bookdown Yihui Xie,2016-12-12 bookdown: Authoring Books and Technical Documents with R Markdown presents a much easier way to write books and technical publications than traditional tools such as LaTeX and Word. The bookdown package inherits the simplicity of syntax and flexibility for data analysis from R Markdown, and extends R Markdown for technical writing, so that you can make better use of document elements such as figures, tables, equations, theorems, citations, and references. Similar to LaTeX, you can number and cross-reference these elements with bookdown. Your document can even include live examples so readers can interact with them while reading the book. The book can be rendered to multiple output formats, including LaTeX/PDF, HTML, EPUB, and Word, thus making it easy to put your documents online. The style and theme of these output formats can be customized. We used books and R primarily for examples in this book, but bookdown is not only for books or R. Most features introduced in this book also apply to other types of publications: journal papers, reports, dissertations, course handouts, study notes, and even novels. You do not have to use R, either. Other choices of computing languages include Python, C, C++, SQL, Bash, Stan, JavaScript, and so on, although R is best supported. You can also leave out computing, for example, to write a fiction. This book itself is an example of publishing with bookdown and R Markdown, and its source is fully available on GitHub.

Authoring Your Life Marcia B. Baxter Magolda,2023-07-12 Who am I? What do I want in relationships? How do I know what to believe? How do I manage the stresses of living?This is a guide to addressing life’s challenges and competing demands. It will help you to reflect on the problems and setbacks you encounter to discover your own voice, uncover your authentic sense of values, build your confidence, and find meaning in your life. This is, however, far more than a self-help book; and it addresses multiple audiences.Because everyone’s circumstances differ, and life is unpredictable, this book does not offer simplistic solutions and steps to follow. Instead, Marcia Baxter Magolda immerses you in the stories of thirty-five adults whom she has followed and interviewed for over twenty years. With her guidance, and using the self-authorship framework she has developed, you will recognize in yourself many patterns and parallels from the protagonists’ stories of emotional and intellectual growth. By reflecting on these life stories, you will gain insights about your individual values and identity, and strengthen your sense of self-reliance to handle significant transitions and unexpected circumstances. In addition to helping you identify the phases of your journey to self-authorship, Marcia Baxter Magolda offers reflective exercises and questions to help you uncover your strengths and identify the barriers that may be inhibiting you from building the internal, psychological compass that will serve as the foundation for your journey. Offering advice on how to be “good company” for those who have set out on their journey to self-authorship, the book is also addressed to partners, family members, friends, teachers, mentors, and employers, so they can offer support to those that face these challenges.Finally, for scholars of adult development, this book offers the latest articulation of the developing theory of self-authorship.

Authoring War Kate McLoughlin,2011-01-20 Kate McLoughlin's Authoring War is an ambitious and pioneering study of war writing across all literary genres from earliest times to the present day. Examining a range of cultures, she brings wide reading and close rhetorical analysis to illuminate how writers have met the challenge of representing violence, chaos and loss. War gives rise to problems of epistemology, scale, space, time, language and logic. She emphasises the importance of form to an understanding of war literature and establishes connections across periods and cultures from Homer to the 'War on Terror'. Exciting new critical groupings arise in consequence, as Byron's Don Juan is read alongside Heller's Catch-22 and English Civil War poetry alongside Second World War letters. Innovative in its approach and inventive in its encyclopedic range, Authoring War will be indispensable to any discussion of war representation.

The Authoring Problem Charlie Hargood,David E. Millard,Alex Mitchell,Ulrike Spierling,2023-01-01 Authoring, its tools, processes, and design challenges are key issues for the Interactive Digital Narrative (IDN) research community. The complexity of IDN authoring, often involving stories co-created by procedures and user interaction, creates confusion for tool developers and raises barriers for new authors. This book examines these issues from both the tool designer and the author’s perspective, discusses the poetics of IDN and how that can be used to design authoring tools, explores diverse forms of IDN and their demands, and investigates the challenges around conducting research on IDN authoring. To address these challenges, the chapter authors incorporate a range of interdisciplinary perspectives on ‘The Authoring Problem’ in IDN. While existing texts provide ‘how-to’ guidance for authors, this book is a primer for research and practice-based investigations into the authoring problem, collecting the latest thoughts about this area from key researchers and practitioners.

Authoring the Dialogic Self Gergana Vitanova,2010 This book offers a truly interdisciplinary perspective on key socio-cultural aspects of second language learning. Building on Bakhtin s philosophy of language and the self, it examines the complex intersections among gender, culture, and agency in the everyday discursive practices of immigrants. Bakhtin s dialogic framework still remains on the periphery of second language acquisition research. The book embraces not only Bakhtin s well-known notion of dialogue but also his core concepts of responsibility and ethics in the analysis of immigrants narrative samples. The significance of narratives is underscored throughout the book, and a dialogic, discourse-centered approach to narrative as a genre is suggested. Authoring the Dialogical Self targets a range of disciplines. Scholars in applied linguistics, narrative studies, cultural psychology, and communication studies will find the discussed concepts relevant. The rich data samples and detailed analysis make the book appropriate for graduate courses in TESOL, language and identity, or language and gender.

