Ocular Differential Diagnosis Frederick Hampton Roy,2012-03-31 The ninth edition of *Ocular Differential Diagnosis* is a practical manual to help practitioners make a quick diagnosis based on presentation and symptoms. The chapters are organised by regions of the eye, listing possible causes for each symptom in both common and uncommon disorders. Syndromes and diseases associated with exophthalmos, ptosis, strabismus, nystagmus, glaucoma, cataracts, uveitis and optic atrophy are discussed in detail. Drugs associated with each disorder are listed alphabetically and their recommended selection and dosage are in accordance with current practice. Diagnoses are listed alphabetically with more common and clinically significant disorders highlighted by asterisks. Further reading suggestions appear after each diagnostic description.

An Enemy of the People Henrik Ibsen,2017-08-18 Dr. Thomas Stockmann, civic-minded man of science with an independent spirit, is the complex hero of Henrik Ibsen's controversial 1883 drama. It is a story of environmental crisis, whistleblowing, competing stakeholders, corruption, the press, pride, power, resistance, betrayal, and the complex nature of democracy. Ibsen surgically exposes the heart of capitalism, its moral contradictions and compromises with the truth. Includes introduction and questions for discussion. A high quality edited text for actors, teachers, students, and general readers. Translated by R. Farquharson Sharp.

Indiana Notary Public Guide Indiana Secretary of State,2019-04-06 A notary is a public official responsible for independently verifying signatures and oaths. Depending on how a document is written, a notarization serves to affirm the identity of a signer and the fact that they personally executed their signature. A notarization, or notarial act, officially documents the identity of a party to a document or transaction and the occasion of the signing that others can rely upon, usually at face value. A notary's authentication is intended to be reliable, to avoid the inconvenience of having to locate a signer to have them personally verify their signature, as well as to document the execution of a document perhaps long after the lifetime of the signer and the notary. An oath is a sworn statement. In most cases a person will swear that a written statement, oral statement, or testimony they are about to give is true. A notary can document that the notary administered an oath to an individual.

Machines for Living Victoria Rosner,2020-02-04 Changes in the routines of domestic life were among the most striking social phenomena of the period between the two World Wars, when the home came into focus as a problem to be solved: re-imagined, streamlined, electrified, and generally cleaned up. Modernist writers understood themselves to be living in an epochal moment when the design and meaning of home life were reconceived. Moving among literature, architecture, design, science, and technology, *Machines for Living* shows how the modernization of the home led to profound changes in domestic life and relied on a set of emergent concepts, including standardization, scientific method, functionalism, efficiency science, and others, that form the basis of literary modernism and stand at the confluence of modernism and modernity. Even as modernist writers criticized the expanding reach of modernization into the home, they drew on its conceptual vocabulary to develop both the thematic and formal commitments of literary modernism. Rosner's work develops a new methodology for interdisciplinary modernist studies and shows how the reinvention of domestic life is central to modernist literature.

Power Nihilism: A Case for Moral & Political Nihilism James Theodore Stillwell III,Matthew Ray,Brett Stevens,2017-09-27 Within this text James Theodore Stillwell III extracts thought strands from profound thinkers such as Hume, Nietzsche, Kant A.J. Ayer, C.L. Stevenson, J. L. Mackie, Ragnar RedBeard, Peter Sjöstedt-H and interweaves them into a meta ethical tapestry that is a liberating-brutally honest red pill. Mixing non cognitivism, error theory, with projectivism, Stillwell puts forth a kind of moral nihilism (Power-Nihilism) that dispenses with both secular and theistic forms of moral realism. In the final chapter James articulates his qualified form of political nihilism and critiques such concepts as Natural law and Natural Rights along with a few other pivotal concepts within political theory. This book also covers such topics as the will to power, slave morality, bad conscience, the on going destruction of Western civilization, radical individualism, collectivism, egalitarianism, hierarchy and much more...

