**Power Systems Enterprise Servers with PowerVM Virtualization and RAS** Dino Quintero, JinHoon Baek, Guillermo Diez, Hassan Elsetohy, Debra Francis, Bing He, Rajesh Jeyapaul, Anil Kalavakolanu, Tejaswini Kaujalgi, David Kgabo, Ricardo Puig, Vani Ramagiri, IBM Redbooks, 2013-03-06 This IBM® Redbooks® publication illustrates implementation, testing, and helpful scenarios with IBM Power® Systems 780 and 795 using the comprehensive set of the Power virtualization features. We focus on the Power Systems functional improvements, in particular, highlighting the reliability, availability, and serviceability (RAS) features of the enterprise servers. This document highlights IBM Power Systems Enterprise Server features, such as system scalability, virtualization features, and logical partitioning among others. This book provides a documented deployment model for Power 780 and Power 795 within a virtualized environment, which allows clients to plan a foundation for exploiting and using the latest features of the IBM Power Systems Enterprise Servers. The target audience for this book includes technical professionals (IT consultants, technical support staff, IT Architects, and IT Specialists) responsible for providing IBM Power Systems solutions and support.

**IBM PowerVM Virtualization Introduction and Configuration** Scott Vetter, Mel Cordero, Lucio Correia, Hai Lin, Vamshikrishna Thatikonda, Rodrigo Xavier, IBM Redbooks, 2015-11-24 This IBM® Redbooks® publication provides an introduction to PowerVM™ virtualization technologies on Power System servers. PowerVM is a combination of hardware, firmware, and software that provides CPU, network, and disk virtualization. These are the main virtualization technologies: POWER7, POWER6, and POWER5 hardware POWER Hypervisor Virtual I/O Server Though the PowerVM brand includes partitioning, management software, and other offerings, this publication focuses on the virtualization technologies that are part of the PowerVM Standard and Enterprise Editions. This publication is also designed to be an introduction guide for system administrators, providing instructions for these tasks: Configuration and creation of partitions and resources on the HMC Installation and configuration of the Virtual I/O Server Creation and installation of virtualized partitions Examples using AIX, IBM i, and Linux This edition has been updated with the latest updates available and an improved content organization.

Think Bayes Allen B. Downey, 2021-05-18 If you know how to program, you're ready to tackle Bayesian statistics. With this book, you'll learn how to solve statistical problems with Python code instead of mathematical formulas, using discrete probability distributions rather than continuous mathematics. Once you get the math out of the way, the Bayesian fundamentals will become clearer and you'll begin to apply these techniques to real-world problems. Bayesian statistical methods are becoming more common and more important, but there aren't many resources available to help beginners. Based on undergraduate classes taught by author Allen B. Downey, this book's computational approach helps you get a solid start. Use your programming skills to learn and understand Bayesian statistics Work with problems involving estimation, prediction, decision analysis, evidence, and Bayesian hypothesis testing Get started with simple examples, using coins, dice, and a bowl of cookies Learn computational methods for solving real-world problems

Effective Oracle by Design Thomas Kyte, 2003-09-12 Tom Kyte of Oracle Magazine's "Ask Tom" column has written the definitive guide to designing and building high-performance, scalable Oracle applications. The book covers schema design, SQL and PL/SQL, tables and indexes, and much more. From the exclusive publisher of Oracle Press books, this is a must-have resource for all Oracle developers and DBAs.

**Does War Belong in Museums?** Wolfgang Muchitsch, 2014-04-30 Presentations of war and violence in museums generally oscillate between the fascination of terror and its instruments and the didactic urge to explain violence and, by analysing it, make it easier to handle and prevent. The museums concerned also have to face up to these basic issues about the social and institutional handling of war and violence. Does war really belong in museums? And if it does, what objectives and means are involved? Can museums avoid trivializing and aestheticising war, transforming violence,

injury, death and trauma into tourist sights? What images of shock or identification does one generate - and what images would be desirable?

