Leaving Faith Behind Jeffrey Olsson,2009-03-17 In the first nine chapters of this book Jeff Olsson answers those who have asked why he would want to leave a faith community such as the Anglican Church of Canada and Christianity. A letter to my curious friends is Jeffs personal story where he explains how faith is not always a virtue when those who choose to believe do so at the expense of others. Chapters ten through twenty eight give a historical perspective on atheism and present a rational world view. Later chapters include a criticism of Augustinian and Papal views on morality and offer humanism as a viable alternative.

Environment in the 21st Century and New Development Patterns K. Matsushita,2013-06-29 Economic growth after World War II was made possible through dramatic increases in the use of material resources and energy. It is apparent that current development patterns followed by industrialized countries are causing serious environmental problems and that they are neither ecologically nor socially sustainable. In recent years, many Asian developing countries, which have suffered from poverty for decades, are experiencing high rates of economic growth by introducing material-intensive production and consumption patterns. The globalization trends magnify on a global scale the problems associated with current development patterns. How can we transform existing economic and social systems into more environmentally benign and sustainable ones? This book presents a number of issues that must be considered whn discussing new development patterns, which are environmentally friendly and socially fair. It covers concepts of new development patterns, new energy and water supply, sustainable agriculture, information technology and environment, information disclosure and poverty alleviation. Audience: This volume will be of interest to those who are involved in innovative interdisciplinary policy studies on environment and development, particularly in Asia and the Pacific region. Also those who are interested in realizing sustainable development through agriculture, water supply, information technology, chemical industry and sustainability issues in China and India.

Introducing Special Educational Needs Philip Gardner,John Dwyfor Davies,2013-10-23 Pressure of time means that the complex topic of special educational needs (SEN) at initial teacher training and post-graduate levels can often be covered at too swift a pace. The unfortunate result is that a newly qualified teacher faced with the pressures of today's typically inclusive classrooms can feel unprepared or lacking in knowledge about this vitally important area. This supportive, accessible text will be invaluable to students undergoing their initial teacher training as it features broad coverage of key aspects of SEN in a single volume. It will provide the reader with succinct information on major SEN themes, key questions for student teachers on each topic, and a selection of the most important readings. It also includes sets of reflection-based student tasks; activities for completion during school placements; practical tutor-led to mentor-led activities, plus extension activities; and a series of suggested topics for school-based assignments in SEN.

God's Heart for Israel (and Us) John Weldon,2011-07-12 We read God's promises to Israel in the Old Testament where it is referred to as "the apple of His eye but is God done with Israel since they rejected their Messiah? Are we as Christians supposed to stand for the nation of Israel today? Has the Church now replaced Israel so that God's promises and covenants given in the OT no longer apply to Israel? What is Israel's global importance? Is global anti-Semitism on the rise? What will be Israel's ultimate future? According to an article in the Jerusalem Post of June 17 2011 Israel is at a do-or-die moment. As was the case in May 1967 when the combined Arab armies gathered with the express purpose of wiping the Jewish state off the map - today again Israel is alone in its hour of greatest peril. John Weldon is able to answer these questions and address the important issues of our day because of the extensive research he has done on Middle East and America. He shares what he has learned in this deeply thought-provoking book.

What You Must Know About Liver Disease Rich Snyder, DO,2016-06-01 One of the leading causes of death in the United States, liver disease ranks fourth as a killer of people between the ages of 45 and 64. Unfortunately, without an annual blood test, it can progress silently until the organ's ability to function has been greatly compromised. When a diagnosis of liver disease is given, the road that lies ahead is unfamiliar to most patients and may seem frightening. To ease their journey, bestselling author and physician Dr. Rich Snyder has written What You Must Know About Liver Disease, a guide to understanding the disease and its treatment options. The book is divided into two parts. Part One addresses the conventional approach to the treatment of liver disease. Using nontechnical language, Dr. Snyder begins by explaining the function of the liver and examines the many ways in which the liver can be damaged—from alcohol abuse to overdosing on over-the-counter pain relievers. He also provides an overview of the type of care to expect from your healthcare team— including tests, medications, and more—and looks at the signs and symptoms of possible complications. Once you know the basics of liver function and conventional treatments, Part Two provides a comprehensive examination of the complementary therapies that can be used in coordination with your ongoing care. The doctor offers information on nutrition and natural supplements—those to take and those to avoid. Finally, he presents an exercise program designed specifically for liver patients and a Liver-Detoxification Plan that can rid the organ of burdensome substances. Written in a clear and inviting manner, Dr. Snyder allows patients and their families to better understand what liver disease is and how it can be successfully

treated. Most important, What You Must Know About Liver Disease gives patients the information they need to be active participants in their own healthcare.

Free Your Mind! Simon Matthews,2023-05-02 Between 1967 and 1970 Italian auteur Giovanni Tinto Brass directed four feature films in London, each starring a woman as the main character. Exploring the political, cultural and sexual ideas of their time, often in a deliberate pop-art style, they contain much priceless footage of now forgotten neighborhoods, galleries, clubs and events as well as an abundance of contemporary music. A fascinating blend of social history, pop culture, cinema, music and TV, Free Your Mind! examines the films, their stars and how they were made. Based on interviews with many of the surviving participants, Matthews argues that at this stage of his career, before Caligula, Brass was as significant a figure in cinema as Antonioni, Godard and many other better-known directors.

Crime and Deviance in Cyberspace DavidS. Wall,2017-07-05 This volume presents the reader with an interesting and, at times, provocative selection of contemporary thinking about cybercrimes and their regulation. The contributions cover the years 2002-2007, during which period internet service delivery speeds increased a thousand-fold from 56kb to 56mb per second. When combined with advances in networked technology, these faster internet speeds not only made new digital environments more easily accessible, but they also helped give birth to a completely new generation of purely internet-related cybercrimes ranging from spamming, phishing and other automated frauds to automated crimes against the integrity of the systems and their content. In order to understand these developments, the volume introduces new cybercrime viewpoints and issues, but also a critical edge supported by some of the new research that is beginning to challenge and surpass the hitherto journalistically-driven news stories that were once the sole source of information about cybercrimes.

It provides an overview of foundational issues and core themes in the field and introduces key areas of debate, moving from an introductory level to in-depth discussion as the book progresses. Divided into three parts: the first part sets the scene, addressing introductory psychology and sociology, social policy, equality and diversity, skills for practice, and working with people the second part considers key themes such as the contribution of philosophy and politics; criminal justice; management of services; the relationship between place and wellbeing; research in health and social care; theories of counselling; housing and the built environment the third part looks at discrete areas of practice such as mental health; substance abuse, protection work; health promotion; disability studies; working with men; child welfare and public responsibility. Each chapter begins with an outline of the content and learning outcomes and includes reflective exercises to allow students to reflect on what they have read, review their learning and consolidate their understanding. Time-pressed readers wanting to 'dip into' the book for relevant areas can do so but, read from cover to cover, the book provides a comprehensive introduction to the key areas of contemporary health and social care practice.
