Authoritative Parenting Robert E. Larzelere,Amanda Sheffield Morris,Amanda W. Harrist,2013 Psychologist Diana Baumrind's revolutionary prototype of parenting, called authoritative parenting, combines the best of various parenting styles. In contrast to previously advocated styles involving high responsiveness and low demandingness (i.e., permissive parenting) or low responsiveness and high demandingness (i.e., authoritarian parenting), authoritative parenting involves high levels of both responsiveness and demandingness. The result is an appropriate mix of warm nurturance and firm discipline. Decades of research have supported the prototype, and we now know that authoritative parenting fosters high achievement, emotional adjustment, self-reliance, and social confidence in children and adolescents. In this book, leading scholars update our thinking about authoritative parenting and address three unresolved issues: mechanisms of the style's effectiveness, variations of effectiveness across cultures, and untangling how parents influence children from how children influence them. By integrating perspectives from developmental and clinical psychology, the book will inform prevention and intervention efforts to help parents maximise their children's

potential.

Authoritative Governance Maarten A. Hajer,2011-03-03 The role of the media has become a central part of politics and policy in the twenty-first century. That dominance has led many to suggest a trend of 'dumbing down': the privileging of style over content. In this provocative new book, Maarten Hajer takes issue with the 'dumbing down' thesis both on theoretical and empirical grounds. He aims to show how authoritative governance remains possible in crisis driven circumstances and a highly 'mediatized' world. The book elaborates a communicative understanding of authority, which, the author argues, can create a new basis for authoritative governance in a world marked by political and institutional fragmentation. Extending his discourse-analytical framework, Hajer uses both discursive and dramaturgical methods to study policymakers in their struggle for authority. Three detailed case studies-the plans to rebuild Ground Zero, the aftermath of the assassination of Theo Van Gogh, and the recent role of the British Food Standards Agency -provide a wealth of detail of the dynamics of authority in today's mediatized polity and bring out the peculiar role that crises now play. The argument of the book is that in the age of mediatization governance needs to be 'performed'. Hajer describes

a genuinely new authoritative governance that breaks with existing interpretations. He demonstrates ways in which the traditional government of standing institutions and notions of network governance can be combined in actively creating relations with a variety of publics.

Childbirth and Authoritative Knowledge Robbie E. Davis-Floyd,Carolyn Fishel Sargent,2023-04-28 This benchmark collection of cross-cultural essays on reproduction and childbirth extends and enriches the work of Brigitte Jordan, who helped generate and define the field of the anthropology of birth. The authors' focus on authoritative knowledge—the knowledge that counts, on the basis of which decisions are made and actions taken—highlights the vast differences between birthing systems that give authority of knowing to women and their communities and those that invest it in experts and machines. Childbirth and Authoritative Knowledge offers first-hand ethnographic research conducted by anthropologists in sixteen different societies and cultures and includes the interdisciplinary perspectives of a social psychologist, a sociologist, an epidemiologist, a staff member of the World Health Organization, and a community midwife. Exciting directions for further research as well as pressing needs for policy

guidance emerge from these illuminating explorations of authoritative knowledge about birth. This book is certain to follow Jordan's Birth in Four Cultures as the definitive volume in a rapidly expanding field.

Authoritative Communities Kathleen Kovner Kline,2007-11-25 This unique book offers insight into a new social science concept, authoritative communities. Unlike any other volume, Kline's work facilitates the continuing dialogue about the needs of children and teens and society's responsibility to nurture its greatest human capital. The report that led to the development of this volume, Hardwired to Connect, identified a need in today's children and youth and communicated a solution that society believes is valid.

Who Are the Authoritative Interpreters of Sacred Writings? Reynaldo Pareja,2019-03-09 Authentic sacred books possess a compelling interior force that seems to open a channel of communication between this dimension of human existence and

the transcendent. They have been for thousands of years the depositories of a divine wisdom and language that is not found in other type of literature. Their imperishable richness is not void of an individual and collective effort of interpretation of what those texts authentically mean. How much of the literal text is a historical account of events that happened beyond recorded time? How much of it is symbolic language that defies literal interpretation? What ethical and moral foundation do they offer as guidance for humanity's spiritual development? The ultimate question to find answers to these questions is, Who has an authoritative interpretation of those sacred texts that is truthful and accurate? This is the objective of this book—an exploration on who has such authority and how it has been manifested in past religions.

   Authority and Authoritative Texts in the Platonist Tradition Michael Erler,Jan Erik Heßler,Federico M. Petrucci,2021-03-04 All disciplines can count on a noble founder, and the representation of this founder as an authority is key in order to construe a discipline's identity. This book sheds light on how Plato and other authorities were represented in one of the most long-lasting traditions of all time. It leads the reader through exegesis and polemics, recovery of the past and construction of a philosophical

identity. From Xenocrates to Proclus, from the sceptical shift to the re-establishment of dogmatism, from the Mosaic of the Philosophers to the Neoplatonist Commentaries, the construction of authority emerges as a way of access to the core of the Platonist tradition.
