The Philosophers Ted Honderich,2001-03-15 What better introduction to the world of philosophy than through the lives of its most prominent citizens. In The Philosophers, we are introduced to twenty-eight of the greatest thinkers in Western civilization, ranging from Aristotle and Plato to Wittgenstein, Heidegger, and Sartre. An illustrious team of scholars takes us on a concise and illuminating tour of some of the most brilliant minds and enduring ideas in history. Here is Aristotle's Nichomachean Ethics, Plato's cave of shadows, Schopenhauer's vision of reality as blind, striving Will, Hegel's idea of the World Spirit, Bentham's

principle of the Greatest Happiness, Mill's contributions to our understanding of liberty, William James's theory of the stream of consciousness, Husserl's phenomenology, and much more. Readers will find thoughtful discussions of everything from Kant's categorical imperative, to the Christian philosophies of Augustine, Aquinas, and Kierkegaard, to the materialism of Hobbes or Marx, to the modern--and quite different--philosophical systems of Bertrand Russell, Jean-Paul Sartre, and Ludwig Wittgenstein. Each article is illustrated with a portrait of the philosopher, the contributors provide lists for further reading, and the volume includes a chronological table that gives valuable historical context. Here then is an authoritative and engaging guide to the ideas of the most notable philosophers, ranging from antiquity to the present day. The Philosophers shows how these great thinkers wrestled with the central problems of the human condition--with important questions of free will, morality, and the limits of logic and reason--as it illuminates their legacy for our time.

Strengthening Forensic Science in the United States National Research Council,Division on Engineering and Physical Sciences,Committee on Applied and Theoretical Statistics,Policy and Global Affairs,Committee on Science, Technology, and Law,Committee on Identifying the Needs of the Forensic Sciences Community,2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

The Rebirthing of God John Philip Newell,2014-06-06 Dare to imagine a new birth from deep within Christianity, a fresh stirring of the Spirit. "The walls of Western Christianity are collapsing. In many parts of the West that collapse can only be described as seismic.... There are three main responses or reactions to this collapse. The first is to deny that it is happening. The second is to frantically try to shore up the foundations of the old thing. The third, which I invite us into, is to ask what is trying to be born that requires a radical reorientation of our vision. What is the new thing that is trying to emerge from deep within us and from deep within the collective soul of Christianity?" —from the Introduction In the midst of dramatic changes in Western Christianity, internationally respected spiritual leader, peacemaker and scholar John Philip Newell offers the hope of a fresh stirring of the Spirit among us. He invites us to be part of a new holy birth of sacred living. Speaking directly to the heart of Christians—those within the well-defined bounds of Christian practice and those on the disenchanted edges—as well as to the faithful and seekers of other traditions, he explores eight major features of a new birthing of Christianity: Coming back into relationship with the Earth as sacred Reconnecting with compassion as the ground of true relationship Celebrating the Light that is at the heart of all life Reverencing the wisdom of other religious traditions Rediscovering spiritual practice as the basis for transformation Living the way of nonviolence among nations Looking to the unconscious as the wellspring of new vision Following love as the seed-force of new birth in our lives and world
