Policing and the Media Frank Leishman,Paul

Mason,2012-12-06 Policing and the Media provides an up-to-date overview of the changing dynamics and dimensions of the relationships that exist on the British police-media nexus. Factual, fictional and factional representations of policing in the media are the major - and for a great many citizens probably the sole - influence in shaping their perceptions and opinions about crime,

law and order, community safety, police efficiency and integrity, not to mention the efficacy of criminal justice and penal policy. This book deals with all three representations, noting the lines between such clear divisions are increasingly blurred and the concepts of reality, realism and representation, slippery and complex.

Philosophy, Learning and the Mathematics Curriculum Xuehui Xie, Phil Francis Carspecken, 2019-02-18 Mathematics curriculums used in progressive classrooms of the United States and in classrooms of the People's Republic of China presuppose markedly different philosophies. Xie and Carspecken reconstruct different assumptions operating implicitly within mathematics curriculums developed by the Ministry of Education in China and NCTM in the United States. Each curriculum is constructed upon a deep structure holistically integrating presuppositions about the

nature of the human self, society, learning processes, language, concepts, human development, freedom, authority and the epistemology and ontology of mathematical knowledge. Xie and Carspecken next present an extended discussion of the two main philosophical traditions informing these curriculums: dialectical materialism in the case of the Chinese mathematics curriculum, and Dewey's instrumental pragmatism in the case of NCTM. Both philosophies were developed as movements out of Hegelian idealism while retaining the anti-dualist and anti-empiricist insights of Hegel's thought. The history of dialectical materialism and Dewey's instrumentalism is carefully examined by the authors to identify both similarities and sharp differences in the resulting mature philosophies. Drawing upon more recent philosophies of intersubjectivity (Brandom, Habermas) and dialectical materialist psychologies (Vygotsky, Luria), the authors conclude this book with arguments for overcoming the limitations of a purely instrumentalist framework and for expanding potentialities implicit within dialectical philosophies. This book will be of value to a broad audience, including mathematics educators, philosophers, curriculum theorists, social theorists, and those who work in comparative education and learning science.

A Sergeant-major's War Ernest Shephard, Bruce Rossor, 1987

Sergeant-Major Ernest Shephard took part in the 2nd battle of Ypres and the Somme battle of July 1916, and was commissioned 2nd Lt. in November 1916. A first-class soldier with a strong regimental pride, to read Shephard's diaries is to gain an insight into how the British Army managed to sustain its morale throughout the horror of the Western Front. He provides a fascinating account of the daily routines of trench warfare, as well as chillingly evocative descriptions of set-piece battles from one who was very much at the sharp end of the Great War--Page 4 of cover

Improving the Quality of Health Care for Mental and Substance-Use Conditions Institute of Medicine,Board on Health Care Services,Committee on Crossing the Quality Chasm: Adaptation to Mental Health and Addictive Disorders,2006-03-29

Each year, more than 33 million Americans receive health care for mental or substance-use conditions, or both. Together, mental and substance-use illnesses are the leading cause of death and disability for women, the highest for men ages 15-44, and the second highest for all men. Effective treatments exist, but services are frequently fragmented and, as with general health care, there are barriers that prevent many from receiving these treatments as designed or at all. The consequences of this are seriousâfor these individuals and their families; their employers and the workforce; for the nation's economy; as well as the education, welfare, and justice systems. Improving the Quality of Health Care for Mental and Substance-Use Conditions examines the distinctive characteristics of health care for mental and substance-use

conditions, including payment, benefit coverage, and regulatory issues, as well as health care organization and delivery issues. This new volume in the Quality Chasm series puts forth an agenda for improving the quality of this care based on this analysis. Patients and their families, primary health care providers, specialty mental health and substance-use treatment providers, health care organizations, health plans, purchasers of group health care, and all involved in health care for mental and substance use conditions will benefit from this guide to achieving better care.

Can War Be Justified? Andrew Fiala, Jennifer Kling, 2023-02-21

Can war be justified? Pacifists answer that it cannot; they oppose war and advocate for nonviolent alternatives to war. But defenders of just war theory argue that in some circumstances, when the effectiveness of nonviolence is limited, wars can be justified. In this book, two philosophers debate this question, drawing on contemporary scholarship and new developments in thinking about pacifism and just war theory. Andrew Fiala defends the pacifist position, while Jennifer Kling defends just war traditions. Fiala argues that pacifism follows from the awful reality of war and the nonviolent goal of building a more just and peaceful world. Kling argues that war is sometimes justified when it is a last-ditch,

necessary effort to defend people and their communities from utter destruction and death. Pulling from global traditions and histories, their debate will captivate anyone who has wondered or worried about the morality of political violence and military force. Topics discussed include ethical questions of self-defense and other-defense, the great analogy between individuals and states, evolving technologies and methods of warfighting, moral injury and post-traumatic stress disorder, broader political and communal issues, and the problem of regional security in a globalizing world. The authors consider cultural and religious issues as well as the fundamental question of moral obligation in a world saturated in military conflict. The book was written in the aftermath of the war on terrorism and includes reflection on lessons learned from the past decades of war, as well as hopes for the future in light of emerging threats in Europe and elsewhere. The book is organized in a user-friendly fashion. Each author presents a self-contained argument, which is followed by a series of responses, replies, and counter-arguments. Throughout, the authors model civil discourse by emphasizing points of agreement and remaining areas of disagreement. The book includes reader-friendly summaries, a glossary of key concepts, and suggestions for further study. All of

this will help students and scholars follow the authors' dialogue so they may develop their own answer to the question of whether war can be justified. Key Features Summarizes the debate between pacifism and just war theory Considers historical and traditional sources as well as contemporary scholarship and applications Models philosophical dialogue and civil discourse, while seeking common ground Discusses issues of concern in contemporary warfighting and peacemaking, while offering an analysis of the war on terrorism

The Selected Works of Ora Eddleman Reed Ora Eddleman Reed,

On Dangerous Ground Gregory B. Poling, 2022-07-01 A robust yet accessible history of US involvement in the world's most dangerous waterway, and a guide for what to do about it.

Lamentations that the United States is losing the South China Sea to China are now common. China has rapidly militarized islands and reefs, projects power across the disputed waterway, and freely harasses US allies and partners. The US has been unable to halt these processes or convince Beijing to respect the rights of smaller neighbors. But what exactly would losing mean? In *On Dangerous Ground*, Gregory B. Poling evaluates US interests in the world's

most complex and dangerous maritime disputes by examining more than a century of American involvement in the South China Sea. He focuses on how the disputes there intersected and eventually intertwined with the longstanding US commitment to freedom of the seas and its evolving alliance network in Asia. He shows that these abiding national interests--defense of maritime rights and commitment to allies, particularly the Philippines--have repeatedly pulled US attention to the South China Sea.

Understanding how and why is critical if the US and its allies hope to chart a course through the increasingly fraught disputes, while facing a more assertive, more capable, and far less compromising China. With an emphasis on decisions made not just in Washington and Beijing, but also in Manila and other Southeast Asian capitals, *On Dangerous Ground* seeks to correct the record and balance the China-centric narrative that has come to dominate the issue. It not only provides the most comprehensive account yet of America's history in the South China Sea, but it also demonstrates how that history should inform US national security policy in one of the most important waterways in the world.