Ethics and Risk Management Lina Svedin,2015-07-01 The underlying rationale for this book is to present research that a) highlights the explosively political and deeply divisive issues involved in managing risk and b) address the empirical deficit and theoretical challenges related to managing societal risk ethically. Extant risk management research borrows heavily from engineering, systems theory and business management, and is primarily focused on probabilities, modeling, and abstractions of the value of mitigative action. This research engenders a false sense of objectivity and it de-politicizes fundamental political and democratic questions about the allocation of society's scarce resources and about the balance of responsibilities between governing institutions and individuals with regard to risk. The quantitative and hard-science focus on risk also keeps a discussion of the consequences of the distribution of risk, resources and responsibilities for real people out of the lime light. The contributors to this book are experts in a wide range of academic fields and in this book they take on the challenge of examining their core research with a specific ethics perspective. They explore the ethics of risk management using theory, cases and data from a range of policy areas, countries and philosophical traditions. This book should be of interest to scholars and practitioners working in fields that deal either implicitly or explicitly with risk. This would include, but is not limited to, scholars and students of public management, public sector ethics, public policy, risk regulation, and risk management. The book deals directly with core problems of management in the public sector, value-conflicts, multiple principals and stakeholders, as well as information analysis and the application of sound and valid decision-making processes. The book can be adopted as a core text for graduate courses in public management, public policy, public administration ethics, and comparative politics. It would also work well as an applied theory text in comparative politics; ethics centered courses in political science, as well as more narrowly focused courses on risk, crisis and disaster management. For the practitioner audience, this book pin-points the ethical stakes, the analytical and managerial challenges, and the necessary tools to meet the many risks that societies face. This book, *Ethics and Risk Management*,

provides a unique take on the realities of cost-benefit analysis, efforts to control and regulate risk and risky behavior, as well as the decidedly bounded rationality with which we, as decision-makers and citizens, perceive and take risks. The work of identifying, understanding, prioritizing and designing effective tools to mitigate and manage risk is an inherently analytical and strategic process best suited to take place before and between crises. Successful risk analysis and management reduces the general occurrence of crises, while the ethical analysis and management of risk serves to reduce the likelihood of subsequent socio-political turmoil should a crisis occur. Thus, the investment that any practitioner makes in risk management has the potential to yield both social and political benefits if the analysis and work is done with an eye toward ethics and stakeholder analysis.

Understanding Leadership Robert M. McManus, Gamaliel Perruci, 2019-12-09 Laozi, Marx, the Buddha, Ibsen, Machiavelli – these are just a few of the world’s great thinkers who have weighed in on the subject of leadership over the centuries. Yet the contemporary student of leadership often overlooks many of these names in favor of more recent theorists hailing from the social sciences. *Understanding Leadership: An Arts and Humanities Perspective* takes a different angle, employing the works of the great philosophers, authors, and artists found in world civilization and presenting an arts and humanities perspective on the study of leadership. The authors build their conceptual framework using their Five Components of Leadership Model, which recognizes the leader, the followers, the goal, the context, and the cultural values and norms that make up the leadership process. Supporting the text are a wealth of case studies that reflect on works such as Ayn Rand’s novella *Anthem*, Eugène Delacroix’s painting *Liberty Leading the People*, Charlie Chaplin’s film *Modern Times*, Athol Fugard’s play *Master Harold . . . and the boys*, Laozi’s poetic work *Dao De Jing*, and Antonín Dvořák’s *New World Symphony*. The authors also introduce studies from various world cultures to emphasize the role that cultural values and norms play in leadership. This illuminating framework promotes the multidimensional thinking that is necessary for understanding and problem-solving in a complex world. *Understanding Leadership: An Arts and Humanities Perspective* will be a valuable resource for both undergraduate and postgraduate leadership students, while leadership professionals will also appreciate the book’s unique liberal arts and cultural approach.

A Match Made in Hell Larry Stillman, 2005-09-01 When Moniek (Morris) Goldner and his family were uprooted from their Polish farming village during a German action, the child-sized sixteen-year-old fled into the forests. He eventually met up with his father, who had also escaped, and together they managed to survive until a former friend betrayed the pair. Wounded and left for dead beneath his father’s murdered body, Goldner was rescued by the enigmatic outlaw Jan Kopec, who was also in hiding, looking for ways to profit from his criminal expertise. For eighteen months Kopec hid the boy with him, moving from one area to another, often staying in hideouts he had fashioned years earlier. At first Kopec trained Goldner simply to serve as his accomplice in robberies and black market activities. But before long he pushed the training to a whole new level, making it possible for him to sell Goldner’s services to a shadowy resistance group which was becoming interested in the daring young saboteur. And through it all, these two disparate personalities—the quiet, small-framed boy and the stocky, callous mercenary—forged an remarkable friendship and co-dependency born of need and desperation in a hellish time and place.

