Love, Lucas Chantele Sedgwick, 2015-05-05 A 2015 Whitney Award Nominee! A powerful story of loss, second chances, and first love, reminiscent of Sarah Dessen and John Green. When Oakley Nelson loses her older brother, Lucas, to cancer, she thinks she'll never recover. Between her parents' arguing and the battle she's fighting with depression, she feels nothing inside but a hollow emptiness. When Mom suggests they spend a few months in California with Aunt Jo, Oakley isn't sure a change of scenery will alter anything, but she's willing to give it a try. In California, Oakley discovers a sort of safety and freedom in Aunt Jo's beach house. Once they're settled, Mom hands her a notebook full of letters addressed to her—from Lucas. As Oakley reads one each day, she realizes how much he loved her, and each letter challenges her to be better and to continue to enjoy her life. He wants her to move on. If only it were that easy. But then a surfer named Carson comes into her life, and Oakley is blindsided. He makes her feel again. As she lets him in, she is surprised by how much she cares for him, and that's when things get complicated. How can she fall in love and be happy when Lucas never got the chance to do those very same things? With her brother's dying words as guidance, Oakley knows she must learn to listen and trust again. But will she have to leave the past behind to find happiness in the future? Sky Pony Press, with our Good Books, Racehorse and Arcade imprints, is proud to publish a broad range of books for young readers—picture books for small children, chapter

books, books for middle grade readers, and novels for young adults. Our list includes bestsellers for children who love to play Minecraft; stories told with LEGO bricks; books that teach lessons about tolerance, patience, and the environment, and much more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to books on subjects that are sometimes overlooked and to authors whose work might not otherwise find a home.

The Explorer's Code (Enhanced eBook) Kitty Pilgrim, 2011-06-28 Award-winning CNN journalist Kitty Pilgrim turns her talents to print in *The Explorer's Code*, an exciting international thriller that revolves around the quest for a land deed valuable enough to kill for. This enhanced e-book includes five videos that explain more about oceanography, archaeology, the 1918 flu pandemic, Victorian painting, and the international seed vault. A short interview with Kitty will introduce these videos and provide an introduction to Kitty, how she came to write this book, and set the stage for the videos. These topics are discussed in this entertaining, informative novel filled with action and adventure as well as glamour, romance and international intrigue. When the renowned young oceanographer Cordelia Stapleton receives an invitation to accept an award on behalf of her great-great-grandfather, a famous Victorian polar explorer, she has no idea her life is about to change dramatically. John Sinclair—a dashing, wealthy archaeologist and philanthropist—presents Cordelia with the award at the glamorous Oceanographic Institute Ball in Monaco. He also

gives her a journal that her greatgreat-grandfather wrote in 1908. An orphan with very few family belongings, Cordelia is amazingly touched to have this precious heirloom. Once the journal is in her possession, Cordelia learns that she is heir to the land on which the Global Seed Vault in Norway sits. The valuable deed for this land, or at least a clue to its whereabouts, may be hidden in the journal. When the journal disappears from Cordelia's stateroom on the Queen Victoria and Cordelia receives threatening e-mails, it becomes clear that she is in danger. John Sinclair comes to Cordelia's aid, helping her search for the missing journal and land deed, and capturing her heart. As they race to find the deed, Cordelia and Sinclair encounter a team of British virologists trying to decode the genome of the 1918 influenza pandemic, but unearthing infected tissue samples may prove more lethal than curative. Cordelia and Sinclair sail through the Mediterranean from Monaco to an archaeological site in Ephesus, Turkey. They travel to a beautiful old Parisian home and a lavish estate in the British countryside. Their search culminates in the high Arctic archipelago of Svalbard, not far from the North Pole. Behind them every step of the way are a consortium of Russian underworld criminals, religious fanatics from Texas, a sinister botanist, and a sexy American spy, all hunting for the deed, all pursuing Cordelia. The Explorer's Code is a satisfying blend of historical detail, fast-paced action, scientific discovery, and the thrill of exploration that informs as well as entertains. The breathtaking ending in the high

Arctic is as chilling as a polar breeze.

Subordinating Intelligence David P. Oakley,2019-03-15 In the late eighties and early nineties, driven by the post-Cold War environment and lessons learned during military operations, United States policy makers made intelligence support to the military the Intelligence Community's top priority. In response to this demand, the CIA and DoD instituted policy and organizational changes that altered their relationship with one another. While debates over the future of the Intelligence Community were occurring on Capitol Hill, the CIA and DoD were expanding their relationship in peacekeeping and nation-building operations in Somalia and the Balkans. By the late 1990s, some policy makers and

national security professionals became concerned that intelligence support to military operations had gone too far. In *Subordinating Intelligence: The DoD/CIA Post-Cold War Relationship*, David P. Oakley reveals that, despite these concerns, no major changes to national intelligence or its priorities were implemented. These concerns were forgotten after 9/11, as the United States fought two wars and policy makers increasingly focused on tactical and operational actions. As policy makers became fixated with terrorism and the United States fought in Iraq and Afghanistan, the CIA directed a significant amount of its resources toward global counterterrorism efforts and in support of military operations.

