**Researching Violence Against Women** Mary Ellsberg, Lori Heise, 2005 Draws on the collective experiences and insights of many individuals, and in particular from the implementation of the WHO Multi-country Study on Women's Health and Domestic Violence against Women in over 10 countries. Twenty years ago, violence against women was not considered an issue worthy of international concern. Gradually, violence against women has come to be recognized as a legitimate human rights issue and as a significant threat to women's health and well-being. Now that international attention is focused on gender-based violence, methodologically rigorous research is needed to guide the formulation and implementation of effective interventions, policies, and prevention strategies. The manual has been developed in response to the growing need to improve the quality, quantity, and comparability of international data on physical and sexual abuse. It outlines some of the methodological and ethical challenges of conducting research on violence against women and describes a range of innovative techniques that have been used to address these challenges.

**Multiple Regression and Beyond** Timothy Z. Keith, 2019-01-14 Companion Website materials: <https://tzkeith.com/> Multiple Regression and Beyond offers a conceptually-oriented introduction to multiple regression (MR) analysis and structural equation modeling (SEM), along with analyses that flow naturally from those methods. By focusing on the concepts and purposes of MR and related methods, rather than the derivation and calculation of formulae, this book introduces material to students more clearly, and in a less threatening way. In addition to illuminating content necessary for coursework, the accessibility of this approach means students are more likely to be able to conduct research using MR or SEM--and more likely to use the methods wisely. This book: • Covers both MR and SEM, while explaining their relevance to one another • Includes path analysis, confirmatory factor analysis, and latent growth modeling • Makes extensive use of real-world research examples in the chapters and in the end-of-chapter exercises • Extensive use of figures and tables providing examples and illustrating key concepts and techniques New to this edition: • New chapter on mediation, moderation, and common cause • New chapter on the analysis of interactions with latent variables and multilevel SEM • Expanded coverage of advanced SEM techniques in chapters 18 through 22 • International case studies and examples • Updated instructor and student online resources

**Roma in an Expanding Europe** Dena Ringold, Mitchell Alexander Orenstein, Erika Wilkens, 2005 Following the enlargement of the European Union in May 2004, Roma (or gypsies) are now the largest minority group in Europe. They are also one of the poorest and most vulnerable groups, living mainly in Central and Eastern Europe, suffering poverty levels as high as ten times that found within majority populations. The lack of information about the living conditions and needs of Roma people compound these stark gaps in human development outcomes. This publication, prepared for a conference held in Budapest, Hungary in June 2003, brings together original sociological research, evaluations of programme initiatives, and the first comparative cross-country household survey on ethnicity and poverty. It finds that Roma poverty is multi-faceted and can only be addressed by a inclusive policy approach which respects their diversity.

**Children's needs - parenting capacity** Hedy Cleaver, Ira Unell, Great Britain Department for Education, 2011-10-12 This second edition of Children's needs - parenting capacity updates the original exploration of the research literature in the light of legal and policy changes in England and findings from more recent national and international research. The edition has also been expanded to cover parental learning disabilities and how it may impact on parenting and children's health and development. The findings show that these parenting issues affect children differently depending on their age and individual circumstances. While some children grow up apparently unscathed, others exhibit emotional and behavioural disorders. This knowledge can inform practitioners undertaking assessments of the needs of children and their families and effective service responses. This publication is essential reading for practitioners, managers and policy makers concerned with improving the outcomes for children and families who are experiencing such problems.

**Tracking Environmental Change Using Lake Sediments** John P. Smol, H.J. Birks, William M. Last, 2004-12-30 Paleolimnology is a rapidly developing science that is now being used to study a suite of environmental and ecological problems. This volume is the fourth handbook in the Developments in Paleoenvironmental Research book series. The first volume (Last & Smol, 2001a) examined the acquisition and archiving of sediment cores, chronological techniques, and large-scale basin analysis methods. Volume 2 (Last & Smol, 2001b) focused on physical and chemical methods. Volume 3 (Smol et al. , 2001), along with this book, summarize the many biological methods and techniques that are available to study long-term environmental change using information preserved in sedimentary profiles. A subsequent volume (Birks et al. , in preparation) will deal with statistical and data handling procedures. It is our intent that these books will provide sufficient detail and breadth to be useful handbooks for both seasoned practitioners as well as newcomers to the area of paleolimnology. These books will also hopefully be useful to non-paleolimnologists (e. g. , limnologists, archeologists, palynologists, geographers, geologists, etc. ) who continue to hear and read about pal- limnology, but have little chance to explore the vast and sometimes difficult to access journal-based reference material for this rapidly expanding field. Although the chapters in these volumes target mainly lacustrine settings, many of the techniques described can also be readily applied to fluvial, glacial, marine, estuarine, and peatland environments. This current volume focuses on zoological indicators preserved in lake sediments, whilst Volume 3 focused on terrestrial, algal, and siliceous indicators.

