Terrorism Informatics Hsinchun Chen,Edna Reid,Joshua Sinai,Andrew Silke,Boaz Ganor,2008-06-17 This book is nothing less than a complete and comprehensive survey of the state-of-the-art of terrorism informatics. It covers the application of advanced methodologies and information fusion and analysis. It also lays out techniques to acquire, integrate, process, analyze, and manage the diversity of terrorism-related information for international and homeland security-related applications. The book details three major areas of terrorism research: prevention, detection, and established governmental responses to terrorism. It systematically examines the current and ongoing research, including recent case studies and application of terrorism informatics techniques. The coverage then presents the critical and relevant social/technical areas to terrorism research including social, privacy, data confidentiality, and legal challenges.

Burning Books and Leveling Libraries Rebecca Knuth,2006-05-30 In her previous book *Libricide*, Knuth focused on book destruction by authoritarian regimes: Nazis, Serbs in Bosnia, Iraqis in Kuwait, Maoists during the Cultural Revolution in China, and the Chinese Communists in Tibet. But authoritarian governments are not the only perpetrators. Extremists of all stripes--through terrorism, war, ethnic cleansing, genocide, and other forms of mass violence--are also responsible for widespread cultural destruction, as she demonstrates in this new book. Whether the product of passion or of a cool-headed decision to use ideas to rationalize excess, the decimation of the world's libraries has occurred throughout the 20th century, and there is no end in sight. Cultural destruction is, therefore, of increasing concern to the library community, educators, human rights and civil rights activists, and caring citizens.

Computer Security - ESORICS 94 Dieter Gollmann,1994-10-19 This volume constitutes the proceedings of the Third European Symposium on Research in Computer Security, held in Brighton, UK in November 1994. The 26 papers presented in the book in revised versions were carefully selected from a total of 79 submissions; they cover many current aspects of computer security research and advanced applications. The papers are grouped in sections on high security assurance software, key management, authentication, digital payment, distributed systems, access control, databases, and measures.

Cybersecurity in France Philippe Baumard,2017-05-02 This Brief presents the overarching framework in which each nation is developing its own cyber-security policy, and the unique position adopted by France. Modern informational crises have penetrated most societal arenas, from healthcare, politics, economics to the conduct of business and welfare. Witnessing a convergence between information warfare and the use of "fake news", info-destabilization, cognitive warfare and cyberwar, this book brings a unique perspective on modern cyberwarfare campaigns, escalation and de-escalation of cyber-conflicts. As organizations are more and more dependent on information for the continuity and stability of their operations, they also become more vulnerable to cyber-destabilization, either genuine, or deliberate for the purpose of gaining geopolitical advantage, waging wars, conducting intellectual theft and a wide range of crimes. Subsequently, the regulation of cyberspace has grown into an international effort where public, private and sovereign interests often collide. By analyzing the particular case of France national strategy and capabilities, the authors investigate the difficulty of obtaining a global agreement on the regulation of cyber-warfare. A review of the motives for disagreement between parties suggests that the current regulation framework is not adapted to the current technological change in the cybersecurity domain. This book suggests a paradigm shift in handling and anchoring cyber-regulation into a new realm of behavioral and cognitive sciences, and their application to machine learning and cyber-defense.

Information Security and Assurance Samir Kumar Bandyopadhyay,Wael Adi,Tai-hoon Kim,Yang Xiao,2010-06-09 Advanced Science and Technology, Advanced Communication and Networking, Information Security and Assurance, Ubiquitous Computing and Multimedia Applications are conferences that attract many academic and industry professionals. The goal of these co-located conferences is to bring together researchers from academia and industry as well as practitioners to share ideas, problems and solutions relating to the multifaceted aspects of advanced science and technology, advanced communication and networking, information security and assurance, ubiquitous computing and multimedia applications. This co-located event included the following conferences: AST 2010 (The second International Conference on Advanced Science and Technology), ACN 2010 (The second International Conference on Advanced

Communication and Networking), ISA 2010 (The 4th International Conference on Information Security and Assurance) and UCMA 2010 (The 2010 International Conference on Ubiquitous Computing and Multimedia Applications). We would like to express our gratitude to all of the authors of submitted papers and to all attendees, for their contributions and participation. We believe in the need for continuing this undertaking in the future. We acknowledge the great effort of all the Chairs and the members of advisory boards and Program Committees of the above-listed events, who selected 15% of over 1,000 submissions, following a rigorous peer-review process. Special thanks go to SERSC (Science & Engineering Research Support soCietY) for supporting these - located conferences.

