E-Retailing Eleonora Pantano, Bang Nguyen, Charles Dennis, Sabine Gerlach, Bill Merrilees, 2004-08-26 Most experts agree that the advent of internet retailing has transformed the marketplace, but until now students of the subject have had to search far and wide for comprehensive up-to-date analyses of the new business landscape. Coverage of the recent dot-com boom and bust obscured the fact that e-retailing is now firmly established in global business, promising growth rates that will continue to rise globally. This much-needed book provides readers with a guide to the implementation and operation of a successful e-retailing business, and has been written for students, entrepreneurs and researchers at all levels. By identifying and explaining the underlying principles of e-retailing and its relationship with conventional retail methods, this research-based book leads readers through this exciting and emerging subject. Throughout, case studies are explored, including: Ipod Nike Amazon e-Bay McDonald's Nokia. With accessibly written features such as key learning points, questions, think points and further reading, e-Retailing is core reading for anyone using, studying or researching the internet or e-retailing.

Filming the Gods Rachel Dwyer, 2006-09-27 Filming the Gods examines the role and depiction of religion in Indian cinema, showing that the relationship between the modern and the traditional in contemporary India is not exotic, but part of everyday life. Concentrating mainly on the Hindi cinema of Mumbai, Bollywood, it also discusses India's other cinemas. Rachel Dwyer's lively discussion encompasses the mythological genre which continues India's long tradition of retelling Hindu myths and legends, drawing on sources such as the national epics of the Mahabharata and the Ramayana; the devotional genre, which flourished at the height of the nationalist movement in the 1930s and 40s; and the films made in Bombay that depict India's Islamicate culture, including the historical, the courtesan film and the 'Muslim social' genre. Filming the Gods also examines the presence of the religious across other genres and how cinema represents religious communities and their beliefs and practices. It draws on interviews with film stars, directors and producers as well as popular fiction, fan magazines and the films themselves. As a result, Filming the Gods is a both a guide to the study of film in religious culture as well as a historical overview of Indian religious film.

The Many Deaths of Tsar Nicholas II Wendy Slater, 2007-06-26 How did Nicholas II, Russia's last Tsar, meet his death? Shot point blank in a bungled execution by radical Bolsheviks in the Urals, Nicholas and his family disappeared from history in the Soviet era. But in the 1970s, a local geologist and a crime fiction writer discovered the location of their clandestine mass grave, and secretly removed three skulls, before reburying them, afraid of the consequences of their find. Yet the history of Nicholas' execution and the discovery of his remains are not the only stories connected with the death of the last Tsar. This book recounts the horrific details of his death and the thrilling discovery of the bones, and also investigates the alternative narratives that have grown up around these events. Stories include the contention that the Tsar's killing was a Jewish plot, in which Nicholas' severed head was taken to Moscow as proof of his death; tales of would-be survivors of the execution, self-confessed children of the Tsar claiming their true identity; and accounts of miracles performed by Nicholas, who was made a saint by the Russian church in 2000. Not least among these alternative narratives is the romanticization of the Romanovs, epitomized by the numerous photographs of the family released from the Russian archives.

Guide to the Software Engineering Body of Knowledge (Swebok(r)) IEEE Computer Society, 2014 In the Guide to the Software Engineering Body of Knowledge (SWEBOK(R) Guide), the IEEE Computer Society establishes a baseline for the body of knowledge for the field of software engineering, and the work supports the Society's responsibility to promote the advancement of both theory and practice in this field. It should be noted that the Guide does not purport to define the body of knowledge but rather to serve as a compendium and guide to the knowledge that has been developing and evolving over the past four decades. Now in Version 3.0, the

Guide's 15 knowledge areas summarize generally accepted topics and list references for detailed information. The editors for Version 3.0 of the SWEBOK(R) Guide are Pierre Bourque (Ecole de technologie superieure (ETS), Universite du Quebec) and Richard E. (Dick) Fairley (Software and Systems Engineering Associates (S2EA)).

The Rise of China and International Security Kevin J. Cooney, Yoichiro Sato, 2008-08-29 This edited volume offers diverse and comprehensive views of China's rise and its implications to the East Asian region and beyond. The economic growth of China, initially started in the late-1970s with domestic and rural reforms, has been increasingly driven by China's industrialization and integration into the regional and global markets. The growth and integration of China, however, has exposed China's closest neighbours and even more remote countries to its various (previously internal) problems, and the lagging political openness of China has often negatively impacted on cooperation with other countries in dealing with these problems (i.e. trans-border pollutions, epidemics, illegal migrations, organized crimes, financial management, etc.). This book integrates geopolitical and domestic political analysis of China with a broad set of transnational security issues, and includes a diversity of regional views. In doing so, it explores further than the dichotomous debate between the American realists and liberals, adding finesse to the often simplified discussions on how to deal with the rising China. This book will be of interest to students of Asian Politics, Security Studies and International Relations.

