Covert Plants Prudence Gibson, Baylee Brits, 2018 Covert Plants contributes to newly emerging discourses on the implications of vegetal life for the arts and culture. This stretches to changes in our perception of 'nature' and to the adapting roles of botany, evolutionary ecology, and environmental aesthetics in the humanities. Its editors and contributors seek various expressions of vegetal life rather than the mere representation of such, and they proceed from the conviction that a rigorous approach to thinking with and through vegetal life must be interdisciplinary. At a time when urgent calls for restorative care and reparative action have been sounded for the environment, this essay volume presents a range of academic and creative perspectives, from evolutionary biology to literary theory, philosophy to poetry, which respond to the perplexing problems and paradoxes of vegetal thinking. Representations of vegetal life often include plant analogies and plant imagery. These representations have at times obscured the diversity of plant behavior and experience. Covert Plants probes the

implications of vegetal life for thought and how new plant science is changing our perception of the vegetal - around us and in us. How can we think, speak, and write about plant life without falling into human-nature dyads, or without tumbling into reductive theoretical notions about the always complex relations between cognition and action, identity and value, subject and object? A full view of this shifting perspective requires a 'stereoscopic' lens through which to view plants, but also simultaneously to alter our human-centered viewpoint. Plants are no longer the passive object of contemplation, but are increasingly resembling 'subjects, ' 'stakeholders, ' or 'actors.' As such, the plant now makes unprecedented demands upon the nature of contemplation itself. Moreover, the aesthetic, political, and legal implications of new knowledge regarding plants' ability to communicate, sense, and learn require intensive, cross-disciplinary investigation. By doing this, we can intervene into current attitudes to climate change and sustainability, and hopefully revise, for the better, human philosophies, ethics, and aesthetics that touch upon plant life.

Ecotourism in Appalachia Al Fritsch, Kristin Johannsen, 2021-03-17 Tourism is the world's largest industry, and ecotourism is rapidly emerging as its fastest growing segment. As interest in nature travel increases, so does concern for conservation of the environment and the well-being of local peoples and cultures. Appalachia seems an ideal destination for ecotourists, with its rugged mountains, uniquely diverse forests, wild rivers, and lively arts culture. And ecotourism promises much for the region: protecting the environment while bringing income to disadvantaged communities. But can these promises be kept? Ecotourism in Appalachia examines both the potential and the threats that tourism holds for Central Appalachia. The authors draw lessons from destinations that have suffered from the tourist trap syndrome, including Nepal and Hawaii. They conclude that only carefully regulated and locally controlled tourism can play a positive role in Appalachia's economic development.

CALL and complexity – short papers from EUROCALL 2019 Fanny Meunier,Julie Van de Vyver,Linda Bradley,Sylvie Thouësny,2019-12-09 The theme selected for the 2019 EuroCALL conference held in Louvain-la-Neuve was ‘CALL and complexity’. As languages are known to be intrinsically and linguistically complex, as are the many determinants of learning (additional) languages, complexity is viewed as a challenge to be embraced collectively. The 2019 conference allowed us to pay tribute to providers of CALL solutions and to recognize the complexity of their task. We hope you will enjoy reading this volume as it offers a rich glimpse into the numerous debates that took place during EuroCALL 2019. We look forward to continuing those debates and discussions with you at the next EuroCALL conferences!

WorldMinds Donald G. Janelle,Barney Warf,Kathy Hansen,2004-03-31 WorldMinds provides broad exposure to a

geography that is engaged with discovery, interpretation, and problem solving. Its 100 succinct chapters demonstrate the theories, methods, and data used by geographers, and address the challenges posed by issues such as globalization, regional and ethnic conflict, environmental hazards, terrorism, poverty, and sustainable development. Through its theoretical and practical applications, we are reminded that the study of Geography informs policy making.

Natural Language Processing and Information Systems Elisabeth Métais, Farid Meziane, Sunil Vadera, Vijayan Sugumaran, Mohamad Saraee, 2019-06-20 This book constitutes the refereed proceedings of the 24th International Conference on Applications of Natural Language to Information Systems, NLDB 2019, held in Salford, UK, in June 2019. The 21 full papers and 16 short papers were carefully reviewed and selected from 75 submissions. The papers are organized in the following topical sections: argumentation mining and applications; deep learning, neural languages and NLP; social media and web analytics; question answering; corpus analysis; semantic web, open linked data, and ontologies; natural language in conceptual modeling; natural language and ubiquitous computing; and big data and business intelligence.

Cyber Fraud Rick Howard, 2009-04-23 With millions lost each year, cyber crime has evolved from a minor nuisance to a major concern involving well-organized actors and highly sophisticated organizations. Combining the best of investigative journalism and technical analysis, *Cyber Fraud: Tactics, Techniques, and Procedures* documents changes in the culture of cyber criminals and explores the innovations that are the result of those changes. The book uses the term Botnet as a metaphor for the evolving changes represented by this underground economy. Copiously illustrated, this engaging and engrossing book explores the state of threats present in the cyber fraud underground. It discusses phishing and pharming, trojans and toolkits, direct threats, pump-and-dump scams, and other fraud-related activities of the booming cyber-underground economy. By examining the geopolitical and socio-economic foundations of a cyber threat landscape, the book specifically examines telecommunications infrastructure development, patterns and trends of internet adoption and use, profiles of specific malicious actors, threat types, and trends in these areas. This eye-opening work includes a variety of case studies – including the cyber threat landscape in Russia and Brazil. An in-depth discussion is provided on the Russian Business Network's (RBN) role in global cyber crime as well as new evidence on how these criminals steal, package, buy, sell, and profit from the personal financial information of consumers. Armed with this invaluable information, organizations and individuals will be better able to secure their systems and develop countermeasures to disrupt underground fraud.

Theory of the Border Thomas Nail, 2016-08-02 Despite -- and perhaps because of -- increasing global mobility, there are more types of borders today than ever before in history. Borders of all kinds define every aspect of social life in the twenty-first century. From the biometric data that divides the smallest aspects of our bodies to the aerial drones that patrol the immense expanse of our domestic and international airspace, we are defined by borders. They can no longer simply be understood as the geographical divisions between nation-states. Today, their form and function has become too complex, too hybrid. What we need now is a theory of the border that can make

sense of this hybridity across multiple domains of social life. Rather than viewing borders as the result or outcome of pre-established social entities like states, Thomas Nail reinterprets social history from the perspective of the continual and constitutive movement of the borders that organize and divide society in the first place. Societies and states are the products of bordering, Nail argues, not the other way around. Applying his original movement-oriented theoretical framework kinopolitics to several major historical border regimes (fences, walls, cells, and checkpoints), *Theory of the Border* pioneers a new methodology of critical limology, that provides fresh tools for the analysis of contemporary border politics.
