Indie Cinema Online Sarah E.S. Sinwell 2020-08-14 Indie Cinema Online investigates the changing nature of contemporary American independent cinema in an era of media convergence. Focusing on the ways in which modes of production, distribution, and exhibition are shifting with the advent of online streaming,

simultaneous release strategies, and web series, this book analyzes sites such as SundanceTV, YouTube, Netflix, Hulu, and other online spaces as a means of redefining independent cinema in a digital era. Analyzing the intersections among cinema studies, cultural studies, and new media studies within contemporary convergence culture, author Sarah E.S. Sinwell looks at sites of media convergence that are often ignored within most studies of digital media. Emphasizing the ways in which the forms and technologies of media culture have changed during the age of convergence, this book analyzes contemporary production, distribution, and exhibition practices as a means of examining the changing meanings of independent cinema within digital culture.

A History of the Internet and the Digital

Future Johnny Ryan 2010-09-15 A History of the Internet and the Digital Future tells the story of the development of the Internet from the 1950s to the present and examines how the balance of power has shifted between the individual and the state in the areas of censorship, copyright infringement, intellectual freedom, and terrorism and warfare. Johnny Ryan explains how the Internet has revolutionized political campaigns; how the development of the World Wide Web enfranchised a new online population of assertive, niche consumers; and how the dot-com bust taught smarter firms to capitalize on the power of digital artisans. From the government-controlled systems of the Cold War to today's move towards cloud computing, user-driven content, and the new global commons, this book reveals the trends that are shaping the businesses, politics, and media of the digital future.

Computer Programs for Qualitative Data

Analysis Eben Weitzman 1995-02-02 Written by qualitative researchers for qualitative researchers, and not presuming extensive computer experience, this user-friendly guide takes a critical look at the wide range of software currently available. The book gives detailed reviews of 24 programs in five major categories: text retrievers, textbase managers, code-and-retrieve programs, code-based theory-builders and conceptual network-builders. In addition, the book provides

ratings of over 75 features per program. The authors also offer detailed guidance on the operation of each program, helping the reader to ask key questions about the use of the computer - the nature of the project being undertaken, what time-line analyses are planned and what worksheets are re

Focal Easy Guide to Flash MX 2004 Birgitta Hosea 2013-07-31 Confused by ActionScript? Want to get to grips with creating interactive graphics and animation in Flash quickly? Whether you are a new user or a professional illustrator, designer or animator experienced in other animation and effects packages, this highly visual, color book will be all you need to get you up and running with the latest powerful upgrade - Flash MX 2004. Birgitta Hosea uses tried and tested material based on her teaching, breaking down the software into its main components and providing lots of screenshots and simple step-by-step instructions. This encourages you to get the most out of the programme and fully develop your skills, whilst allowing those with particular needs to 'jump ahead'. The structure and style, influenced by her commercial and creative expertise, allows you either as a student or professional to dip in and out according to the needs of your specific projects, but also allows the exploration of the programmes capability when you have more time. It is a generalist, accessible, visual and a truly introductory guide, written from the perspective of a designer with a thorough coverage of the basic features of Flash MX 2004, without going too in-depth into coding with ActionScript. Birgitta Hosea is a motion graphics artist and Course Director of the London Animation Studio at Central Saint Martins College of Art and Design. Her experience ranges from designing idents and promotional materials to working as an Art Director on pop promos and short films.

Foundation Expression Blend 2 Victor Gaudio 2008-04-25 Expression Blend was Microsoft's first entry into the web application and design space; the first time they trod on Adobe Flash's toes. They got a lot of things right, and started to carve out a market, but they didn't get the crossover numbers they wanted. Blend 2 is where they put that right. It is a huge improvement over Blend. This book details everything a designer or developer needs to know to start developing web applications in Blend.

Pattern Recognition and Machine Learning Christopher M. Bishop 2016-08-23 This is the first textbook on pattern recognition to present the Bayesian viewpoint. The book presents approximate inference algorithms that permit fast approximate answers in situations where exact answers are not feasible. It uses graphical models to describe probability distributions when no other books apply graphical models to machine learning. No previous knowledge of pattern recognition or machine learning concepts is assumed. Familiarity with multivariate calculus and basic linear algebra is required, and some experience in the use of probabilities would be helpful though not essential as the book includes a self-contained introduction to basic probability theory.
