*Military Industry and Regional Defense Policy* Timothy D. Hoyt, 2017-07-05 *Military Industry and Regional Defense Policy* re-examines military industrialization in the developing world, focusing on policy-making in producer states and the impact of security perceptions on such policy-making. Timothy D. Hoyt reassesses the role of regional state sub-systems in international relations, and recent historical studies of international technology and arms transfers. Looking at Israel, Iraq and India, the three most powerful regional powers in the Cold War era, he presents an expert analysis of the three-sided phenomena of the regional hegemony, the regional competitor and the small over-achiever. This new book breaks away from existing literature on military industries in the developing world, which has focused on their economic and development costs and benefits. These past studies have used primitive methodologies that focus on the production of complete weapons systems - a misleading gauge in a world of growing international defense cooperation. They have also ignored empirical evidence of the impact of local military industrial production on Cold War regional conflict, and of the defence planning and concerns that drove development of indigenous military industries in key regional powers. This new text delivers an incisive new perspective.

*Southeast Asia in Search of an ASEAN Community* C. Rodolfo Severino, 2006 Talking about ASEAN, this volume reappraises the organization from the inside, through controversial or perplexing issues such as the ASEAN Way, the accession of the new members, including Myanmar, the principle of non-interference, regional security, regional economic integration, the haze and SARS, and ASEAN's future.

*New Frontiers in China's Foreign Relations* Allen Carlson,Xiao Ren,2011 This book stands as a rebuke to any who would attempt to forward simplistic interpretations of China's rise. In place of parsimonious arguments, or an endorsement of any singular set of images (whether pacific or confrontational), it repeatedly calls attention to the remarkable complexity of China's emerging international profile. More specifically, the leading Chinese and American scholars working in the fields of Chinese foreign policy, international political economy, and national security, who contributed to this volume argue that while China appears to be entering a new era in its relationship with the outside world, such a development encompasses disparate, even contradictory, policies, and, as a result, there is a great deal of fluidity within China's place in world politics.

*Traditional Media and the Internet* Sylvia M. Chan-Olmsted,2017-10-03 This special issue addresses the topic of Internet business models from the perspective of the traditional media sectors. The eleven special-theme articles tackle the issues of online content delivery business models, the relationship between online and off-line media products, the Internet's impact on a media value chain, online marketing of music products, Internet content strategies, and comparative studies of Web content and strategies in different countries. From theoretical discussions to empirical investigations, the authors examine fully the traditional medial incumbents' efforts to develop business strategies that leverage their online competencies and suggest the factors that might play a role in this process. This focused theme issue provides readers with a deeper understanding of how the Internet

has changed the playing field for the media industries and gives a preliminary view of things to come.

**Money, Politics and Health Care** Institute for Research on Public Policy, Queen's University (Kingston, Ont.). Institute of Intergovernmental Relations, 2004

Current tensions in intergovernmental fiscal arrangements are thus important impediment to improving the health care system. At the same time, the failure of provinces to correct health care problems acts a serious irritant in intergovernmental relations, creating a vicious cycle where deficiencies in intergovernmental fiscal relations make health care reform difficult while failures to effect health care reform increase conflict between the provinces and the federal government. This collection of essays analyses key issues in federal-provincial health care relations, particularly the fiscal component. The authors look at why there is a role for the federal government in health care and consider the critical issues in recent intergovernmental political battles over this role. The issues of whether the vertical federal-provincial fiscal imbalance is myth or reality, how much the federal government does and should contribute financially to provincial health care programs, and methods for settling disputes, such as those over user fees, are discussed. The authors also provide concrete proposals for reconstructing the federal-provincial partnership. Contributors include Keith Banting (Queen's University), Robin Boadway (Queen's University), David Cameron (University of Toronto), Harvey Lazar, Jennifer McCrea-Logie, France St-Hilaire, and Jean-François Tremblay.

