America & The World Majid Tehranian, Kevin P. Clements, In the name of counter-terrorism, the Bush administration pursued a largely unilateralist policy in the Middle East and elsewhere. Yet, in the name of protecting its national sovereignty, the United States also has rejected most of the recent multilateral treaties that strive to contain violence by fortifying the rule of international law. A unilateralist strategy also goes largely against the U.S. postwar multilateralism, which established the United Nations and its specialized agencies. This volume explores these contradictions.--BOOK JACKET.

**America and the World: The Double Bind** Kevin P. Clements, 2017-07-05 As the world's first democracy with a written constitution and Bill of Rights, the United States has stood for global aspirations toward democratic liberty, equality, and solidarity since its formation in 1776. However, as it developed into an empire by the late nineteenth century, the United States also has threatened the liberties of other peoples, including Native Americans, Hawaiians, Latin Americans, Asians, and Africans. The American role in world affairs has long been polarized around two conflicting images and strategies. In the name of counter-terrorism, the Bush administration pursued a largely unilateralist policy in the Middle East and elsewhere. Yet, in the name of protecting its national sovereignty, the United States also has rejected most of the recent multilateral treaties that strive to contain violence by fortifying the rule of international law. A unilateralist strategy also goes largely against the U.S. postwar multilateralism, which established the United Nations and its specialized agencies. This volume explores these contradictions. Contributors include: Kevin P. Clements, Tom Coffman, Audrey Kitagawa, Jeffrey F. Addicott, Steven Zunes, Vivien Stewart, Kathy Ferguson, Phyllis Turnbull, Bilveer Singh, Ibrahim G. Aoude, Richard Falk, Ann Wright, Beverley Kleeveer, Linda Groff, George Kent, Majid Tehranian, Mohammad Ali, Terrence Paupp, Gillian Young, Mihay Simaii, and David Krieger. The annual publication *Peace & Policy*, sponsored by the Toda Institute for Global Peace and Policy Research, is now in its ninth year. It is dedicated to providing a forum for the discussion of all issues concerning peace, policy, and the rights and responsibilities of global citizenship. This latest volume fulfills that commitment.

**American Yachts in Naval Service** Kenneth Howard Goldman, 2020-11-09 Before there was a U.S. Navy, several Colonial navies were all-volunteer--both the crews and the vessels. From its beginnings through World War II, the Navy has relied on civilian sailors and their fast vessels to fill out its ranks of small combatants. Beginning with the birth of the yacht in the Netherlands in the 17th century, this illustrated history traces the development of yacht racing, the advent of combustion-engine power and the contribution privately owned vessels have made to national defense. Vessels conscripted during the Civil War served both the Union and Confederacy--sometimes changing sides after capture. The first USS *Wanderer* saw the slave trade from both sides of the law. Aboard the USS *Sylph*, Oscar-winning actor Ernest Borgnine fought the Third Reich's U-boats under sail. USS *Sea Cloud* made history as the first racially integrated ship in the Navy, three years before President Truman desegregated the military.

**The End of Money and the Future of Civilization** Thomas Greco,2009-06-04 Like the proverbial fish who doesn't know what water is, we swim in an economy built on money that few of us comprehend, and, most definitely, what we don't know is hurting us. Very few people realize that the nature of money has changed profoundly over the past three centuries, or—as has been clear with the latest global financial crisis—the extent to which it has become a political instrument used to centralize power, concentrate wealth, and subvert popular government. On top of that, the economic growth imperative inherent in the present global monetary system is a main driver of global warming and other environmental crises. *The End of Money and the Future of Civilization* demystifies the subjects of money, banking, and finance by tracing historical landmarks and important evolutionary shifts that have changed the essential nature of money. Greco's masterful work lays out the problems and then looks to the future for a next stage in money's evolution that can liberate us as individuals and communities from the current grip of centralized and politicized money power. Greco provides specific design proposals and exchange-system architectures for local, regional, national, and global financial systems. He offers strategies for their implementation and outlines actions grassroots organizations, businesses, and governments will need to take to achieve success. Ultimately, *The End of Money and the Future of Civilization* provides the necessary understanding— for entrepreneurs, activists, and civic leaders—to implement approaches toward monetary liberation. These approaches would empower communities, preserve democratic institutions, and begin to build economies that are sustainable, democratic, and insulated from the financial crises that plague the dominant monetary system.