*Spaces and Identities in Border Regions* Christian Wille, Rachel Reckinger, Sonja Kmec, Markus Hesse, 2015-11-30 Spatial and identity research operates with differentiations and relations. These are particularly useful heuristic tools when examining border regions where social and geopolitical demarcations diverge. Applying this approach, the authors of this volume investigate spatial and identity constructions in cross-border contexts as they appear in everyday, institutional and media practices. The results are discussed with a keen eye for obliquely aligned spaces and identities and relinked to governmental issues of normalization and subjectivation. The studies base upon empirical surveys conducted in Germany, France, Belgium and Luxembourg.

**Fostering Human Capital in the Gulf Cooperation Council Countries** Sameh El-Saharty, Igor Kheyfets, Christopher Herbst, Mohamed Ihsan Ajwad, 2020-07-08 The formation of human capital--the knowledge, skills, and health that people accumulate over their lifetimes--is critical for the six Gulf Cooperation Council (GCC) countries. Human capital contributes not only to human development and employment but also to the long-term sustainability of a diversified economic growth model that is knowledge based and private sector driven. This approach is critical, given that income from oil and gas will eventually decline and that the nature of work is evolving in response to rapid technological changes, in turn demanding new skill sets. The GCC governments have demonstrated their strong political will for this shift: four of them are among the first countries to join the World Bank's Human Capital Project—a global effort to improve investments in people as measured by the Human Capital Index. The GCC countries face four main challenges: • Low levels of basic proficiency among schoolchildren • A mismatch between education and the labor market • A relatively high rate of adult mortality and morbidity • A unique labor market, in which wages in the public sector are more generous than in the private sector and government employment of nationals is virtually guaranteed To address these challenges, this report outlines four strategies in a “whole-of-government” approach: • Investing in high-quality early childhood development • Preparing healthier, better educated, and skilled youth for the future • Enabling greater adult labor force participation • Creating an enabling environment for human capital formation These strategies are based on best practices in other countries and feature some of the GCC countries' plans, including their national “Visions,” to take their economies and societies further into the twenty-first century. With the COVID-19 pandemic, the GCC countries face additional challenges that may worsen some preexisting vulnerabilities and erode human capital. In response, the GCC governments have taken multiple measures to protect their populations' health and their economies. Any country's decision to reopen its economy needs to closely consider public health consequences to avoid a resurgence of infections and any further erosion of its human capital. The COVID-19 crisis underscores that the need to accelerate and improve investment in human capital has never been greater. Once the GCC countries return to a “new normal,” they will be in a position to achieve diversified and sustainable growth by adopting, and then tailoring, the strategies presented in this report.

Digital Environments Urte Undine Frömmering, Steffen Köhn, Samantha Fox, Mike Terry, 2017-03-31 Digital technology permeates the physical world. Social media and virtual reality, accessed via internet capable devices - computers, smartphones, tablets and wearables - affect nearly all aspects of social life. The contributions to this volume apply innovative forms of ethnographic research to the digital realm. They examine the emergence of new forms of digital life, such as political participation through comments on East Greenlandic news blogs, the personal use of video broadcasting applications, the rise of transnational migrant networks facilitated by social media, or the effects of Facebook, Twitter, and Instagram on global conflicts.

**The Democratization of Artificial Intelligence** Andreas Sudmann, 2019-10-31 After a long time of neglect, Artificial Intelligence is once again at the center of most of our political, economic, and socio-cultural debates. Recent advances in the field of Artificial Neural Networks have led to a

renaissance of dystopian and utopian speculations on an AI-rendered future. Algorithmic technologies are deployed for identifying potential terrorists through vast surveillance networks, for producing sentencing guidelines and recidivism risk profiles in criminal justice systems, for demographic and psychographic targeting of bodies for advertising or propaganda, and more generally for automating the analysis of language, text, and images. Against this background, the aim of this book is to discuss the heterogeneous conditions, implications, and effects of modern AI and Internet technologies in terms of their political dimension: What does it mean to critically investigate efforts of net politics in the age of machine learning algorithms?

