Wave Woman Vicky Heldreich Durand,2020-04-07 Wave Woman is the untold story of an adventurer whose zest for life and learning kept her alive for ninety-eight years. Betty Pembroke Heldreich Winstedt was the granddaughter of Mormon pioneers who, after spending an active and athletic childhood in Salt Lake City, moved to Santa Monica with her family and enrolled at USC to study dental hygiene. Betty went on to elope with a man she hardly knew, and to have two daughters. In middle age, Betty finally followed her dream of living near the ocean; she moved to Hawaii and, at age forty-one, took up surfing. She lived and surfed at Waikiki during the golden years of the mid-1950s and was a pioneer surfer at Makaha Beach. She was competitive in early big-wave surfing championships and was among the first women to compete in Lima, Peru, where she won first place. Betty was an Olympic hopeful, a pilot, a mother, a sculptor, a jeweler, a builder,

a fisherwoman, an ATV rider, and a potter who lived life her way, dealing with adversity and heartache on her own stoic terms. A love letter from a daughter to her larger-than-life mother, Wave Woman will speak to any woman searching for self-confidence, fulfillment, and happiness.

Children, Technology and Healthy Development

Catherine Knibbs, 2021-09-28 How can adults keep children safe and healthy online now and in the future? How can we thrive alongside technology? This highly accessible book unpacks the latest psychological research, attachment theory and neurobiology to offer parents and professionals insight into how technology impacts children's development and how to navigate our lives online. Catherine Knibbs shares her extensive experience to reveal what we know about human behaviour in cyberspace, and particularly that of children using devices, consoles and social media platforms. She offers deeper understanding of how and why children engage online and shows parents and professionals how, rather than being overwhelmed by the dangers and pathologies of cyberspace, we can learn to support children in using technology healthily. She covers key topics including social media use and

abuse, impact of screen time, issues around gaming and extreme behaviours online. By the end of this book you will be able to understand your child better, and have an understanding of what is happening in their minds, brains and bodies in relation to the technological and digital world. Children, Technology and Healthy Development is for all parents, and professionals in psychology, education, social care and the police who are concerned with understanding how we support children in an online world. It will also be valuable reading for those in tech design interested in the impact of technology on the developing human.

Shipboard Acoustics J. Buiten,2012-12-06 The first International Symposium on Shipboard Acoustics, held in

Noordwijkerhout (The Netherlands) in 1976, was a meeting of invited experts, each having considerable expertise in ship acoustics. Many of the participants were dealing with research on various ship acoustical subjects, and it proved to be a good idea to discuss future investigations and new techniques. At that time acousticians learned to use real-time signal-processing techniques and attempts were made to establish sound level prediction methods based on semi-fundamental considerations instead of the methods using empirically obtained data. Time was pressing as it was assumed that, in view of the adoption of Recommendation 141 of the International Labour Conference in 1970, authorities would soon make appropriate provisions to protect seafarers from the ill effects of noise. This resulted in several national recommendations followed by the IMO Code on noise levels aboard ships which was adopted by the IMO Assembly in 1981. After that, pressure on the authorities was increased further by the decision of the European Community to protect labourers against harmful noise at their workplaces, including ships. Legally enforceable noise limits will therefore become normal in the future. In many countries recommendations with respect to maximum allowable sound pressure levels in the crew accommodations and work area aboard ships were already taken into account by ship owners, long before the existence of the Recommendations.
