Bible Culture and Authority in the Early United States Seth Perry,2018-06-05 Early Americans claimed that they looked to the Bible alone for authority, but the Bible was never, ever alone. Bible Culture and Authority in the Early United States is a wide-ranging exploration of the place of the Christian Bible in America in the decades after the Revolution. Attending to both theoretical concerns about the nature of scriptures and to the precise historical circumstances of a formative period in American history, Seth Perry argues that the Bible was not a source of authority in early America, as is often said, but rather a site of authority: a cultural space for editors, commentators, publishers, preachers, and readers to cultivate authoritative relationships. While paying careful attention to early national bibles as material objects, Perry shows that the Bible is both a text and a set of relationships sustained by a universe of cultural practices and assumptions. Moreover, he demonstrates that Bible culture underwent rapid and fundamental changes in the early nineteenth century as a result of developments in technology, politics, and religious life. At the heart of the book are typical Bible readers, otherwise unknown today, and better-known figures such as Zilpha Elaw, Joseph Smith, Denmark Vesey, and Ellen White, a group that includes men and women, enslaved and free, Baptists, Catholics, Episcopalians, Methodists, Mormons, Presbyterians, and Quakers. What they shared were practices of biblical citation in writing, speech, and the performance of their daily lives. While such citation contributed to the Bible's authority, it also meant that the meaning of the Bible constantly evolved as Americans applied it to new circumstances and identities.

Athenian Generals Debra Hamel,2018-07-17 This study of the Athenian strategoi is concerned with identifying the locus of military authority in the Athenian polis. Consideration of the role played by generals in the deliberative and final stages of military expeditions and of the relationship between strategoi and their subordinates, colleagues, and the Athenian demos itself suggests that Athens' generals did not exercise significant authority over their city's military operations. Rather, the demos controlled its generals both by means of its direct involvement in decision-making related to campaigns and by establishing in Athens a climate of fear which was very often sufficient to dissuade generals from acting in opposition to the Athenians' will. This volume is important reading for anyone who is interested in ancient military history or the question of sovereignty in Athens.

Local Authority Accounting Methods Volume 2 (RLE Accounting) Hugh Coombs,J. R. Edwards,2014-02-05 The book contains a collection of papers dealing with a range of controversial accounting issues which exercised the minds of local authority officials during the period 1909-1934 and the solutions embodied in the Accounts (Boroughs and Metropolitan Boroughs) Regulations 1930. The contributors to the debate were mainly local government officials and the items reproduced cover a wide range of matters such as the content of the abstract accounts; the need for standardization and an illuminating comparison of the nature and contents of municipal accounts with those of limited companies. A number of issues which received close attention from the literature during the early part of the present century were related to the growth of municipal trading undertakings (water, gas, tramways and electricity). The pricing of these services was a matter of considerable debate; questions included whether these services should be priced to generate a profit, break-even or receive a subsidy from the rates. The depreciation question and the related issues of loan periods and the need for a sinking fund receive some attention as do the growing concern of municipal debt.

Commonplace Culture in Western Europe in the Early Modern Period: Legitimation of authority David J. Cowling, Mette Birkedal Bruun, Joop W. Koopmans, Nils Holger Petersen, 2011 This is the third of three volumes from the project 'Authority and Persuasion: the Role of Commonplaces in Western Europe (c.1450-c.1800)'. The project was launched by the universities of Copenhagen, Durham and Groningen and involved scholars from a range of disciplines who researched the use of commonplaces as a means of persuasion in the early modern world. Commonplace as a technical term refers to the loci communes collected in late medieval and early modern commonplace books. In the project, however, the notion of commonplace was broadened to include means of persuasion in all kinds of texts as well as the visual arts, theatre, music and other media. This broader notion embraces metaphors, proverbs, figures, and expressions that enjoyed both a history of use in a given society or language community and a wide currency in that society. This third volume, subtitled 'Legitimation of Authority', focuses on the eighteenth century, an era in which many new political groups appeared, challenging and confronting existing rulers and elites, who in turn were forced to find alternative ways of legitimating their authority. Although the traditional commonplace books went out of fashion, the ten contributions in this volume demonstrate that practices of quotation as well as persuasive uses of stock material did not disappear. As in the previous two volumes, the authors represented in the present one have studied the use of generalised commonplaces in different sources and genres and in various media, such as political rituals and symbols, news sources, reference books, literature and also theatre and music. The first volume concerns 'Reformation, Counter-Reformation and Revolt, and the second volume deals with 'Consolidation of God-given Power'.

Youth and Authority Paul Griffiths, 1996 In seeking to portray a more positive image of young people in the 16th and 17th centuries, this study surveys attitudes and activities to demonstrate that youth had a creative presence, an identity, and a historical significance which was never fully explored.

Staging Authority in Caroline England Jessica Dyson, 2016-04-01 Considering plays by Philip Massinger, Richard Brome, Ben Jonson, John Ford and James Shirley, this study addresses the political import of Caroline drama as it engages with contemporary struggles over authority between royal prerogative, common law and local custom in seventeenth-century England. How are these different aspects of law and government constructed and negotiated in plays of the period? What did these stagings mean in the increasingly unstable political context of Caroline England? Beginning each chapter with a summary of the legal and political debates relevant to the forms of authority contested in the plays of that chapter, Jessica Dyson responds to these kinds of questions, arguing that drama provides a medium whereby the political and legal debates of the period may be presented to, and debated by, a wider audience than the more technical contemporary discourses of law could permit. In so doing, this book transforms our understanding of the Caroline commercial theatre's relationship with legal authority.
