Disease, 2010 This report considers the biological and behavioral mechanisms that may underlie the pathogenicity of tobacco smoke. Many Surgeon General's reports have considered research findings on mechanisms in assessing the biological plausibility of associations observed in epidemiologic studies. Mechanisms of disease are important because they may provide plausibility, which is one of the guideline criteria for assessing evidence on causation. This report specifically reviews the evidence on the potential mechanisms by which smoking causes diseases and considers whether a mechanism is likely to be operative in the production of human disease by tobacco smoke. This evidence is relevant to understanding how smoking causes disease, to identifying those who may be particularly susceptible, and to assessing the potential risks of tobacco products.