Carcass management guidelines Miller, L.P., Miknis, R.A. and Flory, G.A., 2020-12-28 Animal disease outbreaks pose many challenges for response authorities that can impact livelihoods, food security, and the environment. Proper disposal of animal carcasses that die or are culled during the outbreak is a key component of a successful response to a disease outbreak because it helps prevent or mitigate the further spread of pathogens and in case of zoonotic disease, to further protect human health. The practical guidelines presented hereby provide carcass and related waste management considerations and recommended procedures for use by Veterinary Services and other official response authorities when developing animal disease outbreak containment and eradication plans. The guidelines apply to animal disease outbreaks of varying sizes, whether the outbreak is isolated to a single premise or spans a region to cover numerous premises. However, they are focused on small to medium-sized holdings in countries without access to engineered landfills, rendering plants or controlled incinerators. The guidelines are written in the spirit of “keep it simple and doable”, considering the limited human and financial resources that many countries are constrained with. Its presentation and practical approach ensure that countries will find it very useful for their emergency operation procedures toolbox. Further, the guidelines directly contribute to the one-health approach by protecting the health of animals, humans, and the environment.

**Performing the Digital** Martina Leeker, Imanuel Schipper, Timon Beyes, 2017-03-31 How is performativity shaped by digital technologies - and how do performative practices reflect and alter techno-social formations? *Performing the Digital* explores, maps and theorizes the conditions and effects of performativity in digital cultures. Bringing together scholars from performance studies, media theory, sociology and organization studies as well as practitioners of performance, the contributions engage with the implications of digital media and its networked infrastructures for modulations of affect and the body, for performing cities, protest, organization and markets, and for the performativity of critique. With contributions by Marie-Luise Angerer, Timon Beyes, Scott deLahunta and Florian Jenett, Margarete Jahrmann, Susan Kozel, Ann-Christina Lange, Oliver Leistert, Martina Leeker, Jon McKenzie, Sigrid Merx, Melanie Mohren and Bernhard Herboldt, Imanuel Schipper and Jens Schröter.

**Lobbying the European Union** Paul A. Shotton, Paul G. Nixon, 2020-09-10 Unique in bringing together contributions from academics and practitioners on the theme of strategic, intelligent modern lobbying this book provides a thorough and accessible discussion on key ideas pertinent to the pursuance of public affairs in the European Union. Combining innovative academic research with first-hand professional experience it offers the reader a combination of practical recommendations, case studies and academic theory to add new insights to interest group research and lobbying strategies. While focusing on the European Union the contributors acknowledge the multi-level dimension of EU decision-making and incorporate research on multi-level governance as well as lobbying by sub-national authorities. Through this they present a fuller picture of a subject that should appeal to students, academics and practitioners alike.

**A Practical Introduction to Hardware/Software Codesign** Patrick R. Schaumont, 2010-09-09 This is a practical book for computer engineers who want to understand or implement hardware/software systems. It focuses on problems that require one to combine hardware design with software design – such problems can be solved with hardware/software codesign. When used properly, hardware/software co-design works better than hardware

design or software design alone: it can improve the overall performance of digital systems, and it can shorten their design time. Hardware/software codesign can help a designer to make trade-offs between the flexibility and the performance of a digital system. To achieve this, a designer needs to combine two radically different ways of design: the sequential way of decomposition in time, using software, with the parallel way of decomposition in space, using hardware. **Intended Audience** This book assumes that you have a basic understanding of hardware that you are familiar with standard digital hardware components such as registers, logic gates, and components such as multiplexers and arithmetic operators. The book also assumes that you know how to write a program in C. These topics are usually covered in an introductory course on computer engineering or in a combination of courses on digital design and software engineering.

**Independent Theatre in Contemporary Europe** Manfred Brauneck, ITI Zentrum Deutschland, 2017-03-31 Over the past 20 years European theatre underwent fundamental changes in terms of aesthetic focus, institutional structure and in its position in society. The impetus for these changes was provided by a new generation in the independent theatre scene. This book brings together studies on the state of independent theatre in different European countries, focusing on the fields of dance and performance, children and youth theatre, theatre and migration and post-migrant theatre. Additionally, it includes essays on experimental musical theatre and different cultural policies for independent theatre scenes in a range of European countries.