**The Wealth Creation Revelation** Peter C. Bisulca,2010-09-24 About the Book This book is unlike any other wealth creation book ever written. Its user friendly, educational approach will instruct and enlighten you. It will provide you with tools, insight, and hope for a prosperous future that you can control. You will be able to see the true wealth creation opportunities that show up in life distinct from the opportunities that lead to financial ruin or limbo. Once you understand the basic principles of this book, you will never see the world of money the same again. There will simply be no turning back. You will have the education and knowledge to feel confident in determining the course of your financial future. For the most part, wealth creation is a nonlinear process that occurs in life and not in an investment account. Therefore, this book must restructure your mind in a way that allows the process to unfold specifically for you in your life. First and foremost, this book is designed to peel back the veil of misinformation and misdirection instilled in the minds of Americans by banks and brokers over the course of four generations. At this point in time, the misinformation is imbedded deeply into our financial DNA. The banks and brokers have had a four-generation time span to pollute not only our minds but the minds of our parents and great-grandparents. It is possible that our own parents innocently taught us misinformation taught to them by a bank or broker. What if the secret to wealth creation lie within the acronym, S.P.L.I.T. (Savings + Protection + Liquidity + Inflation + Tangible Commodities), and you no longer need to deal with the volatility of the stock market or rely on a broker again to attain wealth? What if the secret to wealth creation is, in reality, cloaked for most Americans, but now you can have access to it? This book delivers the S.P.L.I.T wealth creation strategies and levels the playing field for all people. Regardless s of your position on the economic pyramid, the authors message will benefit you greatly.

*Crash Cinema* Will Godfrey,Jill Good,Mark Goodall,2009-10-02 *Crash Cinema: Representation in Film* is a collection of essays that emerged from *Crash Cinema* an annual

symposium that is an integral part of the Bradford Film Festival at the National Media Museum (UK). The symposium was created by academics and curators who share the common aim of promoting the importance of film both as an academic study and for critical public appreciation. Films can be enjoyed as entertainment, they can educate and inform and they can excite and disturb. Films are powerful pieces of culture. The films that we now 'consume' do more than simply amuse or horrify. Cinema not only thrills us but also communicates to us about ourselves and in the twentieth and twenty-first century moving images have become the dominant form of this communication. Bombarded by images, we inhabit a media intensive world in which every aspect of life is pervaded by visual signs. In these circumstances it becomes increasingly significant to engage with the politics of representation. Through this vital process we can acknowledge that all cultural forms, whether in high art or the mass media, are in the broadest sense political. We can also appreciate that it is a complex agenda of interests that shapes specific ideological meanings. Fulsomely equipped, we can apply this essential tool to the exciting task of decoding the political, social and cultural meanings articulated through the making, promotion and consumption of film. This book aims to offer an arena for the analysis of these representations. Representations cannot depict the 'truth' and the essays in this book do not claim to search for the 'truth'. We ask whose 'truth' is being represented, how is it represented and why is it represented like that? We also ask how do representations tell us something about the culture within which they are created. Yet the essays in this volume are not 'stuck' in the representational concerns of the past and try instead to uncover the power of cinema to shock and surprise whether that be through visceral impact, subversive content, experiments with identity or the exploration of the taboo. Representation, as defined by the eleven essays in this book, is a fluid and dynamic approach to the study of film. The study of film, to which this book contributes some unique case studies, is as popular as ever and has withstood growing challenge from the new media such as CG Animations, the internet and computer, console and online gaming. This is because the pleasure of film is still the most humanistic and because the sophistication of the representations offered by cinematic expression remain ever more complex and pleasurable to decipher. This book can therefore be read by any student, academic, writer or filmmaker hooked on these delights.

**Case Studies On Preventive Diplomacy In The Asia-Pacific** Yanjun Guo, Lin Wu, 2020-10-29 Preventive Diplomacy (PD) has been recognized as a useful tool to address security issues in the Asia-Pacific region. To explore a PD mode compatible with the regional situation step by step on the basis of consensus has become the common will of the regional countries. Since the region is facing various new challenges, this requires innovation in theories and practices of PD. Focusing on the practice of preventive diplomacy, this book conducts empirical and comparative studies on the application of preventive diplomacy in various issue areas and by different countries.

**Women's Human Rights** Niamh Reilly, 2013-04-23 Women's Human Rights: Seeking Gender Justice in a Globalising Age explores the emergence of transnational, UN-oriented, feminist advocacy for women's human rights, especially over the past three decades. It identifies the main feminist influences that have shaped the movement liberal, radical, third world and cosmopolitan and exposes how the Western, legalist, state-centric, and liberal biases of mainstream human rights discourse impede the realisation of human rights in women's lives everywhere. The book traces the evolution of the women's human rights movement through an examination of its key issues, debates, and practical interventions in international law and policy arenas. This includes efforts to: Develop global gender equality norms via the UN Women's Convention Frame violence against women as a human rights issue Address gender-based crimes in conflict situations, include women in conflict resolution and post-conflict reconstruction, and challenge new forms of militarism Highlight the gendered human rights dimensions of widening inequalities in a context of neo-liberal globalisation Develop human rights responses to anti-feminist fundamentalist movements with a focus on reproductive and sexual rights Ultimately, Women's Human Rights reaffirms a commitment to critically reinterpreted universal human rights principles and demonstrates the vital role that bottom-up, transnational movements play in making them a reality in women's lives.