Polari - The Lost Language of Gay Men Paul Baker, 2003-09-02 Polari is a secret form of language mainly used by homosexual men in London and other cities during the twentieth century. Derived in part from the slang lexicons of numerous stigmatised and itinerant groups, Polari was also a means of socialising, acting out camp performances and reconstructing a shared gay identity and worldview among its speakers. This book examines the ways in which Polari was used in order to construct 'gay identities', linking its evolution to the changing status of gay men and lesbians in the UK over the past fifty years.

Cyber Dragon Dean Cheng, 2016-11-14 This book provides a framework for assessing China's extensive cyber espionage efforts and multi-decade modernization of its military, not only identifying the what but also addressing the why behind China's focus on establishing information dominance as a key component of its military efforts. China combines financial firepower—currently the world's second largest economy—with a clear intent of fielding a modern military capable of competing not only in the physical environments of land, sea, air, and outer space, but especially in the electromagnetic and cyber domains. This book makes extensive use of Chinese-language sources to provide policy-relevant insight into how the Chinese view the evolving relationship between information and future warfare as well as issues such as computer network warfare and electronic warfare. Written by an expert on Chinese military and security developments, this work taps materials the Chinese military uses to educate its own officers to explain the bigger-picture thinking that motivates Chinese cyber warfare. Readers will be able to place the key role of Chinese cyber operations in the overall context of how the Chinese military thinks future wars will be fought and grasp how Chinese computer network operations, including various hacking incidents, are part of a larger, different approach to warfare. The book's explanations of how the Chinese view information's growing role in warfare will benefit U.S. policymakers, while students in cyber security and Chinese studies will better understand how cyber and information threats work and the seriousness of the threat posed by China specifically.

Effective Learning and Teaching in Modern Languages James A. Coleman, John Klapper, 2004-11-10 Effective Learning and Teaching in Modern Languages offers insights from the latest research into learning and teaching a language, and also outlines innovative teaching techniques, covering all the critical subjects including: the demands made of students and staff in modern languages the four language skills assessment, grammar, vocabulary and translation technology-enhanced learning residence abroad subdisciplines such as business, area, cultural and literary studies, and linguistics professional development. Providing both a clear overview of the discipline and a wealth of techniques, practical advice and useful resources, this book will be welcomed by lecturers or tutors new to the profession and experienced lecturers wanting to keep up with the latest developments and improve their students' learning.

Columbia Crew Survival Investigation Report Nasa, 2009 NASA commissioned the Columbia Accident Investigation Board (CAIB) to conduct a thorough review of both the technical and the organizational causes of the loss of the Space Shuttle Columbia and her crew on February 1, 2003. The accident investigation that followed determined that a large piece of insulating foam from Columbia's external tank (ET) had come off during ascent and struck the leading edge of the left wing, causing critical damage. The damage was undetected during the mission. The Columbia accident was not survivable. After the Columbia Accident Investigation Board (CAIB) investigation regarding the cause of the accident was completed, further consideration produced the question of whether there were lessons to be learned about how to improve crew survival in the future. This investigation was performed with the belief that a comprehensive, respectful investigation could provide knowledge that can protect future crews in the worldwide community of human space flight. Additionally, in the course of the investigation, several areas of research were identified that could improve our understanding of both nominal space flight and future spacecraft accidents. This report is the first comprehensive, publicly available accident investigation report addressing crew survival for a human spacecraft mishap, and it provides key information for future crew survival investigations. The results of this investigation are intended to add meaning to the sacrifice of the crew's lives by making space flight safer for all future generations.

eWork and eBusiness in Architecture, Engineering and Construction Jan Karlshøj, Raimar Scherer, 2018-09-03 eWork and eBusiness in Architecture, Engineering and Construction 2018 collects the papers presented at the 12th European Conference on Product and Process Modelling (ECPPM 2018, Copenhagen, 12-14 September 2018). The contributions cover complementary thematic areas that hold great promise towards the advancement of research and technological development in the modelling of complex engineering systems, encompassing a substantial number of high quality contributions on a large spectrum of topics pertaining to ICT deployment instances in AEC/FM, including: • Information and Knowledge Management • Construction Management • Description Logics and Ontology Application in AEC • Risk Management • 5D/nD Modelling, Simulation and Augmented Reality • Infrastructure Condition Assessment • Standardization of Data Structures • Regulatory and Legal Aspects • Multi-Model and distributed Data Management • System Identification • Industrialized Production, Smart Products and Services • Interoperability • Smart Cities • Sustainable Buildings and Urban Environments • Collaboration and Teamwork • BIM Implementation and Deployment • Building Performance Simulation • Intelligent Catalogues and Services eWork

and eBusiness in Architecture, Engineering and Construction 2018 represents a rich and comprehensive resource for academics and researchers working in the interdisciplinary areas of information technology applications in architecture, engineering and construction. In the last two decades, the biennial ECPPM (European Conference on Product and Process Modelling) conference series, as the oldest BIM conference, has provided a unique platform for the presentation and discussion of the most recent advances with regard to the ICT (Information and Communication Technology) applications in the AEC/FM (Architecture, Engineering, Construction and Facilities Management) domains.