Modern Political Warfare Linda Robinson, Todd C. Helmus, Raphael S. Cohen, 2018 The United States today faces a number of actors who employ a wide range of political, informational, military, and economic measures to influence, coerce, intimidate, or undermine U.S. interests or those of friends and allies; many of these measures are often collectively referred to as political warfare. This report analyzes political warfare as it is practiced today by both state and nonstate actors, and provides detailed recommendations regarding the most effective ways that the U.S. government, along with its allies and partners, can respond to or engage in this type of conflict to achieve U.S. ends and protect U.S. interests. The authors examine historical antecedents of political warfare and current-day practices through in-depth case studies of Russia, Iran, and the Islamic State. They use these cases to derive common attributes of modern political warfare. The authors then identify effective means for responding to these challenges. Drawing on documentary and field research as well as extensive semistructured interviews with practitioners in the U.S. government and elsewhere, they determine gaps in practices and capabilities for addressing political warfare threats. The report concludes with recommendations for countering political warfare by creating a more effective, coordinated, and cost-sensitive approach to effective statecraft, including specific measures for the U.S. State Department and the U.S. military, particularly the special operations community.-- Publisher's description.

A History of Palestine Gudrun Krämer, 2011-02-22 Krämer focuses on patterns of interaction amongst Jews and Arabs (Muslim as well as Christian) in Palestine, an interaction that deeply affected the economic, political, social, and cultural evolution of both communities under Ottoman and British rule.

Nondestructive Testing of Materials and Structures Oral Büyüköztürk, Mehmet Ali Taşdemir, 2012-09-14 Condition assessment and characterization of materials and structures by means of nondestructive testing (NDT) methods is a priority need around the world to meet the challenges associated with the durability, maintenance, rehabilitation, retrofitting, renewal and health monitoring of new and existing infrastructures including historic monuments. Numerous NDT methods that make use of certain components of the electromagnetic and acoustic spectrum are currently in use to this effect with various levels of success and there is an intensive worldwide research effort aimed at improving the existing methods and developing new ones. The knowledge and information compiled in this book captures the current state of the art in NDT methods and their application to civil and other engineering materials and structures. Critical reviews and advanced interdisciplinary discussions by world-renowned researchers point to the capabilities and limitations of the currently used NDT methods and shed light on current and future research directions to overcome the challenges in their development and practical use. In this respect, the contents of this book will equally benefit practicing engineers and researchers who take part in characterization, assessment and health monitoring of materials and structures.

Global Corruption Gerry Ferguson, 2017 This book has been specifically created to make it easier for professors to offer a law school course on global corruption. It is issued under a creative commons license and can be used for free in whole or in part for non-commercial purposes. The first chapter sets out the general context of global corruption: its nature and extent, and some views on its historical, social, economic and political dimensions. Each subsequent chapter sets out international standards and requirements in respect to combating corruption - mainly in the UN Convention Against Corruption (UNCAC) and the OECD Bribery of Foreign Officials Convention (OECD Convention). The laws of the United States and United Kingdom are then set out as examples of how those Convention standards and requirements are met in two influential jurisdictions. Finally, the law of Canada is set out. Thus, a professor from Africa, Australia, New Zealand or English speaking countries in Asia and Europe has a nearly complete coursebook - for example, that professor can delete the Canadian sections of this book and insert the law and practices of his or her home country in their place. While primarily directed to a law school course on global corruption, this book will be of interest and use to professors teaching courses on corruption from other academic disciplines and to lawyers and other anti-corruption practitioners.

Tumor Profiling Sarah S. Murray, 2019-02-04 This book provides a practical guide to current methods for profiling and interpreting genomic alterations in tumors. Chapters detail methods to interrogate DNA variation, RNA expression, and epigenetic changes using both next-generation sequencing and microarray techniques, common bioinformatics and annotation tools to glean relevant driver genomic events, and different performance characteristics as well as quality metrics necessary for the robust validation of tumor profiling as a diagnostic test for medical laboratories. Written in the highly successful *Methods in Molecular Biology* series format, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily reproducible laboratory protocols, and tips on troubleshooting and avoiding known pitfalls. Authoritative and cutting-edge, *Tumor Profiling: Methods and Protocols* aims to be a useful resource for learning about technical details, applications, and strengths and limitations of the latest technologies as applied to this increasingly important field.

Recent Developments in Machine Learning and Data Analytics Jugal Kalita, Valentina Emilia Balas, Samarjeet Borah, Ratika Pradhan, 2018-09-12 This book presents high-quality papers from an international forum for research on computational approaches to learning. It includes current research and findings from various research labs, universities and institutions that may lead to development of marketable products. It also provides solid support

for these findings in the form of empirical studies, theoretical analysis, or comparison to psychological phenomena. Further, it features work that shows how to apply learning methods to solve important application problems as well as how machine learning research is conducted. The book is divided into two main parts: Machine Learning Techniques, which covers machine learning-related research and findings; and, Data Analytics, which introduces recent developments in this domain. Additionally, the book includes work on data analytics using machine learning techniques.