Power and Contestation Nivedita Menon, Aditya Nigam, 2013-07-04 1989 marks the unraveling of India's 'Nehruvian Consensus' around the idea of a modern, secular nation with a self-reliant economy. Caste and

religion have come to play major roles in national politics. Global economic integration has led to conflict between the state and dispossessed people, but processes of globalization have also enabled new spaces for political assertion, such as around sexuality. Older challenges to the idea of India continue from movements in Kashmir and the North-East, while Maoist insurgency has deepened its bases. In a world of American Empire, India as a nuclear power has abandoned non-alignment, a shift that is contested by voices within. *Power and Contestation* shows that the turbulence and turmoil of this period are signs of India's continued vibrancy and democracy. The book is an ideal introduction to the complex internal histories and external power relations of a major global player for the new century.

It Takes a Pillage Nomi Prins, 2009-10-02 A former Wall Street manager turned muckraking journalist gets inside how the banks looted the Treasury, stole the bailout, and continued with business as usual We all watched as packs of former Big Financiers commandeered posts in Washington and lavished trillions in bailouts to save big Wall Street firms that used that money for anything and everything except to fill in Main Street's potholes. We all watched as Wall Street heavyweights fought tooth and nail to decelerate financial reform and won. Former Wall Streeter Nomi Prins has been watching, too, and she is not going to let them get away with it. More than just an angry populist, commentator stuck on the sidelines, Prins understands Big Finance and big money and big schemes-and in this book she exposes the fundamental follies of our economic system and the schemes of the bigwigs who have no intention of letting it change. Remarkably combines detail, clarity, and narrative momentum, revealing all the ways in which banks gamed the system to get the most money with the

least oversight. Exposes the power-bankers who bagged more than \$5 billion in compensation before and after their companies grabbed more than a trillion dollars in federal bailout subsidies-and how the government's indignation at this didn't lead to change. Shows how the most egregious pillagers work at the Fed and Treasury department, detailing how Hank Paulson, Ben Bernanke, and Tim Geithner siphoned off \$10.7 trillion from the public's future for Big Finance's present, all the while telling us it was for our own good. Slams a financial system that will not change, if our government doesn't force it to change, no matter what happens in the so-called free market and why the 'sweeping' financial reform bill passed after Wall Street reconsolidated its power, is anything but sweeping or reformative. Written by a former managing director at Goldman Sachs, now a senior fellow at Demos, who writes regularly on corruption in Washington and Wall Street for news outlets ranging from Fortune to Mother Jones. If you're still enraged and frustrated with how the bank bailout went bust for the American people, or how Wall Street continues to operate as if the rest of the world doesn't matter, or how the banks are once again rolling in outsized profits and obscene bonuses while average Americans continue to struggle through a bleak landscape of foreclosures and job loss, It Takes a Pillage gives voice to your outrage, and provides a deeper insight into what we really have to be angry about and how we can fight for some real change.

*India and International Law, Volume 2* Bimal N. Patel, 2008-02-06 India and International Law, volume 2 examines India's policy and practical approach to modern and emerging subjects such as energy, investment, sports, banking, biotechnology, taxation, water courses, feminism, air law and role of India in UN reforms. The most discussed interlinked issues of civilian nuclear energy and nuclear weapons are analysed in two separate chapters. This volume also examines legal challenges and offers possible solutions in the area of private international law, which hopefully would serve the purposes of relevant policy-makers, judiciary, common men and women and 2.5 million Non-Resident Indians (NRIs). India and International Law, volume 2 will enable the readers to realize the sheer magnitude of legal challenges faced by India, hence, one way forward is to consider some of the suggestions offered by the authors. It is hoped that these two volumes will provide a useful framework for similar studies and will remain a must source of consultation for those who are interested in India's state practice on international law.