Jonas and Kovner's Health Care Delivery in the United States James R. Knickman, PhD, Brian Elbel, PhD, MPH, 2023-03-04 Newly revised and significantly updated, *Jonas and Kovner's Health Care Delivery in the United States*, 13th Edition continues to be a highly acclaimed and trusted resource covering all aspects of health care in the United States. This comprehensive textbook contains information on a wide array of topics, including the organization of care, population health, the fundamental challenges of health disparities, health care financing and economics, and health information technology’s role in improving care and protecting privacy. New chapters on public health preparedness and its role in mitigating effects on health and the health system, and the medical and social challenges of caring for older adults provide insight into important, ongoing challenges and what those challenges reflect about our system of care. With an increased emphasis on health disparities, population health, and health equity, this textbook includes a timely focus on how social and behavioral determinants influence health outcomes. Students will gain a deeper understanding of public health systems and their societal role and of the economic perspectives that drive health care managers and the system. Thorough coverage of the rapid changes that are reshaping our system, in addition to an evaluation of our nation’s achievement of health care value, will equip students with the critical knowledge they need to enter this dynamic and complex field. The book also includes cutting-edge, evidence-based information on preventive medicine, innovative approaches to control health care costs, initiatives to achieve high quality and value-based care, and much more from prominent scholars, practitioners, and educators within health care management, public health, population health, health policy, medical care, and nursing. Key Features: New chapters on Public Health Preparedness and Caring for Older Adults Expanded coverage on health disparities and health equity, public health systems and their societal role, and the economic perspectives driving health care managers and the system Careers in Focus sections provide perspectives from a range of career paths in the health sector and how they contribute to the health care workforce Case Exercises and Discussion Questions have been expanded for all chapters Digital access to the entire text, including four supplementary eChapters that provide an engaging visual overview of trends in health care and detail the Affordable Care Act—including its history and implementation, updates to the law, and changes as a result of the COVID-19 pandemic Purchase includes digital access for use on most mobile devices or computers, and qualified instructors also have access to a full suite of instructor resources

De Valera and Roosevelt Bernadette Whelan, 2020-12-10 How did Irish and American diplomacy operate in Washington DC and Dublin during the 1930s era of economic depression, rising fascism and Nazism? How did the Anglo-American relationship affect American-Irish diplomatic relations? Why and how did Éamon de Valera and Franklin D. Roosevelt move their countries towards neutrality in 1939? This first comprehensive history of American and Irish diplomacy during the 1930s focuses on formal and informal diplomacy, examining all aspects of diplomatic life to explain the relationship between the two administrations from 1932 to 1939. Bernadette Whelan reveals how diplomats worked on behalf of their governments to implement Franklin D. Roosevelt and Éamon de Valera's foreign policies – particularly when Éamon de Valera believed in the existence of a 'special' transatlantic relationship but Franklin D. Roosevelt increasingly favoured a strong relationship with Britain. Drawing on a wide range of under-used sources, this is a major new contribution to the history of American and Irish diplomacy and revises our understanding of the importance of Ireland to a US administration.

Couples Coping with Stress Mariana K. Falconier, Ashley K. Randall, Guy Bodenmann, 2016-05-12 This is the first book that reviews both empirical and clinical applications of how couples jointly cope with stress - dyadic coping - around the globe. The Systemic-Transactional Stress Model (STM), developed by co-editor Guy Bodenmann, is used as a consistent framework so readers can better appreciate the contrasts and similarities across the fourteen cultures represented in the book. Written by scholars from the particular culture, each chapter provides a conceptual review of the dyadic coping research conducted in their specific cultures, and also provides empirical and clinical recommendations. Additional contributions include how to measure dyadic coping, so others can apply the STM model in other contexts. The latest treatment approaches for therapy and prevention are also highlighted, making this book ideal for professionals interested in expanding their cultural competence when working with couples from various backgrounds. Highlights include: -How couples in different cultures deal with stress and how values and traditions affect dyadic stress and coping. -Global applications, especially to couples in the regions highlighted in the book -- the U.S (including one chapter on Latino couples in the U.S.), Australia, China, Greece, Hungary, Italy, Japan, Kenya, Nigeria, Pakistan, Portugal, Romania, and Switzerland. -Factors encountered in examining dyadic coping using the STM Model including measurement and assessment issues. -Suggestions for making treatment, prevention, and intervention programs for couples more effective. Ideal for relationship researchers, psychologists, mental health counselors, social workers, and advanced students who work with couples dealing with stress. This book is also appropriate for advanced courses on interpersonal processes, close relationships, stress and coping, multicultural issues in marriage and family therapy or counseling, or family systems, taught in a variety of social science disciplines.