**Rethinking the transition process in Syria: constitution, participation and gender equality** Claudia Padovani, Francesca Helm, 2018-04-30 A just and sustainable peace for Syria can only be attained through the equal participation of women's rights defenders at the negotiation table and throughout the transitional process. Understanding the legal framework within which such participation takes place – and the challenges of promoting women's rights through a gender-responsive constitution – is crucial. This publication, resulting from a collaboration between Euromed Feminist Initiative and the University of Padova, builds on the knowledge of academics and advocates, shedding new insights on those challenges. It aims at supporting institutional efforts being made to guarantee women's participation in the Syrian reconstruction, as well as advocacy initiatives carried out to ensure women's participation in political and economic decision-making in the country's future.

**The Art and Science of Trauma and the Autobiographical** Meg Jensen, 2019-01-04 This book examines posttraumatic autobiographical projects, elucidating the complex relationship between the 'science of trauma' (and how that idea is understood across various scientific disciplines), and the rhetorical strategies of fragmentation, dissociation, reticence and repetitive troping widely used in the representation of traumatic experience. From autobiographical fictions to prison poems, from witness testimony to autobiography, and from testimonio to war memorials, otherwise dissimilar projects speak of past suffering through a limited and even predictable discourse in search of healing. Drawing on approaches from literary, human rights and cultural studies that highlight relations between trauma, language, meaning and self-hood, and the latest research on the science of trauma from the fields of clinical, behavioral and evolutionary psychology and neuroscience, I read such autobiographical projects not as 'symptoms' but as complex interrogative negotiations of trauma and its aftermath: commemorative and performative narratives navigating aesthetic, biological, cultural, linguistic and emotional pressure and inspiration.

**Spontaneous Evolution** Bruce H. Lipton, Ph.D., Steve Bhaerman, 2009-09-15 We've all heard stories of people who've experienced seemingly miraculous recoveries from illness, but can the same thing happen for our world? According to pioneering biologist Bruce H. Lipton, it's not only possible, it's already occurring. In Spontaneous Evolution, this world-renowned expert in the emerging science of epigenetics reveals how our changing understanding of biology will help us navigate this turbulent period in our planet's history and how each of us can participate in this global shift. In collaboration with political philosopher Steve Bhaerman, Dr.

Lipton invites readers to reconsider the unquestionable pillars of biology, including: · random evolution, survival of the fittest, and the role of DNA; · the relationship between mind and matter; · how our beliefs about nature and human nature shape our politics, culture, and individual lives; and · how each of us can become planetary stem cells supporting the health and growth of our world. By questioning the old beliefs that got us to where we are today and keep us stuck in the status quo, we can trigger the spontaneous evolution of our species that will usher in a brighter future.

In FED We Trust David Wessel,2010-08-03 “Whatever it takes” That was Federal Reserve Chairman Ben Bernanke’s vow as the worst financial panic in more than fifty years gripped the world and he struggled to avoid the once unthinkable: a repeat of the Great Depression. Brilliant but temperamentally cautious, Bernanke researched and wrote about the causes of the Depression during his career as an academic. Then when thrust into a role as one of the most important people in the world, he was compelled to boldness by circumstances he never anticipated. The president of the United States can respond instantly to a missile attack with America’s military might, but he cannot respond to a financial crisis with real money unless Congress acts. The Fed chairman can. Bernanke did. Under his leadership the Fed spearheaded the biggest government intervention in more than half a century and effectively became the fourth branch of government, with no direct accountability to the nation’s voters. Believing that the economic catastrophe of the 1930s was largely the fault of a sluggish and wrongheaded Federal Reserve, Bernanke was determined not to repeat that epic mistake. In this penetrating look inside the most powerful economic institution in the world, David Wessel illuminates its opaque and undemocratic inner workings, while revealing how the Bernanke Fed led the desperate effort to prevent the world’s financial engine from grinding to a halt. In piecing together the fullest, most authoritative, and alarming picture yet of this decisive moment in our nation’s history, In Fed We Trust answers the most critical questions. Among them: • What did Bernanke and his team at the Fed know—and what took them by surprise? Which of their actions stretched—or even ripped through—the Fed’s legal authority? Which chilling numbers and indicators made them feel they had no choice? • What were they thinking at pivotal moments during the race to sell Bear Stearns, the unsuccessful quest to save Lehman Brothers, and the virtual nationalization of AIG, Fannie Mae, and Freddie Mac? What were they saying to one another when, as Bernanke put it to Wessel: “We came very close to Depression 2.0”? • How well did Bernanke, former treasury secretary Hank Paulson, and then New York Fed president Tim Geithner perform under intense pressure? • How did the crisis prompt a reappraisal of the once-impregnable reputation of Alan Greenspan? In Fed We Trust is a breathtaking and singularly perceptive look at a historic episode in American and global economic history.
