**Charter School Outcomes** Mark Berends, Matthew G. Springer, Herbert J. Walberg, 2017-09-25 Sponsored by the National Center on School Choice, a research consortium headed by Vanderbilt University, this volume examines the growth and outcomes of the charter school movement. Starting in 1992-93 when the nation's first charter school was opened in Minneapolis, the movement has now spread to 40 states and the District of Columbia and by 2005-06 enrolled 1,040,536 students in 3,613 charter schools. The purpose of this volume is to help monitor this fast-growing movement by compiling, organizing and making available some of the most rigorous and policy-relevant research on K-12 charter schools. Key features of this important new book include: Expertise - The National Center on School Choice includes internationally known scholars from the following institutions: Harvard University, Brown University, Stanford University, Brookings Institution, National Bureau of Economic Research and Northwest Evaluation Association. Cross-Disciplinary - The volume brings together material from related disciplines and methodologies that are associated with the individual and systemic effects of charter schools. Coherent Structure - Each section begins with a lengthy introduction that summarizes the themes and major findings of that section. A summarizing chapter by Mark Schneider, the Commissioner of the National Center on Educational Statistics, concludes the book. This volume is appropriate for researchers, instructors and graduate students in education policy programs and in political science and economics, as well as in-service administrators, policy makers, and providers.

**School Governance in Global Contexts** Nicholas Sun Keung PANG, Philip Wing Keung CHAN, 2021-12-28 The edited volume provides multiple lens to view school governance practices, exploring its modernization, ethical review, future trend, as well as the reciprocal influence of educational policy. Drawing on a wide-spread experience in the field of education governance from leading scholars, emerging scholars, doctoral research students and school

principals, this book includes insights from 11 countries and economies across four continents: Asia, Europe, North America and Oceanic. Most of them are high achievers in the OECD's PISA 2018 worldwide ranking in mathematics, science and reading. The book not only lifts to the forefront school governance educational thinking, but also acknowledges their complex evolution, especially under the current impact of COVID-19 Pandemic. This book will be of interest to academics, professionals and policymakers in education and school governance, and any scholars who engage in historical studies of education and debates about educational governance.

*The Urban School System of the Future* Andy Smarick, 2012-10-12 For more than two generations, the traditional urban school system—the district—has utterly failed to do its job: prepare its students for a lifetime of success. Millions and millions of boys and girls have suffered the grievous consequences. The district is irreparably broken. For the sake of today's and tomorrow's inner-city kids, it must be replaced. The Urban School System of the Future argues that vastly better results can be realized through the creation of a new type of organization that properly manages a city's portfolio of schools using the revolutionary principles of chartering. It will ensure that new schools are regularly created, that great schools are expanded and replicated, that persistently failing schools are closed, and that families have access to an array of high-quality options. This new entity will focus exclusively on school performance, meaning, among other things, our cities can thoughtfully integrate their traditional public, charter public, and private schools into a single, high-functioning k-12 system. For decades, the district has produced the most heartbreaking results for already at-risk kids. The Urban School System of the Future explains how we can finally turn the tide and create dynamic, responsive, high-performing, self-improving urban school systems that fulfill the promise of public education.

**School's Choice** Wagma Mommandi, Kevin Welner, 2021 Access issues are pivotal to almost all charter school tensions and debates. How well are these schools performing? Are they segregating and stratifying? Are they public and democratic? Are they fairly funded? Can apparent successes be scaled up? Answers to all these core questions hinge on how access to charter schools is shaped. This book describes the incentives and pressures on charter schools to restrict access and examines how charters navigate those pressures, explaining access-restricting practices in relation to the ecosystem within which charter schools are created. It also explains how charters have sometimes responded by resisting the pressures and sometimes by surrendering to them. The text presents analyses of 13 different types of practices around access, each of which shapes the school's enrollment. The authors conclude by offering recommendations for how states and authorizers can address access-related inequities that arise in the charter sector. **School's Choice** provides timely information on critical academic and policy issues that will come into play as charter school policy continues to evolve. **Book Features:** Examines how charter schools control who gains and retains access. Explores policies and practices that undermine equitable admission and encourage opportunity hoarding. Offers a set of policy recommendations at the state and federal level to address access-related issues.

**Charter School Report Card** Shawgi Tell, 2016-04-01 What is a charter school? Where do they come from? Who promotes them, and why? What are they supposed to do? Are they the silver bullet to the ills plaguing the American public education system? This book provides a comprehensive and accessible overview and analysis of charter schools and their many dimensions. It shows that charter schools as a whole lower the quality of education through the privatization and marketization of education. The final chapter provides readers with a way toward rethinking and remaking education in a way that is consistent with modern requirements. Society and its members need a fully funded high quality public education system open to all and controlled by a public authority.

**Handbook of Research on School Choice** Mark Berends, Ann Primus, Matthew G. Springer, 2019-06-20 Updated to reflect the latest developments and increasing scope of school-based options, the second edition of the Handbook of Research on School Choice makes readily available the most rigorous and policy-relevant research on K-12 school choice. This comprehensive research handbook begins with scholarly overviews that explore historical, political, economic, legal, methodological, and international perspectives on school choice. In the following sections, experts examine the research and current state of common forms of school choice: charter schools, school vouchers, and magnet schools. The concluding section brings together perspectives on other key topics such as accountability, tax credit scholarships, parent decision-making, and marginalized students. With empirical perspectives on all aspects of this evolving sphere of education, this is a critical resource for researchers, faculty, and students interested in education policy, the politics of education, and educational leadership.
