A Printing History of Everyman's Library 1906-1982 Terry Seymour, 2011 The total number of Everyman's Library volumes that still survive somewhere in the world exceeds 70 million. Since the inception of the Library in 1906, nearly 1200 unique volumes have been published, constantly placing the world's greatest books before a large public. A few of these titles proved unpopular and were never reprinted. But most were reprinted dozens of times, packaged in numerous ways, and benefited from updated editorial work and book design over the last century. Terry Seymour has studied and researched every aspect of this great mass of books. He now captures and distills this knowledge in A Printing History of Everyman's Library 1906-1982. A critical feature, of course, is to update the various collecting factoids that have emerged since 2005 when his Guide to Collecting Everyman's Library was published. The meat of the new book, however, is the Bibliographical Entries section. Each volume that has ever been printed receives its own entry, detailing every printing, each dust jacket variation, any new introductions, updated scarcity numbers, and all relevant notes. Typically an entry contains at least six lines of information, but often much more. In essence, each entry is a story written exclusively about each volume. Armed with this resource, collectors and booksellers can know reliably everything about the Everyman's Library volume that sits on their shelf or is ready to be purchased or sold. They will see how a book fits into the total printing history of that title, and be able to describe and value the book with precision. To further enhance the value of this book, color images illustrate all of the key collecting points. An extensive index of editors, translators and artists is now included. Not just a solo effort, the Printing History has been vetted by other expert collectors, ensuring greater accuracy and comprehensiveness.

Integrating Agriculture, Conservation and Ecotourism:

Examples from the Field W. Bruce Campbell, Silvia López

Ortiz, 2011-06-07 Issues In Agroecology – Present Status and Future Prospectus not only reviews aspects of ecology, but the ecology of sustainable food production systems, and related societal and cultural values. To provide effective communication regarding status and advances in this field, this series connects with many disciplines such as sociology, anthropology, environmental sciences, ethics, agriculture, economics, ecology, rural development, sustainability, policy and education, and integrations of these general themes so as to provide integrated points of view that will help lead to a more sustainable construction of values than conventional economics alone. Such designs are inherently complex and dynamic, and go beyond the individual farm to include landscapes, communities, and biogeographic regions by emphasizing their unique agricultural and ecological values, and their biological, societal, and cultural components and processes.