Asymmetric Warfare in South Asia Peter R. Lavoy, 2009-11-12 The 1999 conflict between India and Pakistan near the town of Kargil in contested Kashmir was

the first military clash between two nuclear-armed powers since the 1969 Sino-Soviet war. Kargil was a landmark event not because of its duration or casualties, but because it contained a very real risk of nuclear escalation. Until the Kargil conflict, academic and policy debates over nuclear deterrence and proliferation occurred largely on the theoretical level. This deep analysis of the conflict offers scholars and policymakers a rare account of how nuclear-armed states interact during military crisis. Written by analysts from India, Pakistan, and the United States, this unique book draws extensively on primary sources, including unprecedented access to Indian, Pakistani, and U.S. government officials and military officers who were actively involved in the conflict. This is the first rigorous and objective account of the causes, conduct, and consequences of the Kargil conflict.

Brainwashed Sally Satel, Scott O. Lilienfeld, 2013-05-16  
This provocative account of our obsession with neuroscience brilliantly illuminates what contemporary neuroscience and brain imaging can and cannot tell us about ourselves, providing a much-needed reminder about the many factors that make us who we are. What can't neuroscience tell us about ourselves? Since fMRI -- functional magnetic resonance imaging -- was introduced in the early 1990s, brain scans have been used to help politicians understand and manipulate voters, determine guilt in court cases, and make sense of everything from musical aptitude to romantic love. In *Brainwashed*, psychiatrist and AEI scholar Sally Satel and psychologist Scott O. Lilienfeld reveal how many of the real-world applications of human neuroscience gloss over its limitations and intricacies, at times obscuring -- rather than clarifying -- the myriad factors that shape our behavior and identities. Brain scans, Satel and Lilienfeld show, are

useful but often ambiguous representations of a highly complex system. Each region of the brain participates in a host of experiences and interacts with other regions, so seeing one area light up on an fMRI in response to a stimulus doesn't automatically indicate a particular sensation or capture the higher cognitive functions that come from those interactions. The narrow focus on the brain's physical processes also assumes that our subjective experiences can be explained away by biology alone. As Satel and Lilienfeld explain, this neurocentric view of the mind risks undermining our most deeply held ideas about selfhood, free will, and personal responsibility, putting us at risk of making harmful mistakes, whether in the courtroom, interrogation room, or addiction treatment clinic. Although brain scans and other neurotechnologies have provided groundbreaking insights into the workings of the human brain, *Brainwashed* shows readers that the increasingly fashionable idea that they are the most important means of answering the enduring mysteries of psychology is misguided -- and potentially dangerous.

Beyond Realism Rekha Datta, 2010-03 As the world is changing, many scholars, analysts, and policy makers agree that even as governments need to confront external threats, creating sustainable domestic environments is imperative as a policy priority. As events surrounding September 11, 2001 continue to remind us, marginalized sections of the population can become breeding grounds for dissatisfaction, disenchantment, and eventually, targets for terrorist groups. Throughout the cold war period, South Asia served as a strategic region in the bilateral rivalry between the United States and the former Soviet Union, coupled with China's careful scrutiny. In the post cold war period, several bilateral conflicts, the nuclear tests of 1998, the post 9/11 world in which South Asia has become a

breeding ground for terrorists, entwined with an embattled, albeit a shared history, continue to make India and Pakistan a pivotal region to study. A timely analysis which starts with traditional approaches and combines them with new thinking within a human security policy framework, this book will contribute to a deeper and more holistic understanding of policy priorities of major players in a pivotal region of the world. It begins by analyzing security policies of India and Pakistan that have emerged in the context of geo-political concerns based on realist calculations. It also looks at the policies of the two governments in key areas such as the economy, education, public health, and safeguarding against gender-based violence. Concern with human security prompts analyses such as the one adopted in this book to argue that governments should empower and protect their citizens from serious threats to their survival. Home to a fifth of the world's population, large numbers of whom are reeling in poverty, where terrorism continues to be a concern, along with ongoing border disputes, India and Pakistan will find it imperative to make careful evaluations of this multipronged challenge to security. While it has relevance for regional policy priorities, this analysis also has broader implications for world powers such as the United States and China, for whom South Asia remains a key strategic area.