Urban Resilience in a Global Context Dorothee Brantz, Avi Sharma, 2020-10-31 Urban Resilience is seen by many as a tool to mitigate harm in times of extreme social, political, financial, and environmental stress. Despite its widespread usage, however, resilience is used in different ways by policy makers, activists, academics, and practitioners. Some see it as a key to unlocking a more stable and secure urban future in times of extreme global insecurity; for others, it is a neoliberal technology that marginalizes the voices of already marginal peoples. This volume moves beyond praise and critique by focusing on the actors, narratives and temporalities that define urban resilience in a global context. By exploring the past, present, and future of urban resilience, this volume unlocks the potential of this concept to build more sustainable, inclusive, and secure cities in the 21st century.

**Pierre Rosanvallon's Political Thought** Oliver Flügel-Martinsen, Franziska Martinsen, Stephen W. Sawyer, Daniel Schulz, 2019-01-29 The work of Pierre Rosanvallon has increasingly found itself at the center of debates in democratic and political theory - although only few of his numerous monographs have thus far been translated from French. This interdisciplinary volume, the first comprehensive collection on his political thought in English, seeks to lay the groundwork for the study of this eminent political thinker and historian. Following a hitherto untranslated opening essay by Rosanvallon, the chapters - written from a variety of disciplinary perspectives including political theory, political science, philosophy, and history - cover a wide range of topics from the history of democracy to sovereignty, populism, and the function of the press in liberal democratic regimes.

**The Pandemic Century: One Hundred Years of Panic, Hysteria, and Hubris** Mark Honigsbaum, 2019-04-09 With a New Chapter and Updated Epilogue on Coronavirus A Financial Times Best Health Book of 2019 and a New York Times Book Review Editors' Choice Honigsbaum does a superb job covering a century's worth of pandemics and the fears they invariably unleash. —Howard Markel, MD, PhD, director of the Center for the History of Medicine, University of Michigan How can we understand the COVID-19 pandemic? Ever since the 1918 Spanish influenza pandemic, scientists have dreamed of preventing such catastrophic outbreaks of infectious disease. Yet despite a century of medical progress, viral and bacterial disasters continue to take us by surprise, inciting panic and dominating news cycles. In *The Pandemic Century*, a lively account of scares both infamous and less known, medical historian Mark Honigsbaum combines reportage with the history of science and medical sociology to artfully reconstruct

epidemiological mysteries and the ecology of infectious diseases. We meet dedicated disease detectives, obstructive or incompetent public health officials, and brilliant scientists often blinded by their own knowledge of bacteria and viruses—and see how fear of disease often exacerbates racial, religious, and ethnic tensions. Now updated with a new chapter and epilogue.

**Target Markets - International Terrorism Meets Global Capitalism in the Mall** Suzi Mirgani, 2017-03-31 This book explores the points of convergence between corporate capitalist and terrorist practice. Assessing an increase in the number of terrorist attacks directed at commercial entities in urban areas, with an emphasis on the shopping mall in general and Nairobi's Westgate Mall in particular, Suzi Mirgani offers a fascinating and disturbing perspective on the spaces where the most powerful forces of contemporary culture - the most mainstream and the most extreme - meet on common ground.

*Statistical Abstract of the United States, 2012* Census Bureau, U. S. Department of Commerce, 2011-09 The Statistical Abstract of the United States, published since 1878, is the standard summary of statistics on the social, political, and economic organization of the United States. It is designed to serve as a convenient volume for statistical reference and as a guide to other statistical publications and sources. The latter function is served by the introductory text to each section, the source note appearing below each table, and Appendix I, which comprises the Guide to Sources of Statistics, the Guide to State Statistical Abstracts, and the Guide to Foreign Statistical Abstracts.