UCLA Marina Dundjerski, 2011 *UCLA: The First Century* is an extensively illustrated hardcover book which follows a chronological historical narrative with in-depth sections on campus traditions and the history of Bruin athletics. '100 years of UCLA on your coffee table.' Los Angeles Times I wanted to create an authentic, historical account

of our university. Every day I am inspired by the story of UCLA and I see its history as a collective, living legacy that we all share. Marina Dundjerski '94, Author 'The book is indeed beautiful. The Railroad in American Fiction Grant

Burns,2015-01-28 Nothing better represented the early spirit of American expansion than the railroad. Dominant in daily life as well as in the popular imagination, the railroad appealed strongly to creative writers. For many years, fiction of railroad life and travel was plentiful and varied. As the nineteenth century receded, the railroad's allure faded, as did railroad fiction. Today, it is hard to sense what the railroad once meant to Americans. The fiction of the railroad—often by railroaders themselves—recaptures that sense, and provides valuable insights on American cultural history. This extensively annotated bibliography lists and discusses in 956 entries novels and short stories from the 1840s to the present in which the railroad is important. Each entry includes plot and character description to help the reader make an informed decision on the source's merit. A detailed introduction discusses the history of railroad fiction and highlights common themes such as strikes, hoboes, and the roles of women and African-Americans. Such writers of “pure” railroad fiction as Harry Bedwell, Frank Packard, and Cy Warman are well represented, along with such

literary artists as Mark Twain, Thomas Wolfe, Flannery O'Connor, and Ellen Glasgow. Work by minority writers, including Jean Toomer, Richard Wright, Frank Chin, and Toni Morrison, also receives close attention. An appendix organizes entries by decade of publication, and the work is indexed by subject and title.

Let 'Er Buck! Vaunda Micheaux Nelson,2019-02-05
Nelson plaits her narrative with Western lingo and homespun similes. . . . James' painterly oils swirl with energy, visible daubs creating the dusty, monumental landscape and equally monumental horses and humans. . . . A champion indeed.

–Kirkus Reviews (starred review) The true tale of a cowboy's epic rodeo ride from acclaimed author Vaunda Micheaux Nelson and Caldecott Honoree Gordon C. James. In 1911, three men were in the final round of the famed Pendleton Round-Up. One was white, one was Indian, and one was black. When the judges declared the white man the winner, the audience was outraged. They named black cowboy George Fletcher the people's champion and took up a collection, ultimately giving Fletcher far more than the value of the prize that went to the official winner. Award-winning author Vaunda Micheaux Nelson tells the story of Fletcher's unlikely triumph with a western flair that will delight kids—and adults—who love true stories, unlikely heroes, and cowboy tales.

In Binge, Tyler delivers his best untold, hilariously side-splitting moments with the trademark flair that made him a star.

The Cold Start Problem Andrew Chen,2021-12-07 A startup executive and investor draws on expertise developed at the premier venture capital firm Andreessen Horowitz and as an executive at Uber to address how tech's most successful products have solved the dreaded cold start problem"—by leveraging network effects to launch and scale toward billions of users. Although software has become easier to build, launching and scaling new products and services remains difficult. Startups face daunting challenges entering the technology ecosystem, including stiff competition, copycats, and ineffective marketing channels. Teams launching new products must consider the advantages of "the network effect," where a product or service's value increases as more users

engage with it. Apple, Google, Microsoft, and other tech giants utilize network effects, and most tech products incorporate them, whether they're messaging apps, workplace collaboration tools, or marketplaces. Network effects provide a path for fledgling products to break through, attracting new users through viral growth and word of mouth. Yet most entrepreneurs lack the vocabulary and context to describe them—much less understand the fundamental principles that drive the effect. What exactly are network effects? How do teams create and build them into their products? How do products compete in a market where every player has them? Andrew Chen draws on his experience and on interviews with the CEOs and founding teams of LinkedIn, Twitch, Zoom, Dropbox, Tinder, Uber, Airbnb, and Pinterest to offer unique insights in answering these questions. Chen also provides practical frameworks and principles that can be applied across products and industries. The Cold Start Problem reveals what makes winning networks thrive, why some startups fail to successfully scale, and, most crucially, why products that create and compete using the network effect are vitally important today.