**Confronting Chronic Neglect** Institute of Medicine, Board on Children, Youth, and Families, Committee on the Training Needs of Health Professionals to Respond to Family Violence, 2002-05-04 As many as 20 to 25 percent of American adults— or one in every four people— have been victimized by, witnesses of, or perpetrators of family violence in their lifetimes. Family violence affects more people than cancer, yet it's an issue

that receives far less attention. Surprisingly, many assume that health professionals are deliberately turning a blind eye to this traumatic social problem. The fact is, very little is being done to educate health professionals about family violence. Health professionals are often the first to encounter victims of abuse and neglect, and therefore they play a critical role in ensuring that victims—as well as perpetrators—get the help they need. Yet, despite their critical role, studies continue to describe a lack of education for health professionals about how to identify and treat family violence. And those that have been trained often say that, despite their education, they feel ill-equipped or lack support from by their employers to deal with a family violence victim, sometimes resulting in a failure to screen for abuse during a clinical encounter. Equally problematic, the few curricula in existence often lack systematic and rigorous evaluation. This makes it difficult to say whether or not the existing curricula even works. *Confronting Chronic Neglect* offers recommendations, such as creating education and research centers, that would help raise awareness of the problem on all levels. In addition, it recommends ways to involve health care professionals in taking some responsibility for responding to this difficult and devastating issue. Perhaps even more importantly, *Confronting Chronic Neglect* encourages society as a whole to share responsibility. Health professionals alone cannot solve this complex problem. Responding to victims of family violence and ultimately preventing its occurrence is a societal responsibility

Towards Realizing an ASEAN Community. A Brief Report on the ASEAN Community Roundtable Institute of Southeast Asian Studies, 2004 ASEAN has produced a plan of action on ASEAN Economic Integration, which is

annexed to the Bali Concord II. To kick-start the ASEAN Economic Community (AEC), the plan of action provides numerous policy recommendations to be implemented over the next 1 to 2 years. At the track-two level, research institutes/think-tanks such as ASEAN-ISIS, ISEAS and CSIS (Jakarta) have contributed concept papers on the AEC and the ASEAN Security Community (ASC). This Roundtable provided the opportunity for scholars and experts on ASEAN to brain-storm in a more comprehensive and integrated manner, the different ideas and proposals underpinning the process of community building that ASEAN is embarking upon. This report reflects the conclusions that emerged from the ASEAN Community Roundtable.

Interdisciplinary Research in Technology and Management Satyajit Chakrabarti,Rintu Nath,Pradipta Kumar Banerji,Sujit Datta,Sanghamitra Poddar,Malay Gangopadhyaya,2021-09-14 The conference on ‘Interdisciplinary Research in Technology and Management” was a bold experiment in deviating from the traditional approach of conferences which focus on a specific topic or theme. By attempting to bring diverse inter-related topics on a common platform, the conference has sought to answer a long felt need and give a fillip to interdisciplinary research not only within the technology domain but across domains in the management field as well. The spectrum of topics covered in the research papers is too wide to be singled out for specific mention but it is noteworthy that these papers addressed many important and relevant concerns of the day.

**The High Cost of Free Parking** Donald

Shoup, 2017-10-20 One of the American Planning Association's most popular and influential books is finally in paperback, with a new preface from the author on how thinking about parking has changed since this book was first published. In this no-holds-barred treatise, Donald Shoup argues that free parking has contributed to auto dependence, rapid urban sprawl, extravagant energy use, and a host of other problems. Planners mandate free parking to alleviate congestion but end up distorting transportation choices, debasing urban design, damaging the economy, and degrading the environment. Ubiquitous free parking helps explain why our cities sprawl on a scale fit more for cars than for people, and why American motor vehicles now consume one-eighth of the world's total oil production. But it doesn't have to be this way. Shoup proposes new ways for cities to regulate parking – namely, charge fair market prices for curb parking, use the resulting revenue to pay for services in the neighborhoods that generate it, and remove zoning requirements for off-street parking. Such measures, according to the Yale-trained economist and UCLA planning professor, will make parking easier and driving less necessary. Join the swelling ranks of Shoupistas by picking up this book today. You'll never look at a parking spot the same way again.