Encyclopedia of New Year's Holidays Worldwide William D. Crump, 2014-04-25 Among the world's myriad cultures and their associated calendars, the idea of a "New Year" is relative and hardly specifies a universal celebration or even a universal point in time. Ways of celebrating the New Year range from the observances of religious rituals and superstitions to social gatherings featuring particular foods, music, dancing, noisemaking, fireworks and drinking. This first encyclopedia devoted exclusively to the New Year includes 320 entries that give a global perspective on the New Year, beyond its traditional Western associations with Christmas. National or regional entries detail the principal traditions and customs of 130 countries, while 27 entries discuss major calendar systems in current use or of significant historical interest. The remaining entries cover a wide variety of subjects including literary works, movies, and television specials; the customs of specific ethnic groups; universal customs such as toasting and drinking; football bowl games and parades; and the New Year celebrations at the White House and the Vatican.

Assigning Responsibility for Children's Health When Parents and Authorities Disagree: Whose Child? Allan J. Jacobs, 2021-10-25 This book provides a multidisciplinary analysis of the potential conflict between a government's duty to protect children and a parent(s)' right to raise children in a manner they see fit. Using philosophical, bioethical, and legal analysis, the author engages with key scholars in pediatric decision-making and individual and religious rights theory. Going beyond the parent-child dyad, the author is deeply concerned both with the interests of the broader society and with the appropriate limits of government interference in the private sphere. The text offers a balance of individual and population interests, maximizing liberty but safeguarding against harm. Bioethics and law professors will therefore be able to use this text for both a foundational overview as well as specific, subject-level analysis. Clinicians such as pediatricians and gynecologists, as well as policy-makers can use this text to achieve balance between these often competing claims. The book is written by a physician with practical and theoretical knowledge of the subject, and deep sympathy for the parental and family perspectives. As such, the book proposes a new way of evaluating parental and state interventions in children's' healthcare: a refreshing approach and a useful addition to the literature.

Information Exchange Between Competitors in EU Competition Law Martin Gassler, 2021-02-12 Information Exchange Between Competitors in EU Competition Law Martin Gassler Competing firms often exchange information in order to make more informed market decisions which can help to overcome market inefficiencies. However, an abundance of legal and economic research as well as case law has shown that information exchange may also enable firms to engage in collusion more readily and sustain it longer. This book is the first to concentrate on this challenging topic of EU competition law in such depth. It focuses on 'pure' information exchanges – exchanges that are not ancillary to a wider pro-competitive or anticompetitive conduct – and thoroughly explains the characteristics of such information exchanges, their pro-competitive and anticompetitive effects and discusses all the relevant legal aspects for their assessment. The author provides a robust analytical framework for assessing information exchanges under Article 101 TFEU, focusing on the risk of collusive outcomes and what types of information exchange are particularly harmful. With detailed attention to the leading cases on information exchange, the analysis examines the most important aspects for assessing information exchange between competitors, in particular: the concept of a concerted practice; the concepts of a restriction by object and effect, including their similarities and differences; the importance of evidentiary issues; the issue of signalling via advance public announcements; factors that facilitate collusion; efficiencies of information exchange, including market transparency; the legal challenges of tackling mere parallel conduct; facilitative practices in the Commission Guidelines, including the Horizontal Cooperation Guidelines; and safe harbours for certain types of information exchange. The book offers clear guidance on how to identify and thus distinguish information exchange that restricts competition by its object and information exchange that restricts competition (only) by its effects. It offers practical solutions to some of the perceived issues when assessing information exchanges. With its wealth

of analysis not available from other sources, this concise yet comprehensive review of a much-debated topic in competition law offers clear guidance for practitioners in assessing the issues surrounding information exchange. The book will also be welcomed by competition law academics, competition lawyers and competition authority officials throughout Europe.