Cooperative Computer-Aided Authoring and Learning Max Mühlhäuser,2012-12-06 Cooperative Computer-Aided Authoring and Learning: A Systems Approach describes in detail a practical system for computer assisted authoring and learning. Drawing from the experiences gained during the Nestor project, jointly run between the Universities of Karlsruhe, Kaiserslautern and Freiburg and the Digital Equipment Corp. Center for Research and Advanced Development, the book presents a concrete example of new concepts in the domain of computer-aided authoring and learning. The conceptual foundation is laid by a reference architecture for an integrated environment for authoring and learning. This overall architecture represents the nucleus, shell and common denominator for the R&D activities carried out. From its conception, the reference architecture was centered around three major issues: Cooperation among and between authors and learners in an open, multimedia and distributed system as the most important attribute; Authoring/learning as the central topic; Laboratory as the term which evoked the most suitable association with the envisioned authoring/learning environment. Within this framework, the book covers four major topics which denote the most important technical domains, namely: The system kernel, based on object orientation and hypermedia; Distributed multimedia support; Cooperation support, and Reusable instructional design support. Cooperative Computer-Aided Authoring and Learning: A Systems Approach is a major contribution to the emerging field of collaborative computing and is essential reading for researchers and practitioners alike. Its pedagogic flavor also makes it suitable for use as a text for a course on the subject.

Advances in Semantic Authoring and Publishing T. Groza,IOS Press,2012-08-15 Dissemination can be seen as a communication process between scientists. Over the course of several publications, they expose and support their findings, while discussing stated claims. Such discourse structures are trapped within the content of the publications, thus making the semantics discoverable only by humans. In addition, the lack of advances in scientific publishing, where electronic publications are still used as simple projections of paper documents, combined with the current growth in the amount of scientific research being published, transforms the process of finding relevant literature into a cumbersome task. The work presented in this thesis proposes a solution that takes full advantage of the support provided by electronic publications and of the current Semantic Web technologies to expose and crystallise the different discourse structures. The goal is to pave the way towards a Semantic Publishing Ecosystem that will alleviate, at least partly, the information overload problem. Our solution relies on enriching scientific publications with explicit rhetorical and argumentation discourse structures, in addition to explicit linear structures for identification and localization, and bibliographic information. Embedding these structures within the publication documents (as semantic metadata) enables the creation of semantic publications, i.e., foundational artefacts of the Semantic Publishing Ecosystem and linked resources part of the current Web of Data.

Classroom Authoring Grd 2 Jima Dunigan,2008-04-11

Controlled Document Authoring in a Machine Translation Age Rei Miyata,2020-10-29 This book explains the concept, framework, implementation, and evaluation of controlled document authoring in this age of translation technologies. Machine translation (MT) is routinely used in many situations, by companies, governments, and individuals. Despite recent advances, MT tools are still known to be imperfect, sometimes producing critical errors. To enhance the performance of MT, researchers and language practitioners have developed controlled languages that impose restrictions on the form or length of the source-language text. However, a fundamental, persisting problem is that both current MT systems and controlled languages deal only with the sentence as the unit of processing. To be effective, controlled languages must be contextualised at the document level, consequently enabling MT to generate outputs appropriate for their functional context within the target document. With a specific focus on Japanese municipal documents, this book establishes a framework for controlled document authoring by integrating various research strands including document formalisation, controlled language, and terminology management. It then presents the development and evaluation of an authoring support system, MuTUAL, that is designed to help non-professional writers create well-organised documents that are both readable and translatable. The book provides useful insights for researchers and practitioners interested in translation technology, technical writing, and natural language processing applications. Chapter 1, the Preface, and Bibliography of this book are freely available as downloadable Open Access PDFs at <http://www.taylorfrancis.com> under a Creative Commons Attribution-Non Commercial-No Derivatives (CC-BY-NC-ND) 4.0 license.

HTML and the Art of Authoring for the World Wide Web Bebo White,2012-12-06 HTML and the Art of Authoring For the World Wide Web is devoted to teaching the Web user how to generate good hypertext. `As a result of (this) rapid uncontrolled growth, the Web community may be facing a `hypertext crisis'. Thousands of hastily written or ill conceived documents may soon be presented to readers poorly formatted or unusable... .' (From the Preface.) `The clear and practical ways in which HTML and the Art of Authoring For the World Wide Web sets forth the principles of the Web, the operation of its servers and browsers, and its publishing concept is commendable. It will be an indispensable guide to the Web author as well as the sophisticated user.' (From the Foreword by Robert Cailliau.) `Despite its user friendliness, the Web has, by its own virtue, a default that makes it difficult for people to know where to begin: there is no starting point to the Web. Bebo White's HTML and the Art of Authoring For the World Wide Web will fill this gap immediately, as it provides a clear, introductory and sequential description of the fundamental concepts that lie underneath the Web. It describes HTML as an SGML application, explains the relationship between HTML and SGML, and gives a complete description of all the structure that HTML provides.' (From the Foreword by Eric van Herwijnen.)