**Clinical Gynecology** Eric J. Bieber, Joseph S. Sanfilippo, Ira R. Horowitz, Mahmood I. Shafi, 2015-04-23 Written with the busy practice in mind, this book delivers clinically focused, evidence-based gynecology guidance in a quick-reference format. It explores

etiology, screening, tests, diagnosis, and treatment for a full range of gynecologic health issues. The coverage includes the full range of gynecologic malignancies, reproductive endocrinology and infertility, infectious diseases, urogynecologic problems, gynecologic concerns in children and adolescents, and surgical interventions including minimally invasive surgical procedures. Information is easy to find and absorb owing to the extensive use of full-color diagrams, algorithms, and illustrations. The new edition has been expanded to include aspects of gynecology important in international and resource-poor settings.

Future U.S. Workforce for Geospatial Intelligence National Research Council,Policy and Global Affairs,Board on Higher Education and Workforce,Division on Earth and Life Studies,Board on Earth Sciences and Resources,Committee on the Future U.S. Workforce for Geospatial Intelligence,2013-04-28 We live in a changing world with multiple and evolving threats to national security, including terrorism, asymmetrical warfare (conflicts between agents with different military powers or tactics), and social unrest. Visually depicting and assessing these threats using imagery and other geographically-referenced information is the mission of the National Geospatial-Intelligence Agency (NGA). As the nature of the threat evolves, so do the tools, knowledge, and skills needed to respond. The challenge for NGA is to maintain a workforce that can deal with evolving threats to national security, ongoing scientific and technological advances, and changing skills and expectations of workers. Future U.S. Workforce for Geospatial Intelligence assesses the supply of expertise in 10 geospatial intelligence (GEOINT) fields, including 5 traditional areas (geodesy and geophysics, photogrammetry, remote sensing, cartographic science, and geographic information systems and geospatial analysis) and 5 emerging areas that could improve geospatial intelligence (GEOINT fusion, crowdsourcing, human geography, visual analytics, and forecasting). The report also identifies gaps in expertise relative to NGA's needs and suggests ways to ensure an adequate supply of geospatial intelligence expertise over the next 20 years.

**Urban Inequality and Segregation in Europe and China** Gwilym Pryce,Ya Ping Wang,Yu Chen,Jingjing Shan,Houkai Wei,2021-11-16 This open access book explores new research directions in social inequality and urban segregation. With the goal of fostering an ongoing dialogue between scholars in Europe and China, it brings together an impressive team of international researchers to shed light on the entwined processes of inequality and segregation, and the implications for urban development. Through a rich collection of empirical studies at the city, regional and national levels, the book explores the impact of migration on cities, the related problems of social and spatial segregation, and the ramifications for policy reform. While the literature on both segregation and inequality has traditionally been dominated by European and North American studies, there is growing interest in these issues in the Chinese context. Economic liberalization, rapid industrial restructuring, the enormous growth of cities, and internal migration, have all reshaped the country profoundly. What have we learned from the European and North American experience of segregation and inequality, and what insights can be gleaned to inform the burgeoning interest in these issues in the Chinese context? How is China different, both in terms of the nature and the consequences of segregation inequality, and what are the implications for future research and policy? Given the continued rise of China’s significance in the world, and its recent declaration of war on poverty, this book offers a timely contribution to scholarship, identifying the core insights to be learned from existing research, and providing important guidance on future directions for policy makers and researchers.

*Prison Conditions in South Africa* Human Rights Watch (Organization),1994 While visiting over twenty prisons as well as lockups in at least five different cities throughout South Africa, we found significant improvements had been made since the political climate began to change in 1990. Nevertheless, South Africa's prisoner-to-population ratio is among the highest in the world, and many aspects of prison life remain depressingly unchanged from the years of official apartheid. South African prisons are places of extreme violence, where assaults on prisoners by guards or fellow inmates are common and often fatal.

**Handbook for Developing Watershed Plans to Restore and Protect Our Waters** ,2005  
Engineering Web Applications Sven Casteleyn,Florian Daniel,Peter Dolog,Maristella Matera,2009-07-25 Nowadays, Web applications are almost omnipresent. The Web has become a platform not only for information delivery, but also for eCommerce systems, social networks, mobile services, and distributed learning environments. Engineering Web applications involves many intrinsic challenges due to their distributed nature, content orientation, and the requirement to make them available to a wide spectrum of users who are unknown in advance. The authors discuss these challenges in the context of well-established engineering processes, covering the whole product lifecycle from requirements engineering through design and implementation to deployment and maintenance. They stress the importance of models in Web application development, and they compare well-known Web-specific development processes like WebML, WSDM and OOHDM to traditional software development approaches like the waterfall model and the spiral model. .
