*Imperfect Knowledge Economics* Roman Frydman, Michael D. Goldberg, 2007 Posing a major challenge to economic orthodoxy, *Imperfect Knowledge Economics* asserts that exact models of purposeful human behavior are beyond the reach of economic analysis. Roman Frydman and Michael Goldberg argue that the longstanding empirical failures of conventional economic models stem from their futile efforts to make exact predictions about the consequences of rational, self-interested behavior. Such predictions, based on mechanistic models of human behavior, disregard the importance of individual creativity and unforeseeable sociopolitical change. Scientific though these explanations may appear, they usually fail to predict how markets behave. And, the authors contend, recent behavioral models of the market are no less mechanistic than their conventional counterparts: they aim to generate exact predictions of irrational human behavior. Frydman and Goldberg offer a long-overdue response to the shortcomings of conventional economic models. Drawing attention to the inherent limits of economists' knowledge, they introduce a new approach to economic analysis: *Imperfect Knowledge Economics (IKE)*. IKE rejects exact quantitative predictions of individual decisions and market outcomes in favor of mathematical models that generate only qualitative predictions of economic change. Using the foreign exchange market as a testing ground for IKE, this book sheds new light on exchange-rate and risk-premium movements, which have confounded conventional models for decades. Offering a fresh way to think about markets and representing a potential turning point in economics, *Imperfect Knowledge Economics* will be essential reading for economists, policymakers, and professional investors.

*The Psychology of Investing* John R. Nofsinger, 2016-07 A supplement for undergraduate and graduate Investments courses. See the decision-making process behind investments. The *Psychology of Investing* is the first text of its kind to delve into the fascinating subject of how psychology affects investing. Its unique coverage describes how investors actually behave, the reasons and causes of that behavior, why the behavior hurts their wealth, and what they can do about it. Features: What really moves the market: Understanding the psychological aspects. Traditional finance texts focus on developing the tools that investors use for calculating risk and return. The *Psychology of Investing* is one of the first texts to delve into how psychology affects investing rather than solely focusing on traditional financial theory. This text's material, however, does not replace traditional investment textbooks but complements them, helping students become better informed investors who understand what motivates the market. Keep learning consistent: Most of the chapters are organized in a similar succession. This approach adheres to following order: -A psychological bias is described and illustrated with everyday behavior -The effect of the bias on investment decisions is explained -Academic studies are used to show why investors need to remedy the problem Growing with the subject matter: Current and fresh information. Because data on investor psychology is rapidly increasing, the fifth edition contains many new additions to keep students up-to-date. The new Chapter 12: Psychology in the Mortgage Crisis describes the psychology involved in the mortgage industry and ensuing financial crisis. New sections and sub-sections include "Buying Back Stock Previously Sold", "Who Is Overconfident," Nature or Nurture?", Preferred Risk Habitat, Market Impacts, Language, and "Reference Point Adaptation."

**Return from the Dead** David Stuart Davies,2004 Beware, the Dead are coming back! This is a unique and fascinating collection of early mummy stories that helped to establish the chilling concept of the Dead returning to life as a potent sub-genre of horror fiction.The main feature on the mummy bill, 'The Jewel of the Seven Stars' by Bram Stoker, is generally regarded as his best work after Dracula. A weird mixture of adventure, the supernatural and science fiction is found in Jane Webb's 'The Mummy', a tale written in 1827 but set in 2126. 'Some Words with a Mummy' is by the great horror writer Edgar Allen Poe. Arthur Conan Doyle's 'The Ring of Thoth' is the classic mummy tale and was the basis for the 1932 movie 'The Mummy' starring Boris Karloff and, indeed most mummy films ever since. 'Lot 249', another Doyle chiller, completes this collection, which is guaranteed to entertain and possibly prompt a nightmare.

**Intellectual Capital for Communities** Ahmed Bounfour,Leif Edvinsson,2012-06-25 In the knowledge economy, the value of corporations is directly related to their knowledge and intellectual capital. But broaden the

perspective a little wider and you begin to see the possibilities: Think of cities, regions, even entire nations, in addition to the public sector. If intangibles and intellectual capital are important to the private sector, they are also important to the productivity and competitiveness of the public sector, and so to communities and nations as a whole. In this book, Editors Ahmed Bounfour and Leif Edvinsson have brought together the best minds in intellectual capital throughout the world to focus on a new and fertile area of research: measuring and managing the intellectual capital of communities. This is a creative and cutting-edge area of research that has the potential to change how public sector planning and development is done. Once there is a clear way to identify where wealth is created in a given region/nation, this process has the potential to reveal a huge knowledge repository in the public sector with a significant—but idle—potential for collective wealth creation—the wealth of nations in waiting.
