Streamlining Space Launch Range Safety National Research Council,Commission on Engineering and Technical Systems,Aeronautics and Space Engineering Board,Committee on Space Launch Range Safety,2000-04-15 The U.S. space program is rapidly changing from an activity driven by federal government launches to one driven by commercial launches. In 1997, for the first time commercial launches outnumbered government launches at the Eastern Range (ER), located at Cape Canaveral Air Station, Florida. Commercial activity is also increasing at the Western Range (WR), located at Vandenberg Air Force Base, California. The government itself is emulating commercial customers, shifting from direct management of launch programs to the purchase of space launch services from U.S. commercial launch companies in an open, competitive market. The fundamental goal of the U.S. space program is to ensure safe, reliable, and affordable access to space. Despite the inherent danger of space launches, the U.S. space program has demonstrated its ability to protect the public. No launch site worker or member of the general public has been killed or seriously injured in any of the 4,600 launches conducted at the ER and WR during the entire 50-year history of the space age. Streamlining Space Launch Range Safety discusses whether range safety processes can be made more efficient and less costly without compromising public safety. This report presents six primary recommendations, which address risk management, Africa gates, roles and responsibilities, range safety documentation [EWR 127-1]), global positioning system (GPS) receiver tracking systems, and risk standards for aircraft and ships.

The Fate of the Sleeping Beauties Kay Hottendorff,Ard op de Weegh,2010-10-15 Say Sleeping Beauties to committed car enthusiasts and they will immediately know what you're talking about: a world famous 1980s photo series, showing an extraordinary collection of classical automobiles rusting away in a French barn, neglected by their owner. Famous brands like Bugatti, Lancia,

Ferrari, Alfa Romeo, Cord and Aston Martin, laying under thick layers of dust, spending their remaining days falling apart in isolation. Many have tried to find out what happened to these cars over the last twenty-five years - decayed? destroyed? sold? - but all leads fizzled out ... until two Dutchmen and a German hung on where others had given up. In true Boy's Own style, their book tells of the three-year-long search for the fate of the cars from that French barn. It tells the story behind the collection's origins in 1948, through the moment in 1983 when the famous photos were published, up to the day in 2007 when the authors talked to the current 79 year old owner - a man who finally broke his silence about the fate of his collection for the first time in 25 years.--Publisher description.

War Photographs Taken on the Battlefields of the Civil War Mathew B. Brady,Alexander Gardner,2013-06-01 Fought over the course of four years, the Civil War pitted countrymen against countrymen, North versus South, friend against friend, and brother against brother. The photographs within these pages document the war that united America as one. These rare shots were taken in the middle of the battlefield during the earliest days of photography. Selected from a collection of seven thousand original negatives, these historic photos capture nearly every aspect of Civil War life. Among these photos are images of camps sprawling across acres, soldiers at their battlements, firing of heavy artillery, the aftermath of battle, and the terror that these young men faced. See first-hand of Union and Confederate officers strategizing their next moves, and Abraham Lincoln addressing his Union commanders. Originally released from the private collection of Edward Bailey Eaton in 1907, this edition is a must have for any Civil War buff or historian. No collection can be considered complete without these photographs by Matthew Brady and Alexander Gardner, as well as the meticulous passages that put the images in illuminating context.

The textbook examines a wide range of micro and macro topics, including prices and markets, equity versus efficiency, Rawls versus Bentham, accounting and the theory of the firm, optimal lot size and just in time, monopoly and competition, exchange rates and the balance of payments, inflation and unemployment, fiscal and monetary policy, IS-LM analysis, aggregate demand and

supply, speculation and rational expectations, growth and development, exhaustible resources and over-fishing. While the content is similar to that of conventional introductory economics textbook, the assumption that the reader knows and enjoys the calculus distinguishes this book from the traditional text.