The Art of R Programming Norman Matloff, 2011-10-11 R is the world's most popular language for developing statistical software: Archaeologists use it to track the spread of ancient civilizations, drug companies use it to discover which medications are safe and effective, and actuaries use it to assess financial risks and keep economies running smoothly. The Art of R Programming takes you on a guided tour of software development with R, from basic types and data structures to advanced topics like closures, recursion, and anonymous functions. No statistical knowledge is required, and your programming skills can range from hobbyist to pro. Along the way, you'll learn about functional and object-oriented programming, running mathematical simulations, and rearranging complex data into simpler, more useful formats. You'll also learn to: –Create artful graphs to visualize complex data sets and functions –Write more efficient code using parallel R and vectorization –Interface R with C/C++ and Python for increased speed or functionality –Find new R packages for text analysis, image manipulation, and more –Squash annoying bugs with advanced debugging techniques Whether you're designing aircraft, forecasting the weather, or you just need to tame your data, The Art of R Programming is your guide to harnessing the power of statistical computing.

Building Information Modeling Nawari O. Nawari, 2018-02-12 Many researchers and software developers have put a lot of effort into finding solutions for automated code checking. This book is a good summary of these efforts and provides readers with a comprehensive understanding of the status of such technologies in the industry. It also guides readers on implementation of such techniques using the platforms and tools currently available in the industry. – Issa Ramaji, University of North Florida, USA Building Information Modeling: Automated Code Checking and Compliance Processes covers current and emerging trends in automating the processes of examining building design against codes and standards of practice. The role of Building Information Modeling (BIM) technologies in these processes is thoroughly analyzed and explains how this new technology is significantly transforming modern architecture, engineering, and construction (AEC) domains. The book also introduces the theoretical background of computerizing compliance verification, including domain knowledge representations, building model representations, and automated code checking systems. An underlying goal for the material covered is to present the use of BIM technology as an integral part of the automated auditing process that can lead to a more comprehensive, intelligent, and integrated building design– a design where an optimized solution can be achieved in harmony with the current codes and standards of practice. This new proposed BIM-based framework for automating code conformance checking is one of the most powerful methods presently available to reflect actual building code requirements, and the methods described in the book offer significant benefits to the AEC industry such as: □ Providing consistency in interpretation of regulatory provisions Reducing code compliance validation errors, and the cost and time associated with compliance checking Allows for the ability to self-check required aspects before bidding Reduces the amount of time and resources required during design review Allows for optimal design, along with faster turnaround on feedback, and potentially faster approvals for construction permits by building and infrastructure authorities

Digital Design and Computer Architecture David Harris, Sarah L. Harris, 2012-07-24 Digital Design and Computer Architecture Second Edition David Money Harris and Sarah L. Harris Harris and Harris have taken the popular pedagogy from Computer Organization and Design down to the next level of refinement, showing in detail how to build a MIPS microprocessor in both Verilog and VHDL. Given the exciting opportunity that students have to run large digital designs on modern FPGAs, the approach the authors take in this book is both informative and enlightening. -David A. Patterson, University of California at Berkeley, Co-author of Computer Organization and Design Digital Design and Computer Architecture takes a unique and modern approach to digital design. Beginning with digital logic gates and progressing to the design of combinational and sequential circuits, Harris and Harris use these fundamental building blocks as the basis for what follows: the design of an actual MIPS processor. SystemVerilog and VHDL are integrated throughout the text in examples illustrating the methods and techniques for CAD-based circuit design. By the end of this book, readers will be able to build their own microprocessor and will have a top-to-bottom understanding of how it works. Harris and Harris have combined an engaging and humorous writing style with an updated and hands-on approach to digital design. This second edition has been updated with new content on I/O systems in the context of general purpose processors found in a PC as well as microcontrollers found almost everywhere. The new edition provides practical examples of how to interface with peripherals using RS232, SPI, motor control, interrupts, wireless, and analog-to-digital conversion. High-level descriptions of I/O interfaces found in PCs include USB, SDRAM, WiFi, PCI Express, and others. In addition to expanded and updated material throughout, SystemVerilog is now featured in the programming and code examples (replacing Verilog), alongside VHDL. This new edition also provides additional exercises and a new appendix on C programming to strengthen the connection between programming and processor architecture. SECOND Edition Features Covers the fundamentals of digital logic design and reinforces logic concepts through the design of a MIPS microprocessor. Features side-by-side examples of the two most prominent Hardware Description Languages (HDLs)-SystemVerilog and VHDL- which illustrate and compare the ways each can be used in the design of digital systems. Includes examples throughout the text that enhance the reader's understanding and retention of key concepts and techniques. Companion Web site includes links to CAD tools for FPGA design from Altera and Mentor Graphics, lecture slides, laboratory projects, and solutions to exercises.