International marketing and trade of quality food products Alessandra Castellini, Erika Pignatti, Roberta Spadoni, Maurizio Canavari, Nicola Cantore, 2023-09-04 Due to increased purchasing power of certain consumer segments all over the world and the related growing demand for food specialties for differentiated goods in the international markets, agri-food trade and marketing is no longer focused on commodities only. Key concepts of 'Marketing', 'International Trade' and 'Quality' are taking the forefront in the scientific debate among agricultural economists dealing with agricultural and food products markets. The need for scientific knowledge about several aspects of marketing for quality food products is growing. The aim of this book is to link these key concepts together and consider connections, overlaps, contradictions and complementarities between them. This book contains peer-reviewed articles covering a range of studies on international marketing and trade for quality food products and is edited with the support of the BEAN-QUORUM project, funded by the European Union's Asia Link Programme. The topics covered by the studies range from geographical indications to organic food; from fair trade to functional food; from knowledge about quality requirements to the impact of the quest for quality. The geographical scope of the studies is broad and the perspectives vary including the consumer, the producer and the supply chain side. The focal interest of the studies also range from competitiveness, to policy, to potential demand. The book is of interest to researchers and practitioners in international food networks of all types.

Decentralised Energy Christoph Burger, Antony Froggatt, Catherine Mitchell, Jens Weinmann, 2020-01-14 The energy system is undergoing a fundamental transformation – from fossil to renewable energy, from central power plants to distributed, decentralised generation facilities such as rooftop solar panels or wind parks, from utilities to private residents as producers of energy, and from analogue to digital. This book looks at the energy transformation from two complementary angles: governance and business model innovation. On the one side, governance is a decisive factor for the success of the transformation because it can act as an accelerator, or it can delay the process. On the other side, entrepreneurs and corporate decision-makers provide new business models for a decentralised energy world. Based on best practices, country studies and interviews with CEOs and founders of startups from all over the world, the “Global Game Changer” suggests eight key principles for political decision-makers to successfully implement the transformation, and six core competencies for corporate decision-makers to thrive in the new marketplace.

Modern Infectious Disease Epidemiology Alexander Krämer, Mirjam Kretzschmar, Klaus Krickeberg, 2010-01-23 Hardly a day goes by without news headlines concerning infectious disease threats. Currently the spectre of a pandemic of influenza A|H1N1 is raising its head, and heated debates are taking place about the pro's and con's of vaccinating young girls against human papilloma virus. For an evidence-based and responsible communication of infectious disease topics to avoid misunderstandings and overreaction of the public, we need solid scientific knowledge and an understanding of all aspects of infectious diseases and their control. The aim of our book is to present the reader with the general picture and the main ideas of the subject. The book introduces the reader to methodological aspects of epidemiology that are specific for infectious diseases and provides insight into the epidemiology of some classes of infectious diseases characterized by their main modes of transmission. This choice of topics bridges the gap between scientific research on the clinical, biological, mathematical, social and economic aspects of infectious diseases and their applications in public health. The book will help the reader to understand the impact of infectious diseases on modern society and the instruments that policy makers have at their disposal to deal with these challenges. It is written for students of the health sciences, both of curative medicine and public health, and for experts that are active in these and related domains, and it may be of interest for the educated layman since the technical level is kept relatively low.

Seismic Design of RC Buildings Sharad Manohar, Suhasini Madhekar, 2015-09-09 This book is intended to serve as a textbook for engineering courses on earthquake resistant design. The book covers important attributes for seismic design such as material properties, damping, ductility, stiffness and strength. The subject coverage commences with simple concepts and proceeds right up to

nonlinear analysis and push-over method for checking building adequacy. The book also provides an insight into the design of base isolators highlighting their merits and demerits. Apart from the theoretical approach to design of multi-storey buildings, the book highlights the care required in practical design and construction of various building components. It covers modal analysis in depth including the important missing mass method of analysis and tension shift in shear walls and beams. These have important bearing on reinforcement detailing. Detailed design and construction features are covered for earthquake resistant design of reinforced concrete as well as confined and reinforced masonry structures. The book also provides the methodology for assessment of seismic forces on basement walls and pile foundations. It provides a practical approach to design and detailing of soft storeys, short columns, vulnerable staircases and many other components. The book bridges the gap between design and construction. Plenty of worked illustrative examples are provided to aid learning. This book will be of value to upper undergraduate and graduate students taking courses on seismic design of structures.
